Advance Your Skills to Lead in a Modern Global Economy

As a student in our Supply Chain and Logistics Management Bachelor's degree-completion program, you’ll develop the skills you need to collaborate with others in a global economy to direct the flow of goods from supplier to consumer. You will learn how to analyze and coordinate supply chain activities, including purchasing, transportation, inventory, and awareness management, while applying modern supply chain methodologies valued by employers. Our Bachelor-completion program exposes students to the skills needed for quality design, implementation and process improvement by using Six Sigma® and Total Quality Management (TQM) approaches—so you can be confident in your skills. You’ll also participate in a capstone course project or an internship option and take part in live interactive lectures to gain firsthand experience.

With Flex Choice® you can take advantage of competency-based education (CBE), which focuses on efficiency and relevancy by combining self-paced courses, project-based assessments, and real-world scenarios.

Your Career in Supply Chain and Logistics Management

Through career-focused curriculum and practical, hands-on opportunities in your courses, you can prepare for a successful career across a wide range of industries. Our program is designed to help you gain the relevant logistical leadership skills that employers seek and set yourself apart in the market.
