MISSION

Rasmussen College is an institution of higher learning dedicated to global enrichment and meeting the evolving needs of our diverse communities.

With an emphasis on innovative programs, dynamic curriculum, and general education skills, we are committed to being a pioneer in the field of career-focused education.

We empower our students, faculty and staff to exceed the expectations of society through academic excellence, community enrichment, and service to the public good.

PURPOSES

TO ACCOMPLISH OUR MISSION, RASMUSSEN COLLEGE ESTABLISHED THESE PURPOSES:

1. Educational Excellence and Assessment: Rasmussen College fosters a learning and teaching community that is challenging, stimulating and student-focused. The College uses continuous evaluation and a number of assessment tools and methods to ensure student learning, effective teaching, student persistence and institutional effectiveness.

2. Teaching, Learning, and Development: Rasmussen College provides learning opportunities in an environment of mutual respect in an unbiased atmosphere, preparing students and team members for success, lifelong learning and continued improvement in a global environment.

3. Mission and Service: Rasmussen College publicly states its mission and demonstrates its commitment to the public good by supporting career-focused education that empowers local communities. The College builds community through education and interacts with its constituency with integrity and transparency.

4. Resources and Effectiveness: Rasmussen College allocates resources to human capital, facilities and technology in its commitment to accuracy, connectedness and timeliness. The College is dedicated to effective use and investment of resources and a quality learning and teaching environment for students, staff and faculty.

5. Diversity and Inclusion: Rasmussen College promotes diversity awareness, respect for multiple perspectives, and inclusion among all College stakeholders in and out of classrooms.

WELCOME TO RASMUSSEN COLLEGE

I am honored that you have selected Rasmussen College as your institution to achieve your educational goals. At Rasmussen College, we are constantly researching and developing new programmatic offerings and course delivery methodologies that meet the needs of employers in our communities and our ever-changing student body. It is with this consistent programmatic focus that Rasmussen College continuously updates existing programs and launches new programs in order to stay relevant with the careers of today. We understand there are many reasons that aided in your decision to complete your education. Whether it was for career advancement opportunities, to make yourself more in-demand in the job market or even a personal life goal that you set for yourself—our programs are specifically designed for students like you to affordably complete your degree at a pace that’s right for you.

Whatever your reasons may be for returning to school, you have taken the right step toward accomplishing your goals. Combined with SUPPORT+, our network of student support services, Rasmussen College provides you with a solid foundation of customized academic support tools and resources, so you can be successful on your path toward earning your degree.

At Rasmussen College, serving the diverse needs of the communities around us is ingrained in the culture. By becoming a Public Benefit Corporation, we can continue to make an impact on the social welfare of communities through career-focused education and volunteer efforts that are not only sustainable, but potentially life-changing.

I wish you the best of luck achieving your educational goal, and I look forward to seeing you at graduation.

Sincerely,

Kristi A. Waite
President, Rasmussen College
LEARN WITH SUPPORT
GRADUATE WITH CONFIDENCE

SUPPORT+, our comprehensive network of student services, provides a customized level of support to help you earn your degree and succeed in your chosen career.

At no additional cost to you, our team of SUPPORT+ professionals—from your program manager, to your career services advisor, to everyone in between—is available to help you succeed in your classes and in your career.

Our dedicated team of faculty and staff provides exceptional customized support to help you reach your academic and career goals. Your SUPPORT+ team includes:

**PROGRAM MANAGER**
- Helps you determine the degree that is right for you
- Assists you in completing your application
- Provides you with guidance throughout your college career

**STUDENT FINANCIAL SERVICES ADVISOR**
- Helps you navigate the financial aid and FAFSA application process
- Answers questions about your award letter and the GI Bill
- Guides you to available scholarship, loan and grant opportunities

**STUDENT ADVISOR**
- Develops course schedule for your My Degree Plan
- Works with you to determine a balanced course load
- Ensures course availability throughout your degree timeline

**FACULTY**
- Incorporates industry experience in the classroom
- Helps you become proficient with course material
- Works with you to develop career-specific skills

**ACADEMIC TUTOR**
- Provides 24/7 math assistance for introductory algebra and college algebra
- Offers tutoring assistance seven days per week in English, anatomy and physiology, economics, general chemistry, biology and Spanish
- Available online and on campus—chat, call, email or schedule a tutoring session

**CAREER SERVICES ADVISOR**
- Develops your professional career-seeking skills
- Helps you prepare your resume and create your professional portfolio
- Provides you with guidance on your career choices and networking opportunities

**PERSONAL SUPPORT CENTER**
- Technical support specialists available 24/7
- Helps with software installation and web browser configuration
- Troubleshoots Internet connectivity, password reset, online course access and other technical issues

**ONLINE LEARNING CENTER**
- Schedules faculty and student tutoring
- Provides study aids, writing assistance, time management and test-taking strategies
- Offers convenient, 24-hour turnaround on comprehensive writing quality reviews

**MANAGER OF STUDENT RECORDS**
- Records credentials on your transcript as you achieve them
- Monitors graduation requirements

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E202 Junior Seminar during the quarter in which they finish the Associate’s degree requirements to graduate from an Associate’s degree program.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

Mission Statement
The Rasmussen College School of Business prepares students to be confident, results-oriented business leaders who are active contributors in their chosen fields and diverse communities. Our programs focus on building a strong business foundation while helping students acquire the skills employers demand, including critical thinking, communication, teamwork, and digital fluency, as they relate to various business settings. We measure our success through the academic performance, commitment to lifelong learning, and ethical and professional contributions of our graduates.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at rasmussen.edu/student-investment-disclosure.
BACHELOR’S DEGREE

Bachelor of Science Degree

CAREER OPPORTUNITIES:

• Auditor
• Cost Accountant
• Financial Analyst
• Managerial Accountant
• Accounts Payable Manager
• Accounts Receivable Manager

OBJECTIVE:

Graduates of this program know the accounting processes and cycles of professional accounting firms, businesses, and government agencies. They can manage accounts receivable, accounts payable, and payroll, and can also prepare tax returns, prepare and analyze financial statements, and use computer applications proficiently. They can perform advanced accounting tasks pertaining to taxes, auditing, fraud examination, and international accounting. **HUMAN RESOURCES AND ORGANIZATIONAL LEADERSHIP ASSOCIATE’S DEGREE**

**CAREER OPPORTUNITIES:**
- Human Resource Generalist
- Training and Development Specialist
- Job Analysis/Recruiting Specialist

**OBJECTIVE:**
Graduates of this program know fundamental concepts in leadership, human resources, management, marketing, and business ethics. They understand how human resources impact the workplace and can apply critical thinking to issues related to organizations, employment law, compensation, training, and employee development. They can demonstrate management skills including planning and decision-making, organizing, controlling, and leading employees. They can interpret basic financial data and perform basic accounting skills. They can use computer applications for the business environment. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and diversity awareness skills and their significance in academic and workplace situations.

**MISSION STATEMENT**

The Rasmussen College School of Business prepares students to be confident, results-oriented business leaders who are active contributors in their chosen fields and diverse communities. Our programs focus on building a strong business foundation while helping students acquire the skills employers demand, including critical thinking, communication, teamwork, and digital fluency, as they relate to various business settings. We measure our success through the academic performance, commitment to lifelong learning, and ethical and professional contributions of our graduates.

**STUDENT INVESTMENT DISCLOSURE:**
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at rasmussen.edu/student-investment-disclosure.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at rasmussen.edu/student-investment-disclosure.
MARKETING ASSOCIATE’S DEGREE

Associate of Applied Science Degree

CAREER OPPORTUNITIES:

- Marketing Coordinator
- Marketing Specialist
- Electronic Commerce Specialist

OBJECTIVE:

Graduates of this program understand fundamental concepts in marketing and business management. They can demonstrate marketing and management skills including planning and decision making, organizing, controlling, and leading employees. Students will be able to use computer applications for the business environment. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and diversity awareness skills and their significance in academic and workplace situations.

Total Associate’s Degree Credits

General Education Credits: 40
Major and Core Credits: 51

TOTAL DEGREE CREDITS: 91*

SEE PAGE 41 FOR GENERAL EDUCATION COURSE SELECTIONS.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E320 Junior Seminar during the quarter in which they finish the Associate’s degree requirements to graduate from an Associate’s degree program.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.
DIPLOMA

CAREER OPPORTUNITIES:
• Graphic Designer
• Print Designer
• Digital Designer
• Animation Designer
• Animation Artist

OBJECTIVE:
Graduates of the Animation and Motion Graphics Diploma program know the fundamentals of design, motion graphics, and animation. They can create and combine multiple forms of media to generate animation and motion-based projects involving graphic, video, and audio assets. Students will complete the program with a portfolio of projects that demonstrate their skills, knowledge, and techniques in design, animation, video, and motion. Graduates value the importance of effective written and interpersonal communication and critical thinking in a variety of professional contexts.

Students in the Information Technology Management, Information Security, Game and Simulation Programming, and Graphic Design programs must sit for designated, mandatory industry certifications, and official scores must be submitted as a condition of graduation. The College will reimburse students to sit for the mandatory certification, as well as up to two additional recommended certifications per established credentialing milestones. Reimbursements will be made only once per certification. Students are responsible for paying for any additional attempts.
BACHELOR’S DEGREE

Bachelor of Science Degree

CAREER OPPORTUNITIES:
• Graphic Designer
• Print Designer
• Digital Designer
• Animation Designer
• Animation Artist
• Production Artist
• Motion Graphics Artist
• 3D Animation Artist
• Art Director
• Multimedia Artist and Animator
• Visual Media Producer

OBJECTIVE:
Graduates of the Animation and Motion Graphics Bachelor’s Degree program will be able to conceptualize, plan, design, produce, and implement successful design solutions to complex visual projects. Students will know advanced theories of design, motion graphics, animation, project management, and portfolio development. They can create and combine multiple forms of media with a high level of craft and proficiency to generate animation and motion-based projects involving graphic, video, and audio assets. Students will complete the program with a graphic portfolio that demonstrates their skills, knowledge, and techniques in design, animation, video, and motion graphics. They value written and interpersonal communication, critical thinking and problem solving, information literacy, and diversity awareness skills and their significance in academic and workplace situations. Graduates will be employable in entry-level positions in graphic design, 2D and 3D animation, video production, character animation, or content creation for game design.

CERTIFICATE COURSES
LOWER DIVISION
E242 Career Development 2
EC100 Foundations of Child Development 4
EC110 Early Childhood Education Curriculum and Instruction 4
EC121 Health, Safety, and Nutrition/CDA Application 4
EC200 Observation and Assessment in Early Childhood Education 4

Choose either Track I ** or Track II

Track I **
EC180 Knowledge: Externship I 6
EC181 Application: Externship II 6
EC182 Reflection: Externship III 6

Track II
EC183 Teacher Reflection I: Early Childhood Education as a Profession 6
EC184 Teacher Reflection II: Morality and Ethics in Early Childhood Education 6
EC185 Teacher Reflection III: The Intentional Teacher 6

TOTAL CERTIFICATE CREDITS 36*

Students enrolling in the Early Childhood Education Certificate program must currently be working in the Early Childhood Education field and have an externship site approved by the College by the end of the first week of the quarter. Please see a Program Manager for more details.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E185 Freshman Seminar as part of Certificate course requirements during the quarter in which they finish the Certificate course requirements, generally it is scheduled in the same quarter as the E242 Career Development course.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

** Track I includes externship courses, which are not available to students in all states. Please see the Early Childhood Education program page on the Rasmussen College website (rasmussen.edu) and speak to a Program Manager for more details.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check.

Graduates of Early Childhood Education programs at Rasmussen College are not eligible for licensure as a teacher in an elementary or secondary school. A Bachelor’s degree and a state teaching license are typically required to work as a teacher in a public school and some private school settings. States, municipalities, districts or individual schools may have more stringent licensing requirements. Students must determine the licensure requirements in the state and school in which they intend to work.

Child care facilities and the states in which they are located establish qualifications for staff that work with children, and often implement guidelines regarding age, education, experience, background and professional development. Students must determine the licensure requirements in the state and facility in which they intend to work.

SCHOOL OF EDUCATION
MISSION STATEMENT

Rasmussen College’s Early Childhood Education Program prepares early childhood educators to serve young children, their families, and their communities. We foster and advocate developmentally and culturally appropriate practices among early childhood professionals. We value diversity, professionalism, collaboration, and research-based practice. We strive to provide young children with meaningful experiences that provide a foundation for a productive life.
In addition to meeting all other admissions requirements, applicants to this program must complete with a passing grade a seminar course. Students are prepared for the National Child Development Associate (CDA) credential.

**DIPLOMA**

**CAREER OPPORTUNITIES:**
- Early Childhood Teacher’s Aide

**OBJECTIVE:**
Graduates of this program know child development and apply best practices to their work in the early childhood field. They understand developmentally appropriate practices, positive guidance, partnering with parents, and observation and assessment of young children. They can plan and implement activities, materials and interactions that promote children’s healthy development while supporting a safe environment. They develop a niche through selection of a specialization equipping them to meet the needs of today’s children and families. Graduates value the importance of effective written and interpersonal communication and critical thinking in a variety of professional contexts. Students are prepared for the National Child Development Associate (CDA) credential.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check.

Graduates of Early Childhood Education programs at Rasmussen College are not eligible for licensure as a teacher in an elementary or secondary school. A bachelor’s degree and a state teaching license are typically required to work as a teacher in a public school and some private school settings. States, municipalities, districts or individual schools may have more stringent licensing requirements. Students must determine the licensure requirements in the state and school in which they intend to work.

Child care facilities and the states in which they are located establish qualifications for staff that work with children, and often implement guidelines regarding age, education, experience, background and professional development. Students must determine the licensure requirements in the state and facility in which they intend to work.
CERTIFICATE

CAREER OPPORTUNITIES:
• Phlebotomist
• Phlebotomy Services Representative
• Laboratory Assistant

OBJECTIVE:
Graduates of the Phlebotomy Certificate program know patient preparation procedures for performing the collection of blood specimens. In addition, graduates apply their knowledge of processing blood specimens and other body fluids for diagnostic testing. They value their roles in communicating information clearly and effectively from the laboratory to physicians, patients, and other health care professionals within the medical environment.

The Phlebotomy Certificate is offered at all Minnesota campuses except for the Moorhead campus. The Phlebotomy Certificate is not offered in North Dakota or Wisconsin.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E242 Freshman Seminar as part of Certificate course requirements during the quarter in which they finish the Certificate course requirements, generally it is scheduled in the same quarter as the E242 Career Development course.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a Minnesota Department of Human Services background check.

ASSOCIATE’S DEGREE

Associate of Science Degree

CAREER OPPORTUNITIES:
• Phlebotomist
• Phlebotomy Services Representative
• Laboratory Assistant
• Healthcare Associate

OBJECTIVE:
Graduates of the Health Sciences Associate of Science Degree know and can apply a combination of real world technical skills and general education concepts, and have learned to serve as valuable members of a health care team. Depending on career track, graduates may choose from a variety of employment options involving patient care or related health care situations. Graduates understand and value critical thinking and problem solving, written and interpersonal communication, customer service, diversity awareness skills, and medical ethics as these concepts relate to the health care industry and the community.

Lab work for the Phlebotomy Certificate track is only available at the Brooklyn Park/Maple Grove, Lake Elmo/Woodbury, Mankato and St. Cloud campuses.
MEDICAL BILLING AND CODING CERTIFICATE
CAREER OPPORTUNITIES:
• Medical Coder
• Medical Coder/Biller

OBJECTIVE:
Graduates of this certificate program know how to code healthcare data using ICD and CPT coding principles, and understand how these skills contribute to other areas in the healthcare facility. Students know how to navigate a health record and abstract information necessary to correctly code the medical information. They know medical terminology, anatomy, pathology, and the effective use of medical coding software available. They value the ability to effectively communicate, ethical and professional behavior in the workplace, and the confidentiality of patient information.

888-5-RASMUSSEN
HEALTH INFORMATION MANAGER BACHELOR’S DEGREE

Bachelor of Science Degree

CAREER OPPORTUNITIES:
- Medical Records Manager
- Clinical Data Analyst
- Privacy Officer
- Corporate Compliance Officer
- Risk Management Officer

OBJECTIVE:
Graduates of the Health Information Management (HIM) program will be prepared to assume diverse entry-level positions that span a broad range of settings including hospitals, physician practices, nursing homes, home health agencies, mental health facilities, and public health agencies as well as software companies, government agencies, pharmaceutical companies, and consulting firms. They will understand basic human anatomy and physiology, medical terminology and pathophysiology and demonstrate how they are critical to managing patient health information. HIM BS graduates will be able to communicate with all levels (clinical, financial, and administrative) of an organization that utilizes patient data in daily operations and decision making. Graduates will be skilled and competent in developing information policy, designing and managing information systems, as well as functioning in a technologically advanced and changing work environment. Graduates can apply, analyze, synthesize, and evaluate didactical theories and real world experiences relevant to health information management; demonstrate self-directed learning skills using a variety of resources and technology; articulate personal attributes and attributes critical to professional leadership; and administer health information computer systems. Graduates value critical analytical thinking, problem solving, financial literacy, knowledge creation skills, lifelong learning, communication, diverse perspectives, technology and information literacy, ethical and professional practice, and confidentiality of patient information.

The Medical Assisting Diploma program at the Green Bay, Lake Elmo/Woodbury, and Moorhead campuses is accredited by the Commission on Accreditation of Allied Health Education Programs (caaehp. org) upon the recommendation of the Medical Assisting Education Review Board (MAERB).
The Medical Assisting Diploma programs at the Bismarck campus in North Dakota, Aurora/Naperville, Mokena/ Tinley Park, Rockford, and Romeoville/Joilet campuses in Illinois; the Fort Myers, Ocala, New Port Richey/West Pasco and Tampa/Brandon campuses in Florida; the Appleton and Wausau campuses in Wisconsin; and the Blaine, Bloomington, Brooklyn Park/Maple Grove, Eagan, Mankato, and St. Cloud campuses in Minnesota are accredited by the Accrediting Bureau of Health Education Schools (ABHES).•

The Medical Assisting students must receive the first injection of the Hepatitis B immunization series by the end of week two in the Introduction to Medical Assisting course. Prior to the student beginning their externship, the full three injection series of the Hepatitis B immunization and all other program required immunizations must be completed. Medical Assisting students must successfully complete all Medical Assisting competencies before they will be eligible for graduation.

All Medical Assisting students are required to attend the Medical Assisting Programmatic Orientation within the first quarter of the program. All Medical Assisting students are required to attend the Rasmussen Externship meeting conducted by the Program Coordinator as well as a site orientation (if required by the site) prior to being eligible to begin the externship.

In addition to the courses listed, at designated points in their programs of study, students are required to complete a passing grade a seminar course. Students must complete the E270 Sophomore Seminar either during the quarter in which they finish the Diploma course requirements or the quarter immediately prior.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

ASSOCIATE’S DEGREE

Associate of Applied Science Degree

CAREER OPPORTUNITIES:
• Medical Assistant • Medical Office Administrative Assistant

OBJECTIVE:
The objectives of the Medical Assisting AAS Degree program are to prepare students to become valuable members of a healthcare team by supporting and assisting providers in delivering quality healthcare services; and to prepare students who are proficient in cognitive (knowledge), psychomotor (skills), and affective (behavioral) learning behaviors for entry-level medical assistant positions. Graduates will understand and value critical thinking and problem solving, written and interpersonal communication, information and financial literacy, diversity awareness skills and medical ethics as they relate to the medical assisting career and the global community.

The Surgical Technologist Associate’s Degree is offered in Minnesota at the Brooklyn Park/Maple Grove, Moorhead, and St. Cloud campuses. The Surgical Technologist Associate’s Degree is not offered in North Dakota or Wisconsin.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the ES20 Junior Seminar during the quarter prior to beginning their first Practicum course as a requirement to graduate from an Associate’s degree program.

This program requires specific immunizations prior to professional practice experience.

The Surgical Technologist AAS Program at the Brooklyn Park/Maple Grove, Moorhead, and St. Cloud campuses is accredited by the Commission on Accreditation of Allied Health Education Programs (cahhep.org), upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC/STSA).

Applicants to this program must meet program-specific admissions requirements, in addition to all general Rasmussen College admissions requirements. Please see the application procedures for this program under Academic Information and College Policies.

In addition to meeting all other admissions requirements, Minnesota campus applicants to this program must successfully complete and pass only a Minnesota Department of Human Services background check.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at rasmussen.edu/student-investment-disclosure.
CRIMINAL JUSTICE ASSOCIATE’S DEGREE • BACHELOR’S DEGREE

ASSOCIATE’S DEGREE

Associate of Applied Science Degree

CAREER OPPORTUNITIES: • Corrections Officer • Peace Officer • Probation Assistant • Court Clerk • Security Professional • Juvenile Specialist

OBJECTIVE: Grads of this program know the history and development of the criminal justice system and its effect on society. They understand how the legal process works from law enforcement, to the courts, and through the corrections system. They can apply critical thinking to issues in criminal justice such as law enforcement, corrections, security, juvenile justice, and domestic violence. Graduates write written and interpersonal communication, critical thinking and problem solving, information and literacy, and diversity awareness skills and their significance in academic and workplace situations.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E410 Senior Seminar during the quarter in which they finish their Bachelor’s degree requirements to graduate from a Bachelor’s degree program.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

** Additional training may be required.

***Track I includes an internship, which is not available to students in all states. Please speak to a Program Manager for more details.

Criminal Justice Professional Peace Officer Education (PJPE). This program meets peace officer training standards established by the Minnesota Peace Officer Standards and Training (MN POST) Board for persons who seek employment in Minnesota as a peace officer. Training standards vary by state, and students seeking peace officer employment in a state other than Minnesota should consult that state’s regulations. In order to sit for the Minnesota Peace Officer Standards and Training (MN POST) Board licensing exam, students are required to successfully complete an officially recognized first-aid course in First Responder, Emergency Medical Technician, or Emergency Response, and to complete practical “Skills” coursework meeting POST objectives. Students must provide the Rasmussen College Law Enforcement POST Coordinator with a copy of their required first-aid certification (e.g., a photocopy of their first responder card for inclusion in each student’s POST file maintained at Rasmussen College. Some skills training providers may require additional academic coursework. Skills training cannot be completed online.

In addition to meeting all other admissions requirements, applicants to these programs must successfully complete and pass a criminal background check.

SCHOOL OF NURSING

RN TO BSN PROGRAM/NURSING

BACHELOR’S DEGREE

(ONLINE ONLY)

Bachelor of Science Degree

CAREER OPPORTUNITIES:

• Clinical Practice
• Administration
• Nursing Education
• Nursing Leadership

OBJECTIVE:

The principal aim of this nursing education program is to strengthen nurses in the generalist role in alignment with the Essentials of Baccalaureate Education for Professional Nursing Practice. Graduates of this program will know the theoretical foundation of nursing according to the Quality and Safety Education for Nurses (QSEN) competencies which are designed to allow them to continuously improve the quality and safety of the healthcare systems within which they work. Graduates will be immersed in the six outcome abilities central to the QSEN competencies, and they are, patient centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. Upon completion of the nursing program, they will be able to improve patient outcomes and promote nursing as a profession. Graduates value caring, diversity, excellence, holism, effective communication, integrity, life-long learning and evidence-based practice that underlie the QSEN outcome abilities.

PROGRAM ENROLLMENT:

Applicants to this program who have a current unencumbered Registered Nurse license, have successfully completed an Associate’s degree in Nursing, and satisfy all program admission requirements will receive a block transfer equivalent to 113 credits in transfer to this program. Applicants who hold an RN license without an Associate’s degree and satisfy all program admission requirements will receive 66 credits in transfer to this program. They may receive up to 47 additional credits for successfully completed applicable lower division general education coursework; lower division general education credits not transferred must be completed to earn this degree.

SEE PAGE 41 FOR GENERAL EDUCATION COURSE SELECTIONS.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E410 Senior Seminar during the quarter in which they finish the Bachelor’s degree requirements to graduate from a Bachelor’s degree program.

This program is not available online to residents of some states. Please speak with your Program Manager to determine your eligibility for enrollment.

To graduate from this program, students must complete all required NU, PN, NUR, PRN coursework with a grade of C or better, achieve all required skill competencies, and satisfactorily complete all required clinical learning experiences.

The Nursing BS Degree (RN to BSN program) at Rasmussen College is a new applicant pursuing initial accreditation by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036; (202) 887-6791. New applicant status is neither a status of accreditation nor a guarantee that accreditation will be granted.
OBJECTIVE:
The objective of the Professional Nursing program is to provide the knowledge, clinical skills, nursing values, meanings and experience necessary for an entry-level professional nursing position; and to turn faculty and staff to the core components of professional nursing: professional behavior, communication, assessment, clinical decision making, caring interventions, teaching and learning, collaboration and managing care. This program is designed to prepare the graduates to use and apply the nursing process (assessment, diagnosis, planning, intervention, and evaluation) to provide care across the life span and in diverse settings within the healthcare continuum. Upon successful completion of this program, the graduate will receive an Associate of Science Degree in Nursing and will be eligible to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN) to obtain licensure as a registered nurse.

SEE PAGE 41 FOR GENERAL EDUCATION COURSE SELECTIONS.

The Professional Nursing Associate's Degree is only offered at the Blaine, Bloomington, Mankato, Moorhead, and St. Cloud campuses in Minnesota, and at the Green Bay and Wausau campuses in Wisconsin. The Professional Nursing Associate's Degree is not offered in North Dakota.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E320 Junior Seminar during the quarter in which they finish the Associate's degree requirements to graduate from an Associate's degree program.

Applicants to this program must meet program-specific admissions requirements, in addition to all general Rasmussen College admissions requirements. Please see the application procedures for this program under Academic Information and College Policies.

In addition to meeting all admissions requirements, Wisconsin campus applicants to this program must successfully complete and pass a criminal background check. In addition to meeting all admissions requirements, Minnesota campus applicants to this program must successfully complete and pass only a Minnesota Department of Human Services background check.

To graduate from this program, students must complete all required NU, PN, NUR, and Communication course with a grade of C or better, achieve all required skill competencies, and satisfactorily complete all required clinical learning experiences.

MOBILITY BRIDGE ENTRANCE OPTION

Students who have successfully completed a practical nursing program and hold a current practical nursing license will receive credit for NU117 Nutritional Principles in Nursing (4 credits) and NU211 Fundamentals of Professional Nursing (6 credits) in the Professional Nursing AS Degree program. The student's credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student's transcript as a Course Waiver (CW). Students may also transfer in up to 47 credits in successfully completed applicable general education coursework; graduates of Rasmussen College's Practical Nursing program will receive credit for G233 College Algebra, and the Communication course the student completed in the Practical Nursing program (for a total of 12 additional general education credits). Students must successfully complete all remaining coursework in the Professional Nursing AS Degree program to earn this degree.
PRACTICAL NURSING DIPLOMA

CAREER OPPORTUNITIES IN:
• Hospitals
• Clinics
• Long-Term Care Facilities
• Assisted Living Centers
• Dental Offices
• Physician’s Offices

OBJECTIVE:
Graduates of this program are prepared to function as an entry-level practical nurse under the direction of a registered nurse, physician, or dentist. They can implement psychomotor technical skills that meet current standards of practice; apply scientific knowledge and skills to meet the biological, psychosocial, cultural, and spiritual needs of the patient; provide maintenance, preventative, therapeutic, rehabilitative, and/or supportive care; communicate clear, concise, accurate, complete, and timely information to members of the healthcare team; use therapeutic communication to build and maintain therapeutic relationships with patients and their significant support person(s); use the nursing process to gather data, contribute to nursing diagnosis, guide nursing actions, and contribute to the plan of care; and provide basic individualized, holistic, and culturally sensitive nursing care for patients across the lifespan in a variety of settings. They can implement a personal practice standard that adheres to the legal and ethical standards of the practical nurse as defined by NFLPN and NAPNES. Graduates value critical thinking, communication, diverse perspectives, technology and information literacy, and post-licensure continuing education as a way to build on previous knowledge and skills and increase competency.

Upon successful completion of this program, the graduate will receive a Diploma in Practical Nursing and will be eligible to sit for the National Council Licensure Examination for Practical Nurses (NCLEX-PN) to obtain licensure as a practical nurse.

COMPUTER SCIENCE BACHELOR’S DEGREE

Bachelor of Science Degree

CAREER OPPORTUNITIES:
- Software Engineer
- Application Integration Engineer
- Software Architect
- Software Developer
- Applications Developer
- Computer Programmer

OBJECTIVE:
Graduates of this program understand and can apply theoretical concepts in the development of mobile applications and complex software products. They understand the principles of discrete and continuous mathematics and are able to apply logic and mathematical proof techniques. They understand programming fundamentals and are able to apply development techniques using a variety of modern programming languages. They have knowledge of the concepts and design principles relevant to computer architecture, operating systems, organization, networks, and distributed computing environments. Additionally, graduates have knowledge of fundamental principles in software engineering and algorithm analysis. They can perform software quality assurance testing, develop program documentation and flow charts, and apply best practices in the software development process. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, and knowledge creation skills and the need to incorporate them in meaningful ways, enabling students to excel in the software application development industry.

INFORMATION TECHNOLOGY MANAGEMENT
BACHELOR’S DEGREE

Bachelor of Science Degree

CAREER OPPORTUNITIES:
• Network Administrator  • Network Analyst  • Information Technology Manager

OBJECTIVE:
Graduates of this program understand how information systems are used in business and how technology adds value to business processes. They have advanced skills in network infrastructure management and know how to support business requirements through technology recommendations, security implementation, and development of policies and procedures to protect client data. Graduates have the ability to establish support structures and procedures to provide best in class customer service and problem resolution. They possess a high skill level in providing systems support and administration for web and database applications, network optimization, and expertise in systems performance monitoring. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, and knowledge creation skills and the need to incorporate them in meaningful ways.

TOTAL DEGREE CREDITS  181*

SEE PAGE 41 FOR GENERAL EDUCATION COURSE SELECTIONS.

* Credit totals do not include Foundation Courses. Students must demonstrate mastery of the subject matter in Foundation Courses through a Rasmussen College entrance placement exam, approved exemption based on previously completed coursework, or by successful completion of Foundation Courses.

Students in the Information Technology Management, Information Security, Game and Simulation Programming, and Graphic Design programs must sit for designated, mandatory industry certifications, and official scores must be submitted as a condition of graduation. The College will reimburse students to sit for the mandatory certification, as well as up to two additional recommended certifications per established credentialing milestones. Reimbursements will be made only once per certification. Students are responsible for paying for any additional attempts.

INFORMATION SECURITY BACHELOR’S DEGREE

Bachelor of Science Degree

CAREER OPPORTUNITIES:
• Network Security Analyst  • Security Consultant  • Information Security Analyst  • Computer Forensic Analyst

OBJECTIVE:
Graduates of this program will gain advanced knowledge in collecting and preparing evidence of computer crimes such as fraud, child pornography, and cyber espionage. The curriculum emphasizes a comprehensive understanding of the forensic tools and techniques used to investigate and analyze network-related incidents and digital devices. Graduates will be exposed to ethical and professional information systems management security standards in project management and report writing. Graduates of this program will also be able to address current and future cyber security challenges such as the collection and preservation of digital evidence, with a strong foundation of fundamental information systems management security principles. In addition, a graduate of this program will be prepared to provide exceptional service in the technology realm of the criminal justice field. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, and knowledge creation skills and the need to incorporate them in meaningful ways, and integrity in the criminal justice system.

Bachelor of Science Degree

CAREER OPPORTUNITIES:
- Game Programmer
- Simulations Programmer
- Video Game Asset Manager
- Interactive Media Technical Director
- Video Game Level Designer

OBJECTIVE:
Graduates of this program understand and can apply the technical concepts and knowledge needed to develop games and simulation projects from concept to final production. They understand games and simulations in terms of storyline, plot, visual elements, interface design, hardware requirements, and the necessary programming languages to complete projects. They can develop stories and characters for games and simulations, and employ development techniques, applied math and physics, and networking skills for multi-player games. They can perform software quality assurance testing, product documentation, audience analysis, and implementation efficacy research while delivering products to consumers. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, and knowledge creation skills and the need to incorporate them in meaningful ways, and understand how these practices can enhance the overall game and simulation development experience.

Total Bachelor's Degree Credits 181

SEE PAGE 41 FOR GENERAL EDUCATION COURSE SELECTIONS.

This program is only available to students enrolled at a campus located in Florida, Illinois, Kansas, Minnesota, North Dakota, or Wisconsin.

In addition to the courses listed, at designated points in their programs of study, students are required to complete with a passing grade a seminar course. Students must complete the E410 Senior Seminar during the quarter in which they finish the Bachelor's degree requirements to graduate from a Bachelor's degree program.

Applicants to this program must meet program-specific admissions requirements, in addition to all general Rasmussen College admissions requirements. Please see the application procedures for this program under Academic Information and College Policies.

Students in the Information Technology Management, Information Security, Game and Simulation Programming, and Graphic Design programs must sit for designated, mandatory industry certifications, and official scores must be submitted as a condition of graduation. The College will reimburse students to sit for the mandatory certification, as well as up to two additional recommended certifications per established credentialing milestones. Reimbursements will be made only once per certification. Students are responsible for paying for any additional attempts.

GENERAL EDUCATION REQUIREMENTS FOR RASMUSSEN COLLEGE CREDENTIALS

BS degree candidates must successfully complete an additional twenty-four (24) upper-division general education courses beyond the lower-division credits required in an Associate’s degree. These credits should be distributed across the following categories: Communication, Humanities, Math/Natural Sciences, and Social Sciences. AS degree candidates must successfully complete thirty-two (32) credits of general education coursework distributed across the following categories: English Composition, Communication, Humanities, Mathematics, Natural Sciences, and Social Sciences. AAS degree candidates must successfully complete forty-five (45) credits of general education coursework distributed across the same categories.

Diploma programs include general education courses as designated by program. Certificate programs may not include general education courses because they are career focused. Courses that are primarily developmental or remedial in nature, such as Foundation courses, may not be included in the general education total for any program.

GENERAL EDUCATION PHILOSOPHY

General Education inspires commitment to lifelong learning by providing learners transferable skills desirable in the workplace, such as communication, critical thinking, information literacy, diversity & teamwork, ethics & professional responsibility, and digital fluency. General Education courses may adhere to a learner’s major program, satisfy an intellectual curiosity, or both. General Education allows learners to flourish amid change, better understand their own learning, and assists in applying ideas to the modern world and workplace.

This course is not eligible for selection as a general education elective. This course may be a required general education course in some programs (see program pages for details).
GENERAL EDUCATION COURSE CATEGORIES

In the areas of English Composition and Communication, students will demonstrate understanding of basic rhetorical strategies including audience, purpose, thesis statements, effective organization, and/or the use of adequate and relevant evidence. In the area of Humanities, students will demonstrate understanding of different forms of art; the difference between creative and critical thinking; the elements associated with various art forms; and/or the function of creative production and expression in society. In the area of Math and Natural Sciences, students will demonstrate understanding of the notation and terminology used in mathematics; the effect that such calculations accomplish; the difference between the valid and invalid use of data and statistics; the fundamental scientific processes, theories, facts, concepts, and principles; the difference between facts and opinions; and/or the steps of the scientific method.

In the area of Social Sciences, students will demonstrate understanding of social theory, social structure/organization, major concepts, issues, ideas and models in social science; methods of scientific inquiry as they affect social science; methods of qualitative research; and/or how social, cultural, and political factors influence social and historical change.

Most programs use a combination of lecture and laboratory methods of instruction. A class period, particularly in a technology-intensive learning environment, is defined as either lecture or laboratory depending primarily on whether new material is introduced. Lecture is a class setting in which the student is instructed in the theory, principles, and history of an academic or vocational subject. The student should expect a requirement of two hours of outside preparation for each hour of lecture instruction. Some lecture classes have additional time scheduled for individual coaching. Laboratory is a setting in which the student applies information and demonstrates, tests, or practices for reinforcement skills previously acquired through lecture or outside reading. An instructor is normally present in the laboratory setting, but for coaching and clarification rather than for presentation of new material. Two hours of laboratory have the credit equivalency of one hour of lecture. Internship (also externship or practicum) is a quarter-hour-related experience with indirect instructor supervision and employer assessment, usually coupled with lecture sessions in which the workplace experience is discussed. Three hours of internship have the credit equivalency of one hour of lecture. The individual student's ability to attain the necessary skills and competencies may influence the number of clock hours necessary to complete an individual course. Prerequisites may be waived in unusual circumstances, but only with the consent of the instructor and approval of the Academic Dean or Campus Director.

Program Length

A Rasmussen College student is considered full-time when he or she is taking 12 or more credits per term. While a student is considered part-time when the student is taking less than 12 credits per term, a part-time student typically takes an average of 8 credits per term. To calculate program length, the College divides the total program credits by 12 for full-time students and by 8 for part-time students.

Credit Definition

Credit Hour – The unit by which Rasmussen College measures its coursework. The number of credit hours assigned to a course usually reflects the combination of class, laboratory, and/or internship hours required in the course. Rasmussen College follows the quarter system, and awards one credit for each 10 clock hours of lecture, 20 clock hours of laboratory, or 30 clock hours of internship, externship, or practicum contained in a quarter, or the equivalent in directed study. Students are expected to spend at least two hours in out-of-class preparation and completion of assignments for each hour they spend in class.

Clock Hour – Equal to 50 minutes of instruction.

How to Read Course Descriptions

Course number Range: Courses fall into one of three groups: development courses, level courses, and major courses. Courses numbered 000 to 199 are development courses. Courses numbered 200 to 999 are level courses. Courses numbered 1000 to 4999 are major courses.

Course description numbers that range from 200-299 are considered to be more advanced courses and may function as sophomore-level or capstone courses. Course description numbers that range from 300-399 are considered to be upper division courses and may function as junior-level courses. Course description numbers that range from 400-499 are considered to be more advanced upper division courses that may function as senior-level student requirements for a Bachelor's degree.

Most courses are assigned a number of credits at the end of the course description. This number represents the number of credit hours per quarter in which the student is expected to spend at least two hours in out-of-class preparation and completion of assignments for each hour they spend in class. The number of credits assigned to a course may be a whole number or a decimal, depending on whether Rasmussen College is following a quarter or semester calendar. Rasmussen College follows the quarter calendar.

Most courses are assigned a number of credits at the end of the course description. This number represents the number of credit hours per quarter in which the student is expected to spend at least two hours in out-of-class preparation and completion of assignments for each hour they spend in class. Rasmussen College follows the quarter calendar.
A410 Advanced Federal Tax Theory
40 hours, 4 credits
This course provides advanced instruction in the tax laws as implemented by the Internal Revenue Service, addressing individuals, corporations, and partnerships. Prerequisite: Taxation of Individuals.

A415 Financial Statement Analysis
40 hours, 4 credits
This course introduces the student to the study of financial statement analysis including interpreting and analyzing accounting data and examining financial statements. Prerequisite: Financial Accounting II.

A416 Advanced Financial Accounting
40 hours, 4 credits
This course focuses on the importance of the operational functions in organizations today to include business combinations and the related financial accounting transactions necessary, segment reporting, output planning, international transaction accounting, foreign currency transactions, inventory control, scheduling, and quality control. An interweaving emphasis will be placed on quality and its impact in securing a strategic advantage for manufacturing and service entities. Prerequisite: Intermediate Financial Reporting II.

A420 Accounting Information Systems
40 hours, 4 credits
An advanced course that further develops an understanding of the elements, relationships, and issues associated with manual and computerized accounting information systems. Practical application using spreadsheet models, databases, and general education software. Prerequisite: Management of Information Systems.

A430 International Accounting
40 hours, 4 credits
This course includes a study of the international dimension of financial reporting and analysis. It provides students with an overview of the accounting practices of multinational enterprises and the preparation and presentation of financial statements in different nations. Topics covered include international corporate taxation, transfer pricing, foreign currency translation, financial disclosure, and international accounting harmonization. Prerequisite: Advanced Financial Accounting.

A432 Accounting Fraud Investigation
40 hours, 4 credits
This course is a study of the internal audit principles, practices, and control evaluations that are utilized to ensure accountability, responsibility and ethical operations within an organization. Prerequisite: Advanced Auditing Concepts and Standards.

A440 Accounting Research Methods and Techniques
40 hours, 4 credits
In this course students learn accounting research tools and processes, how to conduct accounting research, and how to apply findings and results to solve business problems. Prerequisites: Advanced Auditing Concepts and Standards; Taxation of Individuals; Intermediate Financial Reporting III.

A490 Accounting Capstone II
40 hours, 4 credits
This course will be a synthesis of the accounting, business, and general education courses offered in the Accounting BS Degree Program. A study of emerging issues and timely topics in financial accounting, professional ethics, and transferable skills necessary for the success of an accounting graduate, and accounting careers will be discussed. This course focuses on research, case analysis, interpersonal communication and class presentation. Prerequisite: Intended for student’s last quarter of study.
Prerequisite: none

B370 Organizational Behavior Analysis
40 hours, 4 credits
This course is designed to explore human behavior in work settings from an interdisciplinary perspective. The following topics will be studied and analyzed from a management perspective: organizational structure, leadership, power, conflict management, individual and group dynamics, motivation, morale, and communication. Prerequisite: none

B371 Research and Report Writing
40 hours, 4 credits
Students will learn research and report writing for academic settings. Topics will include qualitative and quantitative research methods, literature search, information literacy, and academic report writing. Prerequisite: English Composition or Communicating in Your Profession

B375 Advanced Human Resource Management
40 hours, 4 credits
The purpose of this course is to enable the student to develop a broad exposure to new approaches, techniques, and future trends in the management of personnel. This course includes a study of the major functions in personal management including job analysis, manpower planning, selection of personnel, performance evaluation, training and wage and salary administration. Prerequisite: Principles of Management; Introduction to Human Resource Management or Management of Health Information Services

B404 Negotiation and Conflict Management
40 hours, 4 credits
This course will focus on negotiation and conflict management in business and other organizational settings. The emphasis is on gaining an understanding of the negotiation process and developing effective negotiation and conflict management skills. Prerequisite: Organizational Behavior Analysis

B415 Risk Management
40 hours, 4 credits
This upper-level business course explores the elements of risk management and insurance essential to the business environment. This course will develop the rationale for risk-management systems and examine the environments in which they operate. Students will learn, analyze, and evaluate approaches to measuring and managing risks in various business environments. Prerequisite: none

B420 Organizational Development
40 hours, 4 credits
This seminar course builds upon the theories introduced in Organizational Behavior Analysis. In this course, students examine how qualitative approaches, quantitative approaches, and process improvement approaches to organizational development through the stories of professionals involved in organizational change. Students will critically examine the design, management, and control of organizational development programs. This course includes educational resources from Harvard Business Publishing. Prerequisite: none

B421 Statistics for Business
40 hours, 4 credits
In this course, students will develop basic statistical literacy along with the ability to analyze and evaluate real-life business problems using statistical methods. Students will learn to organize and present quantitative data by means of graphical and numerical methods. Topics include descriptive statistics, basic probability theory, discrete and continuous probability distributions, sampling distributions, estimation, hypothesis testing, analysis of variance, and simple linear regression. Prerequisite: none

B439 Business Law and Ethics
40 hours, 4 credits
This course reviews fundamental principles of law applicable to business transactions, and provides overview of the current moral and ethical issues that arise in the world of business. Students will examine the law, legal system, and ethical aspects and how they apply to the business world and business transactions. Public and private law are addressed. Critical thinking and ethical analysis are key areas of focus throughout the course. Prerequisite: none

B440 Managing a Diverse Workforce
40 hours, 4 credits
This seminar course examines diversity from a personal, team, group, organizational, national, and global perspective. Students will explore stereotypes of individuals within organizations, and they will study how these stereotypes affect people within the workplace. Students will also examine issues in conducting business and managing people within a global setting. Prerequisite: none

B444 Statistics for Managers
40 hours, 4 credits
In this course students will utilize a statistical computer package, and examine applied statistics methods and applications in business situations. Prerequisite: College-level Math course

B460 Strategic Management
40 hours, 4 credits
This course is designed to integrate prior business courses through study, discussion, and creation of strategic management plans. Students will evaluate the key functions of organizations and integration of these functions to understand the business value of teams and group. Students will explore strategies of effective management teams. Topics will include strategic formulation, implementation, and evaluation. Prerequisite: Introduction to Business

B473 Leading Change
40 hours, 4 credits
This course will focus on the impact of change in an organizational setting. Various change management models will be explored, providing students with a foundation for approaching change and developing effective skills and techniques to perform in the workplace when change occurs. Students apply business concepts to real-world case study examples and determine strategies for bringing constructive change to an organization. Prerequisite: none

B491 Legal and Ethical Environment of Business
40 hours, 4 credits
This course presents an overview of the law, legal system, and ethics and how they apply to the business world. Topics include business transactions, public and private law are addressed. Critical thinking and ethical analysis are key areas of focus throughout the course. This course includes educational resources from Harvard Business Publishing. Prerequisites: Ethics Around the Globe or Business Law

B492 Contemporary Leadership Challenges
40 hours, 4 credits
This seminar course examines current issues within the management field. This course is highly interactive in that both students and faculty are equally responsible for the learning process of the class. Students will learn to become active and effective members of a professional learning community. Prerequisite: none

B498 Management Capstone
30 hours, 3 credits
In this course, students analyze, synthesize, evaluate, and create new knowledge by reviewing, contemplating, and applying theoretical concepts studied throughout their degree in creating a solution for an actual management need. This course is designed to be taken during the student’s last quarter. Prerequisite: none

D132 Computer Applications and Business Systems Concepts
40 hours, 3 credits
This course teaches students basic to advanced computer concepts and skills, including creating and modifying Word documents, Excel spreadsheets, Access databases, PowerPoint presentation creation, and PowerPoint presentations with enhanced features and web tools. Prerequisite: none

D181 Excel
40 hours, 3 credits
This course is designed to investigate the advanced applications and concepts available in Microsoft Office Excel. Students will be introduced to electronic spreadsheet features ranging from the data input and manipulation to charting and PivotTables. This course is designed to help prepare students for the Excel portion of the Microsoft Office Specialist certification exam. Prerequisite: Computer Applications and Business Systems Concepts

D187 Professional Presentations
40 hours, 3 credits
This course is designed to incorporate two Microsoft Office presentation programs into a single, powerful tool that can be used to create professional presentations. Students will learn to use PowerPoint and Publisher as partners in creating multidimensional presentations. Prerequisites: Computer Applications and Business Systems Concepts

D250 Microsoft Access
40 hours, 3 credits
This course is designed to investigate the advanced applications and concepts available in Microsoft Office Access. Students will be introduced to database management features ranging from the creation and modification of databases to maintaining data integrity. This course is designed to help prepare students for the Access portion of the Microsoft Office Specialist certification exam. Prerequisite: Computer Applications and Business Systems Concepts

D279 Computer Focused Principles
40 hours, 3 credits
This course is designed to teach students to accomplish common accounting functions through the use of the computer. Students will learn how to use a software package to enter data into a computer, input and process information and produce standard accounting reports. This course covers common accounting functions such as maintaining accounts receivable, accounts payable and general ledgers. Prerequisite: Financial Accounting I
D283 Access 40 hours, 3 credits
This course is designed to investigate the advanced applications and concepts available in Microsoft Office Access. Students will be introduced to database management features ranging from the creation and modification of databases to maintaining data integrity. This course is designed to help prepare students for the Access portion of the Microsoft Office Specialist certification exam.
Prerequisite: Computer Applications and Business Systems Concepts

E170 Introduction to Undergraduate Research 20 hours, 2 credits
This course provides a broad overview of information literacy concepts by introducing skills for locating, evaluating, and ethically using a variety of resources for a specific purpose. The course begins with the information cycle and the production of information, followed by the identification of a topic & research question, and the selection, evaluation and integration of sources into an annotated bibliography.
Prerequisite: none

E185 Freshman Seminar 0 credits
This seminar course challenges students at the end of their freshman year to reflect on concepts and skills learned in courses across the curriculum. Summative assessments focus on general education skills that provide the basis for lifelong learning. Students must complete the freshman seminar as part of the Certificate course requirements the quarter they are scheduled for the E242 Career Development course.

E242 Career Development 20 hours, 2 credits
This course is designed to study the personal and professional characteristics necessary for obtaining and maintaining suitable employment. The student will assemble a complete job-seeking portfolio including his/her resume and references, letters of application and appreciation, documentation of work and educational history, and demonstration of skills through examples of student work. The course includes an in-depth study of self-marketing approaches, job interviewing techniques and professionalism as well as participation in a mock interview.
Prerequisite: none

E270 Sophomore Seminar 0 credits
This seminar course challenges students at the end of their sophomore year to reflect on concepts and skills learned in courses across the curriculum. Summative assessments focus on general education skills that provide the basis for lifelong learning. Students must complete the sophomore seminar the quarter in which they finish the Diploma course requirements.

E320 Junior Seminar 0 credits
This seminar course challenges students at the end of their program of study to reflect on concepts and skills learned in courses across the curriculum. Summative assessments focus on general education skills that provide the basis for lifelong learning. The course is required for graduation from an Associate’s degree program.

E410 Senior Seminar 0 credits
This seminar course challenges students at the end of their program of study to reflect on concepts and skills learned in courses across the curriculum. Summative assessments focus on general education skills that provide the basis for lifelong learning. The course is required for graduation from a Bachelor’s degree program.

EC100 Foundations of Child Development 40 hours, 4 credits
This course will explore characteristics of children at different ages, children’s developmental needs, and the foundation of early childhood education. Students will learn the fundamentals of developmentally appropriate practice as it relates to child development, individual needs, building self-esteem in children, and using interpersonal skills and communication within the classroom and center. Students will study the function of the family, and the cultural, social, class, and ethnic variations in the family as a social system.
Prerequisite: none

EC110 Early Childhood Education Curriculum and Instruction 40 hours, 4 credits
This course promotes the development of young children in the academic, social, and emotional domains. It examines developmentally appropriate methods for writing and assessing behaviors, lesson plans, and activity goals. Various curriculum models will be reviewed. Strategies to enhance parent and family involvement will be emphasized.
Prerequisite: Foundations of Child Development

EC121 Health, Safety, and Nutrition/CDA Application 40 hours, 4 credits
Prerequisite: Computer Applications and Business Systems Concepts
This course examines the role of early childhood professionals working in the field via the policies and procedures governed by the state. Students will learn guidelines for establishing safe environments and activities. They will also learn strategies for implementing health policies, controlling disease, establishing proper nutrition, and responding to children’s special health concerns. Students will carry out a 2-hour field observation in the field of education.
Prerequisite: Early Childhood Education Curriculum and Instruction

EC180 Knowledge: Externship I 180 hours, 6 credits
Under externship supervision, the student will observe and implement developmentally appropriate practices while interacting with children and adults.
Prerequisite: none

EC181 Application: Externship II 180 hours, 6 credits
Students continue their externship experience in an early childhood setting. The focus is on developmentally appropriate practices and leadership.
Prerequisite: Knowledge: Externship I

EC182 Reflection: Externship III 180 hours, 6 credits
Students will complete their externship experience in an early childhood setting. The focus is on developmentally appropriate practices and leadership.
Prerequisite: Application: Externship II

EC183 Teacher Reflection I: Early Childhood Education as a Profession 60 hours, 6 credits
This course is an introduction to the field of early childhood development as a profession and examines historical influences on the field. The identification of early childhood educator’s personal attributes, knowledge, skills, and professional codes of conduct are included.
Prerequisite: none

EC184 Teacher Reflection II: Morality and Ethics in Early Childhood Education 60 hours, 6 credits
This course will provide an examination of morality and ethics in early childhood development. Topics include childhood ethics, ideals, and principles. Professional values and teaching styles will be explored.
Prerequisite: Teacher Reflection I: Early Childhood Education as a Profession

EC185 Teacher Reflection III: The Intentional Teacher 60 hours, 6 credits
Students will learn about intentionality in teaching and selecting best practices for young children’s learning and development. Both child-guided and adult-guided methods will be examined in the areas of language and literacy, mathematics and scientific inquiry, social skills and understandings, physical movement and visual arts.
Prerequisite: Teacher Reflection II: Morality and Ethics in Early Childhood Education

EC200 Observation and Assessment in Early Childhood Education 40 hours, 4 credits
Students will explore effective strategies for observation and assessment in early childhood education. They will understand the observation, assessment, analysis, and planning involved and its impact on promoting children’s development.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC210 Infant and Toddler Development 40 hours, 4 credits
This course will provide the foundation for responsive, relationship-based curricula for infants and toddlers in group care. This course will introduce the philosophy and theory behind primary care, continuity of care, and respectful care as it relates to brain and attachment research. Explores ways of creating environments for infant/toddler group care which foster optimum social/emotional, physical, and cognitive development.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC211 Dynamics of the Family 40 hours, 4 credits
This course will focus on the dynamics of the family and the family’s influence on the growth and development of children. The history of family systems, child rearing, and parenting styles will be discussed. The course will explore issues that families of today face.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC212 Emerging Literacy Through Children’s Literature 40 hours, 4 credits
This course covers the history, selection, and integration of literature and language in the early childhood education curriculum. Topics include developmentally appropriate children’s literature and the use of books and other media to enhance language and literacy in the early childhood setting. Strategies for teaching emerging literacy through techniques such as selecting appropriate books for storytelling, reading aloud, puppetry, and flannel-board use will be emphasized.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC225 Parent Education and Support 40 hours, 4 credits
Students will investigate how resources are assessed, allocated, and utilized within families. They will explore strategies for helping families meet emerging literacy through various problem-solving methods.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC230 Guiding Children’s Behavior 40 hours, 4 credits
Students will explore how to use guidance in the early childhood setting, with an emphasis on understanding why young children exhibit certain behaviors and how we can meet the child’s needs effectively and with support. Students will learn how to provide positive guidance to young children with challenging behavior.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC323 Child and Family Advocacy 40 hours, 4 credits
Students will explore and develop skills to advocate for children and families. They will review legislation, social policy, and advocacy techniques. Students will also investigate several current and controversial issues within the early childhood profession, and explore current research on early childhood education issues.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC240 Introduction to English Language Learners 40 hours, 4 credits
Students will explore effective ways to adapt English language instruction to teach learners in our increasingly diverse population of young children and families. They will examine a range of communication styles, learning styles, and behaviors that affect English language teaching and learning. They will analyze the development of English language skills in all domains through social and cultural lenses.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC241 Language and Literacy Acquisition 40 hours, 4 credits
Students will examine how infant, toddler, preschool, and school-aged English Language Learners acquire language and literacy. They will be exposed to early childhood programs that support children’s home languages, and explore how to create an environment that sustains English Language Learners.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application

EC242 Involving Parents of English Language Learners 40 hours, 4 credits
Students will explore how to engage and support family involvement for English Language Learners. They will examine methods for maintaining effective communication and developing strong relationships with the families of English Language Learners.
Prerequisites: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application
**COURSE DESCRIPTIONS**

EC243 Curriculum and Instruction for English Language Learners  
40 hours, 4 credits  
Students will explore practical strategies in curriculum and instruction for English Language Learners. They will apply principles of developmentally appropriate practice in the context of educating dual language learners.  
Prerequisites: Foundations of Child Development; Early Childhood Education  
Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application  

EC250 Advocating for Children with Special Needs  
40 hours, 4 credits  
Students will explore current trends, resources and advocacy on behalf of young children with special needs. They will examine their role in supporting and advocating for young children with special needs and their families.  
Prerequisites: Foundations of Child Development; Early Childhood Education  
Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application  

EC251 The Inclusive Classroom  
40 hours, 4 credits  
Students will learn strategies for promoting and supporting an inclusive classroom. They will analyze environmental restrictions and explore how to support young children with special needs in the early childhood setting.  
Prerequisites: Foundations of Child Development; Early Childhood Education  
Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application  

EC252 The Exceptional Child  
40 hours, 4 credits  
This course is designed to explore the benefits of inclusion in the early childhood setting. Students will develop an understanding of exceptional development. Students will identify the parties relevant to exceptional development and their roles as resources in support of the child and their families.  
Prerequisites: Foundations of Child Development; Early Childhood Education  
Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application  

EC253 Curriculum and Instruction for Children with Special Needs  
40 hours, 4 credits  
Students will explore how to adapt developmentally appropriate curriculum to support the development of children with special needs. They will learn strategies for effective partnering with other professionals and parents to ensure the achievement of developmental goals.  
Prerequisites: Foundations of Child Development; Early Childhood Education  
Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application  

EC290 Early Childhood Education Capstone  
20 hours, 2 credits  
Students will integrate the knowledge and skills gained from coursework in the Early Childhood Education program. They will complete a capstone project that integrates knowledge and skills in child development, health and nutrition, curriculum and instruction, observation and assessment, and other areas relevant to the field.  
Prerequisite: Early Childhood Education student in last or second-to-last quarter  

EC295 Summative Project for Early Childhood Education  
20 hours, 2 credits  
The course will include student reflection upon cumulative learning from the early childhood education program. Students will critically analyze, reflect and problem solve experiences in the field of early childhood. Students will identify specialization-specific knowledge to inform best practices. Students will compile research and select the best application(s) to improve care and education for young children.  
Prerequisite: none  

EK115 Cardiovascular Anatomy and Pathology  
40 hours, 4 credits  
This course provides students with a focused exploration of the anatomy and diseases of the cardiovascular system. Students will learn about the basic mechanism that regulates the cardiovascular cycle and the relationship between disease processes and electrocardiography (ECG) results. In this course, students will also discuss how research and evidence based education of disease processes affect EKG monitoring.  
Prerequisites: Introduction to Electrocardiograms; Structure and Function of the Human Body  

EK220 Advanced Electrocardiograms  
60 hours, 4 credits  
This course will develop students to ensure patient knowledge and safety during cardiac monitoring. The use of advanced EKG equipment will provide an opportunity to analyze complex EKG rhythms and apply advanced cardiac monitoring practices. Students will also learn how to apply research and evidence based education to monitoring practices.  
Prerequisite: Introduction to Electrocardiograms  

EK280 Extensive and Capstone  
100 hours, 4 credits  
EK280 Lecture (20 hours, 1 credit)  
EK280L Clinical (80 hours, 4 credits)  
This course is designed to provide the student with the experience in a clinical setting that includes performing cardiac testing, evaluating EKG results, and effectively communicating with patients and patient care team. During the practical experience, students will participate in a program capstone that will assist students during their externship and prepare students for certification.  
Prerequisite: Advanced Electrocardiograms  

F108 Financial Markets and Institutions  
40 hours, 4 credits  
This course is the standard introduction to the banking profession, financial markets, and financial institutions. It touches on nearly every aspect of financial services, from the fundamentals of negotiable instruments to contemporary issues and developments within the industry.  
Prerequisite: none  

G124 English Composition  
40 hours, 4 credits  
This course is designed to guide students in understanding the writing process and developing their ability to write and express ideas in an organized, unified, and coherent manner. Students will produce college-level writing that reflects awareness of rhetorical strategies, writing purpose, student voice, and appropriate grammar, punctuation, and usage skills. Through reading, writing, discussion, research, and collaboration, students will practice effective writing and apply course concepts.  
Prerequisite: Passing grade in Foundation coursework or placement determined by Rasmussen College entrance placement exam score  

G125 Humanities  
40 hours, 4 credits  
This course investigates human creative achievement. It is designed to increase the student’s understanding and appreciation of cultural literacy and the pursuit of humanitarian goals. Representative disciplines may include art, music, literature, architecture, drama, and philosophy.  
Prerequisite: none  

G126A English Composition 2  
40 hours, 4 credits  
This course builds on students' understanding of the writing process through an exploration of various writing strategies and research. Students will analyze readings and apply critical reading and writing skills.  
This course will develop argumentative writing and application of research.  
Prerequisite: English Composition  

G141 Introduction to Communication  
40 hours, 4 credits  
The course will introduce students to basic models and theories of the communication process. Students will learn about a variety of elements involved in communication. They will also explore how factors such as race, ethnicity, age, socioeconomic status, and gender influence communication. Students will focus on developing an awareness of the effects of various types of communication on themselves and others. They will also develop practical skills for improving their ability to communicate in personal, social and professional contexts. Specific topics will include perception, self-concept, verbal and non-verbal communication, effective listening and communicating in culturally diverse settings.  
Prerequisite: Passing grade in Foundation coursework or placement determined by Rasmussen College entrance placement exam score  

G142 Introduction to Sociology  
40 hours, 4 credits  
This course introduces students to basic sociological terms and concepts. Students will understand how to apply sociological concepts and theories and analyze the structure and relationships of social institutions and the process of social change. Students will explore a variety of topics of sociological interest, including socialization, social inequality, social movements, and the impact of technology and social change on society.  
Prerequisite: none  

G145 Film Appreciation  
40 hours, 4 credits  
Students will study different elements, forms, techniques and styles of film and will learn a critical approach to film and the motion picture industry. Students will critically evaluate filmmakers through various approaches and assessments that demonstrate analysis, interpretation, and evaluation skills as well as fostering a deeper appreciation and understanding of film as an art form.  
Prerequisite: none  

G146 Human Geography  
40 hours, 4 credits  
This course will introduce students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth’s surface. Students will employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences.  
Prerequisite: none  

G147 Art Appreciation  
40 hours, 4 credits  
Students will examine the historical, social, and technological factors that contribute to understanding the function and meaning of art in this course. Using a global and thematic approach, students will be introduced to the basic elements of art, while learning about a full range of media used to make art, and the fundamental concepts of art criticism. Western and non-Western art is represented, with a strong emphasis on a global perspective in relation to culture, communication, politics, and economics.  
Prerequisite: none  

G148 General Psychology  
40 hours, 4 credits  
This course will provide students with a general understanding of basic methodologies, concepts, theories, and practices in contemporary psychology. Areas of investigation may include the goals and research methodologies of psychology, the science of the brain, theories of human development and intelligence, consciousness, perception and emotions, the science of sensation and perceptions, and the current practices pertaining to psychological disorders, therapies, and treatments.  
Prerequisite: none  

G150 Structure and Function of the Human Body  
40 hours, 4 credits  
This course provides a working knowledge of the structure and function of the human body. A general introduction to cells and tissues is followed by study of the anatomy and physiology of the skeletal and muscular systems. The student is introduced to the nervous, cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.  
Prerequisite: none  

G152 Scientific Literacy  
40 hours, 4 credits  
In this course students will explore the role that science plays in the world. Students will survey different natural sciences such as: biology, health sciences, chemistry, physics, astronomy, and geology; as well as analyze specific case studies from these fields. Throughout the course students will develop their scientific reasoning skills. They will learn about the scientific method as well as how to detect common fallacies and misuse of science.  
Prerequisite: none  

G153 Ethics Around the Globe  
40 hours, 4 credits  
This course is a study of various and common ethical principles around the world and their relationship to morality and professional responsibility. Emphasis is placed on the application of ethical theories to problems faced in increasingly globalizing business and society.  
Prerequisites: none
G203 Macroeconomics 40 hours, 4 credits
In this course, students will learn the fundamentals of macroeconomics, which deals with the economy as a whole. An overview of the American economy will be explored through a study of basic supply and demand analysis and a review of fiscal and monetary policy to phases of the business cycle. Unemployment, inflation, GDP, and policy decisions which affect the American economy at home and abroad will be covered.
Prerequisite: none
G204 Microeconomics 40 hours, 4 credits
Students will be introduced to the field of microeconomics in this course, including theories of production, determination of prices, and distribution of income in regulated and unregulated industries. Other topics may include industrial relations, monopolies, and comparative economic systems.
Prerequisite: none
G217 Human Growth and Development 40 hours, 4 credits
This course consists of the study of the development of the individual throughout the life cycle, including child, adolescent and adult patterns of behavior with attention to physical, intellectual, cognitive, personality, and social development.
Prerequisite: none
G224 Introduction to Critical Thinking 40 hours, 4 credits
A study of the rules of valid judging and reasoning, both inductive and deductive, in a traditional, language-centered context rather than a symbolic context. Logical analysis of both formal and informal fallacies and of the consistency and logical consequences of a given set of statements. Logical analysis is applied to concrete problems dealing with our knowledge of reality.
Prerequisite: English Composition
G227 Oral Communication 40 hours, 4 credits
This course will present students with a broad understanding of communication in a variety of contexts. Students will learn the processes and strategies of oral communication by exploring speech anxiety, audience analysis, and organizational speech patterns. Students will research, use supporting materials, and use effective language to develop and present a narrative, informative, and persuasive speech.
Prerequisite: none
G230 Introduction to Literature 40 hours, 4 credits
This course offers an introduction to the most common literary genres: fiction, poetry, drama, and literary non-fiction. Students will study the basic elements of each genre, learn how to compare genres, become familiar with sample texts that illustrate the particularities of each genre, and practice the skills of analyzing and writing about literary texts. Reading and analysis of texts will include a variety of literary forms and periods. Students will engage in approaches to determine literary meaning, form, and value.
Prerequisite: none (English Composition recommended)
G233 College Algebra 40 hours, 4 credits
This course provides students with the skills to achieve mastery of algebraic terminology and applications including, but not limited to, real number operations, variables, polynomials, integer exponents, graphs, factoring, quadratic equations, and word problems.
Prerequisite: Foundation coursework or placement determined by Rasmussen College entrance placement exam score
G238 Conversational Spanish 40 hours, 4 credits
This course focuses on common words and phrases students need to develop a working vocabulary which will enable them to communicate with Spanish-speaking individuals in their personal and professional lives. Although oral communication is stressed, this course will review Spanish grammar, phonetic pronunciation and Hispanic culture.
Prerequisite: none
G239 Introduction to Astronomy 40 hours, 4 credits
Examines astronomical phenomena and concepts, including the solar system, stars and galaxies, planetary motions, atoms and radiation, and the origin and evolution of the universe.
Prerequisite: none
G245 Introduction to Geology 40 hours, 4 credits
Examines basic geologic principles from a physical or historical perspective. Includes such topics as the formation of rocks and minerals; internal and external processes modifying the earth’s surface and phenotype; and the evolutionary history of the earth, including its form and processes in the earth’s environment.
Prerequisite: none
G246 Advanced Algebra 50 hours, 5 credits
Students will learn about topics including functions and functional notation, domains and ranges in relation to functions, graphing functions and relations, and various function operations. Students will be able to solve linear equations and inequalities as well as quadratic equations and higher-order polynomial equations. This course will review algebraic techniques as well as polynomials, factoring, exponents, roots, and radicals.
Prerequisite: Satisfactory score on placement exam
G247 Introduction to Discrete Mathematics 40 hours, 4 credits
This course provides the basis for proper mathematical reasoning in a computer science framework. Topics that students explore include propositional and predicate logic, proof strategies and inductive reasoning, sets, relations, elementary counting techniques, and number systems.
Prerequisites: Calculus I; Discrete Structures for Computer Science
G231 Introduction to Human Biology 50 hours, 4 credits
Students will explore fundamental concepts of human biology. They will examine cell structure and function, body systems, and biochemistry. They will also learn basic concepts of genetics and evolution. Students will explore the relationship of human populations and the ecosystem. Students will complete laboratory exercise coordinated with course content.
Prerequisite: none
G233 College Algebra 40 hours, 4 credits
This course provides an overview of the United States healthcare system. The history of the evolution of healthcare will be explored, along with the role of local, state, and federal government in healthcare delivery. An introduction to a variety of provider models and service delivery systems found in both public and private healthcare facilities will be covered, including different types of healthcare facilities. The influence of reimbursement methodologies and finance on healthcare delivery will be explored.
Prerequisite: none
G324 Advanced Composition 40 hours, 4 credits
This advanced writing course is intended to help students further develop and refine their writing, researching, and analytical skills, through the application of these skills to various rhetorical situations. To achieve these goals, students will be expected to develop their ability to present their views in an organized, unified, and coherent manner to diverse audiences.
Prerequisite: English Composition
G328 Human Uses of the Environment 40 hours, 4 credits
This course provides an in-depth exploration of the integrated relationship between human life and the surrounding environment, beginning with a study of the fundamental concepts and principles of ecology. Topics that are interwoven throughout the course include principles of ecology as seen in the structure and function of the ecosystem; pollution of air, soil, and water resources; population explosion and the relationship of people, disease, and food production; and environmental controls necessary for survival.
Prerequisite: none
G330 American Literature 40 hours, 4 credits
This course surveys authors, genres, and movements in American literature from 1865 to the present, including representative works of Realism, Naturalism, Modernism, and Post-Modernism/Post-Structuralism. Students will engage in critical readings of exemplary literary texts from a diverse group of authors that have influenced American literature since the Civil War. Students will analyze how these works of literature exemplify particular historical moments in U.S. history, as well as how they communicate pertinent cultural issues such as gender, race, ethnicity, class, religion, sexual identity, community, region, and nation. In their study of the broad range of American fiction, poetry, and drama since 1865, students will analyze literary, aesthetic, and critical developments.
Prerequisites: English Composition; Introduction to Literature
G32 Visual Communication in the Media
40 hours, 4 credits
This course examines how people understand their world through visual images. Students will examine how people visually gather, process, and interpret information as presented through media sources.
Prerequisite: none

G33 American Religious History
40 hours, 4 credits
A survey of the contribution of religion to American culture, including the differences between rural and urban society, the development of religious freedom and the rise of a "secular religion." Examines the emergence of new forms of belief and practice and the variety of religious issues confronting American society today.
Prerequisite: none

G35 Contemporary World Literature: 1900 to the Present
40 hours, 4 credits
This course explores how authors from around the world have engaged with important themes and historical events throughout the twentieth century. In studying these texts, students will examine the interplay of fiction and history, the varieties of literary style, and the qualities that link as well as distinguish works from different cultures. Students will respond to texts critically in discussions and essays, as well as through research critical evaluations of literary topics, authors, etc.
Prerequisite: English Composition

G34 Gender in Math and Science
40 hours, 4 credits
This course examines the personal and collective educational experiences, career paths, and discoveries of female researchers, teachers, and practitioners in the fields of mathematics and science.
Prerequisite: none

G35 Literature of American Minorities
40 hours, 4 credits
This course introduces students to a variety of texts by American minority authors from the mid-19th century to the present. The central focus of this course will be on literary responses to social marginalization based on race/ethnicity, gender, national origin, sexuality/sexual orientation, ability, and other factors. Students will study the effects of exclusionary and oppressive practices, both historical and present day, on writers' perceptions and literary representations of their times, contexts, and identities. Students will also be introduced to samples of the most common critical-theoretical approaches to the primary texts they will study in this class.
Prerequisite: English Composition

G40 Political Thought
40 hours, 4 credits
The aim of this course is to understand and appreciate some important authors and developments of political thought. The course will cover such topics as authority, consent, freedom, and obligation.
Prerequisite: none

H210 Marketing and Communication in Healthcare
40 hours, 4 credits
This course is an introduction to marketing concepts and how they are applied in the healthcare industry. Topics include consumer buying behavior, business-to-business markets, market research techniques, pricing concepts, marketing channels, and promotional strategies and techniques. This course includes educational resources from Harvard Business Publishing.
Prerequisite: none

H300 Introduction to Healthcare Administration
40 hours, 4 credits
This course provides an exploration of the administrative principles and practices within healthcare organizations. Emphasis is placed on organization, structure, and operation of healthcare facilities. Management principles will be applied to case studies of healthcare industry scenarios.
Prerequisites: US Healthcare Systems; Principles of Management; Introduction to Human Resource Management; Electronic Health Records and Medical Office Procedures

H310 Foundations of Managed Care
40 hours, 4 credits
In this course, students will analyze controversial issues surrounding the managed-care delivery system, focusing on theory and the foundational concepts of managed care.
Prerequisite: Introduction to Healthcare Administration

H320 Financial Management of Health Care Organizations
40 hours, 4 credits
This course focuses on healthcare finances, assets, cost concepts, capital budgeting, and managerial principles of accounting applied in the healthcare environment. Students will discuss the development and management of department budgets, and the common sources of healthcare revenues and expenses.
Prerequisites: Introduction to Healthcare Administration; Financial Accounting II

H350 Quality Improvement in Healthcare
40 hours, 4 credits
This course examines methods for achieving quality improvement in healthcare and the statistical applications of measuring outcomes. There will be an emphasis on performance improvement and the relationship between healthcare quality, organizational performance, and the role of government and accrediting bodies in the healthcare industry. Common methods and trends in quality improvement will be explored.
Prerequisite: Introduction to Healthcare Administration or Introduction to Health Information Management

H340 Regulation and Compliance in Healthcare
40 hours, 4 credits
This course is an exploration of the many entities that regulate healthcare delivery, from local, state, and federal government to the accreditation agencies of healthcare organizations. Issues and methods for compliance with the many laws and regulations are examined. The course provides an overview of the impact of regulatory agencies on the operation of healthcare facilities. Corporate ethics and responsibilities and the operation of healthcare as a business is explored.
This course includes educational resources from Harvard Business Publishing.
Prerequisite: Introduction to Healthcare Administration or Introduction to Health Information Management

H350 Healthcare Statistics
40 hours, 4 credits
Students will discuss and apply the common terms, formulae, and computations used in healthcare statistics through effective data collection, interpretation of information, and the display of data.
Prerequisites: Introduction to Healthcare Administration or Introduction to Health Information Management; College-level Math course

H360 Healthcare Planning and Policy Management
40 hours, 4 credits
This course provides a study of current healthcare-policy issues affecting the U.S. healthcare system and the policies that drive policy and planning of healthcare delivery. The influence of participants outside the healthcare industry and the various levels of government involved in policymaking will be examined. Economic theory, trends, and the future of healthcare will be explored.
Prerequisite: Introduction to Healthcare Administration

H400 Healthcare Information Systems
40 hours, 4 credits
The Healthcare Information Systems course focuses on how healthcare institutions can use technology and information processes and solutions to assist in the diagnosis of diseases and the documentation of patient records and other data. It also addresses the strategies and techniques healthcare business professionals can use to help increase the quality of healthcare services and the efficiency with which the services are delivered.
Prerequisites: Computer Applications and Business Systems Concepts; Introduction to Healthcare Administration

H401 Health Care Operations Management
40 hours, 4 credits
In this course students examine the operations function of managing people, information technology, materials, and facilities in the healthcare industry.
Prerequisites: Principles of Management; Introduction to Healthcare Administration

H402 Advanced Healthcare Law and Ethics
40 hours, 4 credits
This course examines ethical theories and the principles of bioethics. Students will analyze these theories and principles and apply them to ethical problems in the healthcare field. This course includes educational resources from Harvard Business Publishing.
Prerequisite: Health Information Law and Ethics or Electronic Health Records and Office Procedures

H430 Epidemiology
40 hours, 4 credits
In this course, students will compare and contrast foreign healthcare services and systems, focusing on cultural, geographic, environmental, economic and political factors.
Prerequisite: Introduction to Healthcare Administration

H490 Healthcare Management Capstone
30 hours, 3 credits
This online course is designed to allow students to integrate the knowledge and skills gained in the Healthcare Management BS program. Through case analysis, class discussion, and a research project, students will synthesize and demonstrate their understanding of core healthcare management concepts via completion of a Capstone project approved by the instructor. This course includes educational resources from Harvard Business Publishing.
Prerequisite: Students must be enrolled in the Healthcare Management Bachelors Degree program and in their last or second-to-last quarter

H500 Information and Communication Technologies
40 hours, 4 credits
This course is an exploration of the technologies available to manage all aspects of health information and communication, including hardware and software to ensure data collection, storage, analysis and reporting of information. Students will explore the development of networks, including intranet and internet applications to facilitate the electronic health record. Interpretation of the derivation and use of standards to achieve interoperability of healthcare information systems will be explored.
Prerequisite: Program Admission

H505 Health Information Management Systems
40 hours, 4 credits
A study of the various clinical, administrative, and specialty service applications used in healthcare organizations is emphasized. This course applies information systems development concepts and interprets the systems development life cycle. Existing and emerging healthcare information systems applications will also be explored.
Prerequisite: Program Admission
Hi320 Data, Information, and File Structures 60 hours, 4 credits
A lab-based environment to apply knowledge of database architecture and design such as data dictionary, data modeling, and data warehousing to meet organizational needs. Database management systems, data administration, and data definitions will be explored and students will utilize data storage and retrieval techniques such as query tools, data mining, report design, and search engines. Prerequisite: Program Admission

Hi330 Financial Management of Health Information Services 40 hours, 4 credits
An exploration of healthcare finance principles required to manage a health information management department or project. Accounting, cost accounting, budgeting, financial reports, financial management, cost benefit analysis, capitalization, and cost containment techniques are introduced. Prerequisite: Program Admission

Hi340 Project Management 40 hours, 4 credits
An exploration of the application of general principles of project management in the administration of health information services. Students will learn to implement process engineering and project management techniques to ensure efficient work flow and appropriate outcomes. Prerequisite: Program Admission

Hi350 Electronic Health Record Application 70 hours, 4 credits
A lab-based course focusing on the use and application of electronic health records. Projects will be completed to simulate real-world activities that occur in the health information department and healthcare facility that will require critical thinking and problem solving. Prerequisite: Program Admission

Hi360 Reimbursement Methodologies 40 hours, 4 credits
A study on managing the use of clinical data required in prospective payment systems and other reimbursement systems in healthcare. Topics will include compliance strategies and reporting, chargemaster management, casemix management, the audit process, and the National Correct Coding Initiative. Students will explore payment systems such as PPS, DRGs, APCs, RBRVS, and RUGs. Prerequisite: Program Admission

Hi370 Advanced Quality Management in Healthcare 40 hours, 4 credits
This course examines facility wide quality management and continues quality improvement models, processes, methods and tools for healthcare organizations. Emphasis will be on the evaluation of these methods and tools in the demonstration of the effectiveness and outcomes of healthcare and improvement of patient care, quality of services, safety and reduction of risk. Disease management processes, outcomes measurement, benchmarking, patient and organization safety and utilization and resource management will be included. The relationship between healthcare quality, organizational performance, and the role of governing and accrediting bodies in healthcare quality will be studied. The theory of organizational improvement and future trends, including the role of health information management will be explored. Prerequisite: Program Admission

Hi400 Electronic Data Security 40 hours, 4 credits
A study of data protection methods and monitoring including physical, technical, and managerial safeguards. Risk assessment, audit and control programs, contingency planning, and data recovery is included. Internet, web-based, and e-Health security is explored. Students will learn to enforce confidentiality and security measures to protect electronic health information and protect data integrity and validity. Prerequisite: Program Admission

Hi410 Applied Research in Health Information Management 40 hours, 4 credits
Students will complete a research project specific to HIM and will present their research to classmates and instructors using a webinar environment. Data analysis and presentation techniques will be used. Topics explored will be in adherence to Institutional Review Board processes and policies, research design and methods, knowledge-based research techniques, research protocol data management, and national guidelines regarding human subject’s research. Prerequisite: Healthcare Statistics

Hi420 Health Information Management Professional Practice Experience 120 hours, 4 credits
A 120-hour practical experience that focuses on the management of an HIM Department. This field experience will take place in a hospital or medical center setting supervised by an HIM Director or Supervisor. The experience will include operational and managerial experience and an administrative project that will benefit the clinical site. The instructor will work with the student to identify facilities that are available in the student’s area of interest and will establish an agreement with the facility if one does not exist. Prerequisite: Must be completed in the student’s final quarter

Hi430 Strategic Planning and Development 40 hours, 4 credits
An exploration of the principles of developing strategic and operational plans for facility-wide systems and how to assess organization-wide information needs. Students will demonstrate and apply principles of organization behavior to facilitate team building, negotiation and change management. Strategic leadership, entrepreneurialism, and interpersonal skills will be expected. Prerequisites: Program Admission

Hi435 Health Data Management 20 hours, 2 credits
This course addresses the fundamental concepts of managing health records both manually and electronically in today’s healthcare facilities. This course introduces students to the practice of health information management, focusing on the content and structure of patient-identifiable data and information. This covers management issues related to paper-based record systems, including clinical documentation issues, medical word processing as a tool for documentation, forms design, storage and retrieval systems, and chart tracking. Secondary records such as indexes, registers, and registries are covered in this course, along with an exploration of data sources, data capture, healthcare information infrastructure and documentation requirements. In this course, students analyze healthcare data sets, such as the HEDIS, UHDDS, OASIS including the history, purpose, and uses of each. Prerequisite: Program Admission

Hi450 Health Information Management Alternative Facility Professional Practice Experience 30 hours, 1 Credit
This course is a 30-hour practical experience that focuses on a non-hospital environment of the student’s choice. This experience is designed to assist students in exploring the diversity of the health information profession. The experience will include health information-related shadowing, observation, and/or performance of tasks and must be approved by the instructor. The instructor will work with the student to identify facilities that are available in the student’s area of interest and will establish an agreement with the facility if one does not exist. Prerequisite: Must be completed in the student’s final quarter

Hi460 Advanced Health Information Law and Ethics 40 hours, 4 credits
This course presents an advanced analysis of the impact of the United States legal system and various health care laws, regulations, and standards on the healthcare organization, patient and health information management environment and infrastructure. Patient privacy, confidentiality, security principles, identify management, protected health information, access and disclosure of personal health information including e-discovery, legal health records, legal health records, compliance programs, information security and privacy training programs will be studied. Professional responsibility, ethical practices and issues as well as bioethical issues and their impact on the legal health record will be explored. Prerequisite: Program Admission

Hi500 Introduction to Human Services 40 hours, 4 credits
This course covers an overview of human services work toward the empowerment of members within a community, while appreciating diversity and understanding human behavior. Students will examine how the setting or environment is as important as the individual in it. Prerequisite: General Psychology

Hi520 Community Psychology 40 hours, 4 credits
In this course students will understand the applied discipline of social psychology. In order to understand the social interaction of functioning humans in their communities and with individuals, theories of socialization and self image will be explored. Students will examine how the social environment influences thought, behavior, feelings, and potential actions of people. Consequences of social interaction and motivation based on judgment, attitudes, persuasion, conformity, and aggression will be explored. Different social interactions will be analyzed including conformity, productivity, and leadership. Prerequisite: General Psychology

Hi570 Social Psychology 40 hours, 4 credits
In this course students will understand the applied discipline of abnormal psychology. In order to understand and change abnormal patterns of functioning humans in their communities, thoughts and behavior will be examined. Students will explore what is abnormal behavior and what is not in current society and cultures. Numerous applications will be examined, including a variety of mental health disorders, individuals who have difficulty functioning effectively in everyday life, the impact of family dysfunction on the individual, and the influence of mental illness on criminal behavior. Variables that may affect a person’s ability to adapt and function in a community will be considered, such as one’s genetic makeup, physical condition, learning, reasoning, and socialization. Prerequisite: General Psychology

Hi580 Abnormal Psychology 40 hours, 4 credits
In this course students will understand the applied discipline of abnormal psychology. In order to understand and change abnormal patterns of functioning humans in their communities, thoughts and behavior will be examined. Students will explore what is abnormal behavior and what is not in current society and cultures. Numerous applications will be examined, including a variety of mental health disorders, individuals who have difficulty functioning effectively in everyday life, the impact of family dysfunction on the individual, and the influence of mental illness on criminal behavior. Variables that may affect a person’s ability to adapt and function in a community will be considered, such as one’s genetic makeup, physical condition, learning, reasoning, and socialization. Prerequisite: General Psychology

Hi590 Organization and Leadership in Human Services 40 hours, 4 credits
Working and managing within a human services organization takes high morals, standards, and ethics. Through this course, students will consider the complexity of moral and ethical dilemmas in navigating and managing in the human service industry. Students will learn decision-making techniques to include the necessary components for an ethical reasoning process. In order to have a strong foundation of practice, students will learn how to build a strong ethical organization through culture, climate, and structure. Prerequisites: Case Management: Strategies for Rehabilitation; Counseling Clients

Hi560 Community Psychology 40 hours, 4 credits
Community Psychology focuses on the four systems which function in a community: the mental health system, the educational system, the criminal justice system, and the social service system. As human service professionals, students will analyze problems related to mental illness and will evaluate individuals functioning in these systems, offering both answers and proactive models for prevention. Community psychology works toward the empowerment of members within a community, while appreciating diversity and understanding human behavior. Students will examine how the setting or environment is as important as the individual in it. Prerequisite: General Psychology

Hi570 Social Psychology 40 hours, 4 credits
In this course students will understand the applied discipline of social psychology. In order to understand the social interaction of functioning humans in their communities and with individuals, theories of socialization and self image will be explored. Students will examine how the social environment influences thought, behavior, feelings, and potential actions of people. Consequences of social interaction and motivation based on judgment, attitudes, persuasion, conformity, and aggression will be explored. Different social interactions will be analyzed including conformity, productivity, and leadership. Prerequisite: General Psychology

Hi580 Abnormal Psychology 40 hours, 4 credits
In this course students will understand the applied discipline of abnormal psychology. In order to understand and change abnormal patterns of functioning humans in their communities, thoughts and behavior will be examined. Students will explore what is abnormal behavior and what is not in current society and cultures. Numerous applications will be examined, including a variety of mental health disorders, individuals who have difficulty functioning effectively in everyday life, the impact of family dysfunction on the individual, and the influence of mental illness on criminal behavior. Variables that may affect a person’s ability to adapt and function in a community will be considered, such as one’s genetic makeup, physical condition, learning, reasoning, and socialization. Prerequisite: General Psychology

Hi590 Organization and Leadership in Human Services 40 hours, 4 credits
Working and managing within a human services organization takes high morals, standards, and ethics. Through this course, students will consider the complexity of moral and ethical dilemmas in navigating and managing in the human service industry. Students will learn decision-making techniques to include the necessary components for an ethical reasoning process. In order to have a strong foundation of practice, students will learn how to build a strong ethical organization through culture, climate, and structure. Prerequisites: Case Management: Strategies for Rehabilitation; Counseling Clients

Hi560 Community Psychology 40 hours, 4 credits
Community Psychology focuses on the four systems which function in a community: the mental health system, the educational system, the criminal justice system, and the social service system. As human service professionals, students will analyze problems related to mental illness and will evaluate individuals functioning in these systems, offering both answers and proactive models for prevention. Community psychology works toward the empowerment of members within a community, while appreciating diversity and understanding human behavior. Students will examine how the setting or environment is as important as the individual in it. Prerequisite: General Psychology
**Course Descriptions**

**HS294 Internship for Human Services** 250 hours, 4 credits
Field experience is a key learning experience in a human services delivery organization. It is a process of experiential learning that integrates and applies knowledge, theory, skills, and professional behaviors that are concurrently being taught within the classroom. It is an integral part of the total educational process. Prerequisite: Students must be in their last or second-to-last quarter before graduation.
Co-requisite: Sophomore Seminar

**HS295 Human Services Capstone** 50 hours, 5 credits
This course will provide students with an opportunity to integrate learning, skills, and knowledge from the Human Services program in the form of a Capstone Project. Contemporary issues and future trends will also be analyzed.
Prerequisite: Students must be in their last or second-to-last quarter.
Co-requisite: Sophomore Seminar

**HUN 2202 Human Nutrition** 40 hours, 4 credits
This course introduces the student to principles of nutrition and the role of nutrition in health and disease, and common alterations in health throughout the life cycle. An introduction to clinical nutrition is included to prepare the student to apply these principles to the individual, family, community, and clinical areas.
Prerequisite: none

**J100 Introduction to Criminal Justice** 40 hours, 4 credits
An introductory course designed to provide students with a general foundation of knowledge in the criminal justice field. Course participants will explore the different parts of the criminal justice system, their interrelationships, and the role of each in the criminal justice process. Students will examine the historical basis for the contemporary American legal system, policing styles and the evolution of crime prevention, the structure of the judicial system and its professional participants from pre-sentencing through post-conviction, corrections strategies for criminal offenders, and special considerations for juveniles in the criminal justice system.
Prerequisite: none

**J106 Criminology: Motives for Criminal Deviance** 40 hours, 4 credits
This course examines the social and behavioral issues involved in the study of crime as a social phenomenon. Included is an exploration of what crime is, what causes crime, and the various techniques for measuring the amount and characteristics of crime and criminals.
Prerequisite: none

**J115 Introduction to Corrections** 40 hours, 4 credits
A general overview of U.S. corrections, jails and prisons, institutional procedures and recent innovations in offender treatment. Students are introduced to correctional philosophies, practices and procedures. The concepts of retribution and rehabilitation are examined. For residential only, this course includes a fieldwork assignment.
Prerequisite: Introduction to Criminal Justice

**J120 Policing in America** 40 hours, 4 credits
Students will examine the theoretical underpinnings of police work in the United States, including its historical roots, its current status, and the trends that will shape its future. They will explore such topics as police and community relations; policing citizens, patrol officers, administrators, and agencies. They will also cover contemporary practices such as Community Oriented Policing, Problem Oriented Policing, and Directed Patrol. In investigating these topics, student will develop skills in critical thinking and problem solving. For residential only, this course includes a fieldwork assignment.
Prerequisite: Introduction to Criminal Justice
J270 Critical Thinking and Evidence-Based Practices in Criminal Justice
40 hours, 4 credits
This course is designed to focus on a wide variety of problem solving skills. These include scenario based problem solving and evidence based practices. The inter-related skills necessary for effective problem solving in a criminal justice context are emphasized. The development of evidence based practices will be explored and the incorporation of such practices in the field of criminal justice will be analyzed.
Prerequisites: Policing in America; Applied Criminal Procedures; Introduction to Corrections

J280 Contemporary Issues in Criminal Justice
Capstone
40 hours, 4 credits
The capstone class examines the future of the criminal justice system. The current cutting edge technology in different fields within the criminal justice system is examined. They will examine valuable insights from accomplished scholars of what the near future holds. Methods and philosophies that will govern the criminal justice field in the near future are introduced along with discussions of the ethical, legal, social, and political ramifications expected. This course includes ten hours of field experience.
Prerequisite: Introduction to Criminal Justice. Students must be enrolled in the Criminal Justice program and in their last or second to last quarter
Co-requisite: Junior Seminar

J305 Examination of Forensic Science
40 hours, 4 credits
Students will critically examine the role of forensic science in the criminal justice process and the court of law. They will review historical events in criministics, and analyze proficiency in forensic science in order to formulate recommendations for change. They will also explore best practices and the future of forensic science.
Prerequisite: Constitutional Law

J320 Criminal Investigations
40 hours, 4 credits
Students will learn to conduct full criminal investigations. They will gain knowledge of investigative techniques, methods, and processes for interviewing and interrogating crime suspects and witnesses. They will also explore techniques for conducting investigations with special populations.
Prerequisite: Constitutional Law

J325 Criminal Evidence
40 hours, 4 credits
This course will familiarize students with the fundamentals of criminal evidence as it pertains to the legal presentation of evidence in criminal trials, and with the role of legal counsel. Constitutional issues involving evidence are examined. Different varieties of evidence, from hearsay to physical evidence, are examined. Trial procedures such as expert-witness testimony, police testimony, and testimonial privileges are analyzed.
Prerequisite: Criminal Law and Procedures: Crime and the Courtroom

J326 Criminal Behavior: Profiling Violent Offenders
40 hours, 4 credits
This course will examine serial behavior by crime type and criminal profile. Crimes such as stalking, arson, murder, and sexual assault will be examined through case files to enhance investigative methods. Students will analyze psychological profiles and behavior patterns.
Prerequisite: Criminology: Motives for Criminal Deviance

J330 Organized Criminal Syndicates
40 hours, 4 credits
This course examines organized criminal activity in the 21st century, from street gangs to terrorist organizations. Students will examine the cause of organized crime, in addition to the investigation, prosecution, and sentencing of syndicates.
Prerequisites: Criminology: Motives for Criminal Deviance; Juvenile Justice; Delinquency, Dependency, and Diversion

J331 Constitutional Law
40 hours, 4 credits
This course challenges students to examine the concepts of the Bill of Rights and the application of those rights to the criminal justice system. The analysis of case studies will allow students to apply criminal law and procedure to fieldwork examination of criminal-justice issues.
Prerequisite: Criminal Law and Procedures: Crime and the Courtroom

J332 Homeland Security Policy
40 hours, 4 credits
Students will receive an overview of homeland security policy at the federal, state, and local levels. They will examine four key security components: risk education; public warning; and public actions. They will also explore the coordination of structure and policy across national and homeland security disciplines, including law enforcement, public education, medical, public health, emergency management (including FEMA), information operations, defense, diplomacy, commerce, transportation, and intelligence.
Prerequisite: Terrorism

J335 Risk Analysis
40 hours, 4 credits
Students will examine the importance of risk management through analysis and evaluation as a means of ensuring the protection of communities, facilities, and personnel. They will gain an understanding of the identification and assessment of hazards, vulnerabilities, and risks, which is critical to comprehensive management of security operations. They will learn skills to aid in planning for natural or man-made disaster recovery, and for crisis management.
Prerequisites: Introduction to Homeland Security; Security Challenges

J340 Women and Criminal Justice
40 hours, 4 credits
This course examines the role of women as offenders, victims, and professionals in criminal justice. Theories and research that have differentiated women in the criminal-justice system will be explored. The rise of female criminality and criminal-justice professionals will be examined and will be analyzed.
Prerequisite: Domestic Violence

J345 Diversion and Rehabilitation
40 hours, 4 credits
Students will examine counseling and intervention methods used for adult and juvenile, and male and female offenders. They will explore theories proven by research and applied to treatment. They will critically evaluate evidence-based policy, best practices, program evaluations, and “what works” in both social service and criminal justice systems.
Prerequisites: Juvenile Justice: Delinquency, Dependency, and Diversion; Domestic Violence

J350 Cultural Diversity and Justice
40 hours, 4 credits
This course will examine the true picture and statistics of minority representation at any point in the criminal justice process, from point of contact with the police to incarceration and the death penalty. The course includes a comprehensive examination of unbiased racial and ethnic theories, and research and practice of behavior and victimization affecting the criminal justice system.
Prerequisite: Ethics Around the Globe

J352 Victims in Criminal Justice
40 hours, 4 credits
This course explores the importance of the victim in the criminal-justice system’s process. The victim’s role in the criminal-justice process, and movements and legislation regarding victims’ impact on judicial proceedings are examined. A variety of crimes and types of victims is explored.
Prerequisite: none

J355 Realities of Crime and Justice
40 hours, 4 credits
In this course, students will analyze and critique media portrayals of crime and justice. Public perceptions of crime and realities of crime are evaluated. The mass media and “spectacular” cases are used to exemplify the media’s influence on crime and justice.
Prerequisites: Ethics Around the Globe

J360 Statistics in Criminal Justice
40 hours, 4 credits
Students will learn to interpret research data on issues in criminal justice. They will explore fundamentals of statistical analysis through statistical tools typically used in criminal justice. They will apply statistical analysis to UCR and NCVS data sets.
Prerequisite: College-level Math course

J365 Research Methods in Criminal Justice
40 hours, 4 credits
This course will explore the basic steps of conducting research. Students will explore the nature of research and the research techniques specific to the criminal-justice field. Students will become familiar with research terminology and the ethics involved in various research designs. To complete the course, students will design and simulate their own research project.
Prerequisite: Statistics in Criminal Justice

J405 Emergency Management
40 hours, 4 credits
This course will examine the role of private and public managers in planning for response to natural or man-made emergencies. Response plans will be detailed and developed with the essential elements and participants. Types of hazards and risks of all involved with managing the response and the public will be explored.
Prerequisites: Introduction to Homeland Security; Security Challenges

J410 Criminal Justice Leadership and Management
40 hours, 4 credits
This course will familiarize students with common management theory and practice in criminal-justice organizations. The application of management techniques to all areas of criminal justice will be explored, along with leadership and administration techniques and issues particular to criminal justice. Organizational philosophy, visioning, planning, and goal development will be examined.
Prerequisite: Ethics Around the Globe

J415 Crime Prevention
40 hours, 4 credits
This course will explore the goals and types of various crime-prevention strategies. Physical environments and crime, neighborhood crime prevention, the media, and crime displacement will be explored. The course will examine persons and conditions associated with high rates of deviance.
Prerequisites: Introduction to Corrections; Policing in America; Research Methods in Criminal Justice

J420 Crimes Across Borders
40 hours, 4 credits
This course will explore the global economy of crime. Various types of transnational crime, and the investigation and prosecution of global crimes, are examined. Current issues in global crime will be examined via rotating articles, books, and other publications.
Prerequisites: Introduction to Criminal Justice; Research Methods in Criminal Justice

J425 Community Corrections
40 hours, 4 credits
This course will examine the role and function of corrections supervisors in the field. The practical considerations of managing offenders in the community will be examined. Case studies on probation and parole will be explored.
Prerequisites: Criminal Behavior: Profiling Violent Offenders; Introduction to Corrections

J430 Forensic Psychology
40 hours, 4 credits
This course will examine the role and function of psychology as it applies to the criminal justice system. Students will examine the responsibilities and tasks of forensic psychologists when working with law enforcement, courts, and corrections. A psychological approach to person-to-person crimes will be explored.
Prerequisites: Criminal Behavior: Profiling Violent Offenders; General Psychology

J435 Special Populations in Criminal Justice
40 hours, 4 credits
Students will examine the special populations of offenders in the criminal justice system. The experiences of women, minorities, the physically and mentally challenged, the elderly, and the socioeconomically deprived in all parts of the criminal justice system will be explored. Students will analyze research designs, and case studies relating to special populations.
Prerequisite: Criminal Behavior: Profiling Violent Offenders

J440 Special Offenders: Sex Offenders
40 hours, 4 credits
This course will examine the causes of sexual offenses and treatment of offenders. Laws and policy pertaining to sex offenders will be analyzed. Research on sex offenders, including recidivism, treatment, and re-entry into the community, will be examined.
Prerequisite: Introduction to Criminal Justice

J445 Special Offenders: Serial Killers
40 hours, 4 credits
Students will explore issues and controversies involved in serial killer cases or mass murder investigations. They will cover topics including maintaining justice, victim’s rights, interrogation techniques, media coverage of crimes, and grief.
Prerequisites: Criminology: Motives for Criminal Deviance; Criminal Behavior: Profiling Violent Offenders

J453 Criminal Justice Seminar
50 hours, 5 credits
This course provides students with the opportunity to explore an area of criminal justice that is of specific interest for their career or an area of relevant interest in the field. Topics may include any area of justice studies, with the approval of the instructor. Students will conduct a thorough review of their topic and present their work in the form of a final project.
Prerequisites: Statistics in Criminal Justice; Research Methods in Criminal Justice
LE210 Traffic Enforcement: Managing Traffic Violators 40 hours, 3 credits
Students will learn the skills for legal, effective, and safe traffic enforcement on city streets and major thoroughfares. They will examine implications of traffic codes and relevant court decisions through practical application. They will explore criminal and drug interdiction strategies through effective traffic enforcement, and special considerations in impaired driver enforcement. They will learn to operate enforcement tools such as speed detection devices and alcohol sensory equipment. Students will examine the writing and articulation of enforcement decisions, and potential court outcomes of enforcement actions.
Prerequisites: Ethics Around the Globe; Practical Psychology for Law Enforcement or enrolled in Certificate

LE219 Firearms I: Fundamentals of Armed Police Response 40 hours, 2 credits
Students will learn the fundamental principles of marksmanship for firearms competency, and will progress to police-specific skills needed for proficiency in firearms use. They will practice the care and maintenance of firearms.
Prerequisites: Ethics Around the Globe; Practical Psychology for Law Enforcement or enrolled in Certificate

LE220 Firearms II: Tactics for Combat Gunfighting 40 hours, 2 credits
Students will build upon fundamental principles of marksmanship to gain firearms skills unique to law enforcement and officer survival. They will examine considerations related to use of force and deadly force, focusing on decision-making in force levels and articulation of force decisions. They will implement tactical considerations throughout training, including combat firearms skills and mental preparation for use of deadly force. Students will experience scenario-based and simulation training to help them synthesize shooting skills with proper use-of-force decisions in real-time situations.
Prerequisites: Firearms I: Fundamentals of Armed Police Response

LE227 Use of Force I: From Empty Hands to TASERS 40 hours, 2 credits
Students will learn fundamental fighting principles, including technical and psychological aspects of physical combat. They will use tactical positional training, command presence, verbalization skills, and interpretation of body language in confrontational situations. Compliance and control techniques will be taught, ranging from empty-hand techniques, ground defense, and weapon retention to application of common police officer tools such as hand cuffs, chemicals, batons, and electronic control devices. They will explore concepts of psychological fitness and mental survival.
Prerequisites: Ethics Around the Globe; Practical Psychology for Law Enforcement or enrolled in Certificate

LE228 Use of Force II: Winning Violent Confrontations 40 hours, 2 credits
Students will build on fundamental police defensive tactics to synthesize physical knowledge with use-of-force decision-making. They will learn decision-making skills in ambiguous use-of-force incidents, demonstrating their ability to assess situations, respond appropriately, apply reasonable force, and articulate their reasoning. They will use<br>practical application exercises and scenario-based training to maximize training effects.
Prerequisites: Use of Force I: From Empty Hands to TASERS

LE233 Crime Scene Response: The Real CSI 60 hours, 3 credits
Students will examine the investigation processes for crime scenes and crashes. They will explore issues of scene security, evidence collection, handling, and processing, and documentation. They will learn crime scene processing, and review basic investigation and reporting forms and the reporting requirements established by statute and policy.
Prerequisites: Ethics Around the Globe; Practical Psychology for Law Enforcement or enrolled in Certificate

LE240 Minnesota Traffic Code 20 hours, 2 credits
Students will explore motor vehicle laws and statutes related to traffic enforcement in Minnesota. They will examine rules pertaining to driving, equipment, motor vehicle insurance, and driver licensing. They will identify unique circumstances and vehicles in traffic law, including commercial motor vehicles, implements of husbandry, boats, and all-terrain vehicles. Students will also review alcohol and drugs impairments to driving, and enforcement of related laws.
Prerequisites: Introduction to Criminal Justice or enrolled in Certificate

LE245 Minnesota Criminal Code 20 hours, 2 credits
Students will examine Minnesota criminal code and related statutes to gain a thorough understanding of peace officer responsibilities under Minnesota law. They will review specific Minnesota crimes and their elements, levels of offense, and the proper handling of suspects involved in various crimes. Charging, defenses, and sentencing will also be explored.
Prerequisites: Introduction to Criminal Justice or enrolled in Certificate

LE284 Patrol Practicals: Hands-On in Progress 80 hours, 4 credits
Students will synthesize learning from all areas of training. They will respond to realistic calls for service, and apply their knowledge of law enforcement to achieve resolution of a variety of common policing scenarios. They will discuss fire, arson, and explosives response. They will learn principles of good judgment and decision-making, and will articulate their enforcement choices and the potential legal implications of each. Students will also learn fundamental driving principles for routine and high-speed pursuit driving, and will apply these principles in laboratory exercises. They will discuss the legal and policy aspects of police pursuits and effective call response.
Prerequisites: Use of Force I: From Empty Hands to TASERS; Firearms I: Fundamentals of Armed Police Response; Traffic Enforcement; Managing Traffic Violators; Crime Scene Response: The Real CSI or enrolled in Certificate

LE290 Law Enforcement Capstone 20 hours, 2 credits
Students will examine the future of law enforcement by reviewing the topical areas of law enforcement required for success in the profession. They will discuss current employment opportunities, certification requirements, and application and hiring processes. They will review specialty areas for successful certification and licensure, and maximize the potential physical, legal, social, and political ramifications for the future.
Prerequisites: Students must be enrolled in the Law Enforcement program and in their last or second-to-last quarter

M100 Customer Service in Healthcare 10 hours, 1 credit
This will prepare students to deliver outstanding customer service in a healthcare setting by understanding the factors that influence the perceptions of external and internal customers. Topics covered in this course include: the psychology of patients, customer service in a diverse world, listening skills and effective communication techniques.
Prerequisite: none

M105 Introduction to Electronic Health Records 20 hours, 3 credits
In this course, students will focus on the basics of Electronic Health Record (EHR) keeping of patient health information in a medical care delivery setting. An emphasis on emerging technologies in EHR, and their potential application in evidence-based practice will be studied. The scope of the course is designed to familiarize students with the clinical patient encounter, as well as electronically supporting other care-related, and outcomes reporting.
Prerequisites: none

M120 Medical Terminology 40 hours, 4 credits
This is a basic medical vocabulary-building course. An emphasis will be placed on the most common medical terms based on prefixes and suffixes, Latin and Greek origins, and anatomic roots denoting body structures. All body systems will be covered with a focus on word parts, terms built from word parts, abbreviations, and basic disease and surgical terms. Students will be expected to focus on spelling and pronunciation.
Prerequisites: none

M121 Anatomy and Pharmacology for Coders
This course provides an in-depth exploration of human anatomy and physiology as well as pharmacology to prepare students for coding. This course also provides a systematic approach to hospital inpatient and ambulatory care coding, emphasizing specific and correct coding procedures and techniques. Topics covered include: study of human cells and tissues; the integumentary, musculoskeletal, nervous, respiratory, genitourinary, circulatory, digestive, reproductive, sensory, cardiovascular, lymphatic, immune, and endocrine systems of the body; most commonly prescribed drugs; and potential adverse interactions. The student will learn how to abstract key information from the health record to assist in improving physician documentation and to ensure all valid and accurate coding. Students will complete laboratory exercises coordinated with course content.
Prerequisites: Structure and Function of the Human Body; Medical Terminology

M130 Medical Writing, Style and Grammar 30 hours, 3 credits
A focused look at English grammar, punctuation and sentence structure that will lend to accurate and appropriate medical documents being transcription or edited. Common English language needs in medical transcription are explored, as well as correct use of number formatting, capitalization and abbreviations. All these words will be studied and practiced and a medical terminology review will be mandatory.
Prerequisite: none

M131 ICD-CM Coding 40 hours, 4 credits
This course provides in-depth study of the International Classification of Diseases-Clinical Modification (ICD-CM) using sample exercises and laboratory records. The student will learn the facts and accuracy in assigning codes in various health care settings. Students will apply ICD-CM coding guidelines appropriate to the coding situation and will cover diagnostic coding of all body systems. Use of coding and grouper software will be introduced as well as the use of registries and indices.
Prerequisites: Anatomy and Pharmacology for Coders; Pathophysiology

M132 ICD-PCS Coding 40 hours, 4 credits
This course provides in-depth study of the International Classification of Diseases-Procedure Coding System (ICD-PCS) using sample exercises and health records to develop skill and accuracy in assigning codes in various health care settings. Students will apply ICD-PCS coding guidelines appropriate to the coding situation and will cover procedural coding of all body systems. Use of coding and grouper software will be used as well as the use of registries and indices.
Prerequisite: ICD-CM Coding

M133 ICD Coding 30 hours, 3 credits
This course provides a thorough overview of the International Classification of Diseases (ICD) using sample exercises and medical records to develop skill and accuracy in assigning codes in various health care settings. Students will apply ICD-9-CM coding guidelines appropriate to the coding situation and will cover coding of all body systems.
Prerequisite: Medical Terminology
Prerequisite or Co-requisite: Pathophysiology
M140 Basic ICD-9-CM Coding
40 hours, 4 credits
This course provides in-depth study of the International Classification of Diseases (ICD-9-CM) using sample exercises and medical records to develop skill and accuracy in coding in various healthcare settings. Students will apply ICD-9-CM coding guidelines appropriate to the coding setting and will cover coding of all body systems. Prerequisite: Medical Terminology
Pre or Co-requisite: Pathophysiology

M140A Intermediate ICD-9-CM Coding
40 hours, 3 credits
This course is a continuation of Basic ICD-9-CM with developmental practice to increase proficiency in coding with ICD-9-CM using patient records. Students will apply official coding guidelines and knowledge of commonly accepted payment methodologies to medical record coding. Use of coding and grouper software will be introduced as well as the use of registries and indices. Prerequisite: Basic ICD-9-CM Coding

M141 Ambulatory Care Coding
40 hours, 4 credits
The emphasis in this course is medical coding in an ambulatory care setting. Students will develop an understanding of HCPCS coding with an emphasis on current procedural terminology (CPT) coding. Prerequisite: ICD-PCS Coding or ICD Coding

M201 Medical Transcription I
80 hours, 4 credits
The student will transcribe medical reports of medical specialties from CD-ROM, edit medical reports generated by speech recognition from various specialties, and apply knowledge of medical terminology, anatomy, and physiology to the transcription and editing process. Emphasis is on correct use of medical terminology and accurate spelling of medical terms, as well as proper report format. Prerequisites: Medical Writing, Style and Grammar; Introduction to Medical Transcription; Medical Terminology; Keyboarding I

M202 Introduction to Medical Transcription
40 hours, 4 credits
An introduction to the profession of medical transcription and medical editing. Topics covered will be the medical transcription process and the skills needed as well as technology and equipment used, work scenarios and work stations, employer expectations, salary methods, the job search, and professional associations. The student will explore the lifecycle of the patient record and how electronic health records impact the profession. Speech recognition and other technology will be presented along with resources that a medical transcriptionist will need to use on the job. Prerequisite: Medical Terminology
Pre or Co-requisite: Medical Writing, Style and Grammar

M208 Introduction to Health Information Management
40 hours, 4 credits
This course introduces the student to the history of the profession of the health information technician and the management of health information. Students learn about the organization of healthcare facilities, the members of the healthcare team who contribute to and use health information, and trends in the management of healthcare records. Students will learn about the format and content of medical records, and develop a beginning knowledge of the organization and storage of health information. Prerequisite: none

M209 Medical Insurance and Billing
40 hours, 3 credits
In this course students will receive an introduction to common 3rd party payers, insurance terminology, and medical billing. They will learn skills including claim forms preparation and processing, and electronic claim submission, and will review introductory medical coding. They will discuss basic terminology requirements, state and federal regulations, and abstracting of source documents. Prerequisite: Medical Terminology

M211 Quality Analysis and Management
40 hours, 4 credits
This course covers quality improvement methodologies used in acute and long-term care, and the quality issues of health information services. This course includes data collection and compilation of healthcare statistics. Prerequisites: Introduction to Health Information Management; Computer Applications and Business Systems Concepts

M214 Medical Transcription
60 hours, 3 credits
The student will transcribe medical reports of medical specialties from CD-ROM, edit medical reports generated by speech recognition from various specialties, and apply knowledge of medical terminology, anatomy, and physiology to the transcription and editing process. Emphasis is on correct use of medical terminology and accurate spelling of medical terms, as well as proper report format. Prerequisites: Medical Terminology; Keyboarding; Medical Transcription; Medical Terminology; Keyboarding I

M218 Management of Health Information Services
40 hours, 4 credits
This study of management, supervision, and human resource principles with application to health information service departments in various healthcare settings. Students will learn how to measure and manage productivity of HIM staff and explore the HIM management role in relation to other hospital departments. Prerequisite: Medical Terminology
Pre or Co-requisite: Medical Transcription

M220 Healthcare Information Technologies
40 hours, 4 credits
A study of the United States legal system and various healthcare regulations and ethics on the health information management environment. Fraud and abuse, patient privacy and confidentiality, protected health information, release of information, and professional practice law and ethics will be explored. Prerequisite: none

M230 Medical Law and Ethics
30 hours, 1 credit
This course will cover legal issues and ethical problems in the healthcare field with emphasis on current issues. Prerequisites: Medical Terminology

M232 Pharmacology
30 hours, 1 credit
This course will cover pharmacological principles and their application to the patient care setting. Prerequisites: Medical Terminology; Pathophysiology

M243 Health Information Law and Ethics
40 hours, 4 credits
A study of the impact of the United States legal system and various healthcare regulations and ethics on the health information management environment. Fraud and abuse, patient privacy and confidentiality, protected health information, release of information, and professional practice law and ethics will be explored. Prerequisite: none

M250 ICD-10 Coding Practical
30 hours, 1 credit
This course offers a simulated practical experience utilizing medical records and coding software in an online setting under the direction of a Coding instructor. Prerequisite: Medical Transcription

M251 Medical Coding Practical
30 hours, 1 credit
This course offers a simulated practical experience utilizing medical records and coding software in an online setting under the direction of a Coding instructor. Prerequisite: Medical Transcription

M252 Medical Assisting
30 hours, 2 credits
This course is designed to provide students with a thorough understanding of the Medical Assisting profession and the skills necessary to be successful both in the Medical Assisting program and profession. During this course, students will complete a Preparatory Orientation and be exposed to basic Medical Assisting skills such as professionalism, vital signs and CPR/ First Aid. This course must be completed during the first full quarter of enrollment. Prerequisite: none

MA101 Clinical Skills I
60 hours, 4 credits
In this course, students will begin their study of the essential and basic core of front-office and back-office medical-assisting skills. They will learn the basics of the medical-assisting profession, and will master skills including communication and technology, patient centered care, safety and emergency plans, patient assessments and encounters, medical documentation, medication administration, asepsis and infection control, vital signs, and diagnostic procedures. They will follow applied-learning approaches to all skill development and performance objectives. Prerequisite: Medical Terminology
Pre or Co-requisite: Introduction to Medical Assisting; Structure and Function of the Human Body

MA135 Pharmacology for the Allied Health Professional
40 hours, 4 credits
This course is designed for a variety of allied health programs requiring an understanding of pharmacology. It attempts to present a basic rationale for understanding current drug therapy. This course presents drugs according to their therapeutic applications. Pertinent physiology and related diseases are reviewed before the pharmacology of the drug is presented. The approach by body system in this course serves to provide the necessary background information and to refresh the student's previously learned material through which the therapeutic action of the drugs can be clearly understood. Prerequisites: Medical Terminology; Human Anatomy and Physiology I, or Structure and Function of the Human Body

MA145 Clinical Skills II
60 hours, 4 credits
Students will continue their study of the essential and basic core of back-office medical-assisting skills. They will master knowledge and skills including patient examination and assessment, performing electrocardiography, performing venipuncture, performing medication administration, minor surgical procedures, procedures for medical emergencies, first aid and CPR, and behaviors influencing their health. They will also learn basic steps for finding employment and advancing in their careers. Students will follow applied-learning approaches to all skill development and performance objectives. Prerequisite: Laboratory Skills for Medical Assisting; Pathophysiology
In this course students will study medical laboratory procedures and techniques that are significant to medical and laboratory assistants and other healthcare professionals. They will learn about laboratory equipment and safety, and issues of patient confidentiality. They will learn to collect specimen samples by venipuncture and patient instruction and perform laboratory procedures including urinalysis and hematology, chemistry, immunology, and microbiology testing.

Prerequisite: Clinical Skills I

MA225 Radiography Skills
40 hours, 3 credits
A comprehensive study for limited scope of practice in radiography. Skills and processes covered will be: radiation protection, equipment operation and quality control, image production and evaluation, and patient care and education, along with radiographic procedure modules that will cover each anatomic region. The course is designed to prepare students for the examination for Limited Scope of Practice in Radiography and possible employment as an X-ray operator.

Prerequisite: Structure and Function of the Human Body

MA250 Medical Assisting Internship
240 hours, 8 credits
In conjunction with a Medical Assisting Capstone course, students will complete 240 hours of a Medical Assisting training experience in a physician's office/clinic or medical center. While on the clinical site, the extern will perform medical-assisting job duties in both the front-office administrative and the back-office clinical areas, in order to develop on-the-job learning skills. Under no circumstances will the student extern receive pay for the externship hours worked.

Prerequisites: Completed series of Hepatitis B immunizations; Completion of a 2-Step Mantoux screening test within 6 months of starting externship; Completion of all immunizations or verifications of immunity required by program and site; Successful completion of background check (clear background check obtained); Attendance at Rasmussen College Externship meeting held by Program Coordinator; Attendance at externship site orientation (if required by site); Successful completion of all Medical Assisting core courses except Career Development and Seminar courses; Approval of Medical Assisting Program Coordinator

MA278 Human Anatomy and Physiology I
60 hours, 5 credits
MA278 Lecture (40 hours, 4 credits) MA278 Lab (20 hours, 1 credit)
In this course students will begin their study of the structure and function of the human body. They will examine topics including basic anatomy and physiology, cellular and molecular biology, and disease processes.

Prerequisites: Human Anatomy and Physiology I

MA281 Medical Assisting Clinical Externship
240 hours, 8 credits
In conjunction with a Medical Assisting Capstone course, students will complete 240 hours of a Medical Assisting training experience in a physician's office/clinic or medical center. While on the clinical site, the extern will perform medical-assisting job duties in both the front-office administrative and the back-office clinical areas, in order to develop on-the-job learning skills. Under no circumstances will the student extern receive pay for the externship hours worked.

Prerequisites: Completed series of Hepatitis B immunizations; Completion of a 2-Step Mantoux screening test within 6 months of starting externship; Completion of all immunizations or verifications of immunity required by program and site; Successful completion of background check (clear background check obtained); Attendance at Rasmussen College Externship meeting held by Program Coordinator; Attendance at externship site orientation (if required by site); Successful completion of all Medical Assisting core courses except Career Development and Seminar courses; Approval of Medical Assisting Program Coordinator

MA297 Human Anatomy and Physiology II
60 hours, 5 credits
MA297 Lecture (40 hours, 4 credits) MA297L Lab (20 hours, 1 credit)
In this course, students will continue their study of human anatomy and physiology begun in Human Anatomy and Physiology I. They will examine the circulatory, lymphatic and immune, respiratory, brain, digestive, and endocrine systems, as well as fluid and electrolyte balance, acid-base balance, and nutrition and metabolism. Students will complete laboratory exercises coordinated with course content and including microscopic observation, experimentation, study of anatomical models, and dissection activities.

Prerequisite: Human Anatomy and Physiology I

MA281 Medical Assisting Clinical Externship
240 hours, 8 credits
In conjunction with a Medical Assisting Capstone course, students will complete 240 hours of a Medical Assisting training experience in a physician's office/clinic or medical center. While on the clinical site, the extern will perform medical-assisting job duties in both the front-office administrative and the back-office clinical areas, in order to develop on-the-job learning skills. Under no circumstances will the student extern receive pay for the externship hours worked.

Prerequisites: Completed series of Hepatitis B immunizations; Completion of a 2-Step Mantoux screening test within 6 months of starting externship; Completion of all immunizations or verifications of immunity required by program and site; Successful completion of background check (clear background check obtained); Attendance at Rasmussen College Externship meeting held by Program Coordinator; Attendance at externship site orientation (if required by site); Successful completion of all Medical Assisting core courses except Career Development and Seminar courses; Approval of Medical Assisting Program Coordinator

MA285 Medical Assisting Capstone
20 hours, 5 credits
In conjunction with the Medical Assisting Externship (MA265), students will complete an online Medical Assisting Capstone course in this course, students will learn job-search techniques and skills for entry-level medical assistants as well as share and learn from their externship experiences with the class. Students will also prepare to sit for a Medical Assisting credential examination during this course (either the CMA or ARMA depending on campus accreditation status).

Prerequisite: None

Co-requisite: Medical Assisting Externship

MCB 2010C Introduction to Microbiology
70 hours, 5 credits
This course provides an introduction to microbiology that emphasizes effects of microorganisms on human systems. Topics include microbial cell structure, function and metabolism, growth, genetics, mutations, and biotechnology; a survey of viruses, bacteria, algae, fungi, protozoa and helminthes; interactions with the human body and including mechanisms of pathogenicity.

Prerequisite: None

MH100 Pre-calculus
40 hours, 3 credits
In this course, students will understand the application of function theory including the properties and behavior of various function types including polynomial, exponential, rational, polar, and parametric functions. The course emphasizes the comprehension of function behavior through graph plotting, both manual and through the use of graphing calculators. Students will develop solution sets for equations and inequalities.

Prerequisite: Advanced Algebra

MH200 Calculus I
40 hours, 4 credits
This course takes students into a deeper exploration of functions within the framework of the Fundamental Theorem of Calculus. Topics include limits, derivatives, and methods of integration will be discussed. Students will cover numeric, graphical, and symbolic approaches to problem-solving for real-world scenarios.

Prerequisite: Pre-calculus

MH210 Calculus II
40 hours, 4 credits
In this continuation of the topics investigated in Calculus I, students will further explore the methods of integration and the applications of integrals as well as power series and methods of differentiation. This course will cover the topics of convergence and divergence, and students will understand whether improper integrals are convergent or divergent.

Prerequisite: Calculus I

MH300 Applied Discrete Mathematics
40 hours, 4 credits
This course builds on the foundation established in Introduction to Discrete Mathematics with further exploration in logic and mathematical reasoning. Topics include combinatorics and graph theory, Boolean algebra, digital logic circuits, ordered sets, functional programming, models of computation, and methods of proof. Students will gain experience formulating mathematical proofs.

Prerequisites: Introduction to Discrete Mathematics; Calculus II

MH310 Probability and Statistics
40 hours, 4 credits
This course explores the concepts of conditional probability, random variables, expectations and distributions, sample spaces, moment-generating functions, and the central-limit theorem. Further topics include an introduction to estimation, confidence intervals, and hypothesis testing. Students will be able to generate random variables through experimentation, and they will understand how to apply statistical concepts to computational applications.

Prerequisite: Introduction to Discrete Mathematics; Calculus II

ML110 Introduction to Clinical Laboratory Science
40 hours, 3 credits
ML110 Lecture (20 hours, 2 credits) ML110L Lab (20 hours, 1 credit)
An introduction to laboratory medicine and the profession of clinical laboratory science. This course will emphasize professionalism, laboratory safety, and routine laboratory procedures including quality control and lab math.

Prerequisite: Program admission

ML120 Clinical Chemistry I
40 hours, 3 credits
ML120 Lecture (20 hours, 2 credits) ML120L Lab (20 hours, 1 credit)
An introduction to analytical techniques, instrumentation, and basic principles of clinical chemistry methods. Presents the theory and application of biochemical analytes, including clinical significance and normal reference ranges.

Prerequisite: None

Co-requisites: Human Anatomy and Physiology I; College Algebra

ML120L Lab (20 hours, 1 credit)

ML130 Hematology I
40 hours, 3 credits
ML130 Lecture (20 hours, 2 credits) ML130L Lab (20 hours, 1 credit)
Introduction to hematology and practical application of routine and special hematology procedures. Presents red-blood-cell function, hemopoiesis, and associated diseases. The student laboratory focuses on identifying normal and abnormal red-blood-cell morphology and the evaluation of stained blood smears.

Prerequisites: Introduction to Clinical Laboratory Science; Human Anatomy and Physiology I

ML140 Urology
40 hours, 3 credits
ML140 Lecture (20 hours, 2 credits) ML140L Lab (20 hours, 1 credit)
An introduction to urology and body-fluid analysis. Includes anatomy and physiology of the kidney, and physical, chemical, and microscopic analysis of urine, cerebral spinal fluid, and other body fluids.

Prerequisites: Introduction to Clinical Laboratory Science; Human Anatomy and Physiology I

ML150 Clinical Microbiology I
40 hours, 3 credits
ML150 Lecture (20 hours, 2 credits) ML150L Lab (20 hours, 1 credit)
This course will include basic concepts of microbiology. Emphasis will be placed on cell structure and function of human, pathogenic microorganisms. Disease, resistance and immune system will be addressed. Techniques for identification of microbe control will be introduced. A student laboratory will be utilized for experiences in fundamental microbiology techniques.

Prerequisites: Introduction to Clinical Laboratory Science; Human Anatomy and Physiology I

ML210 Clinical Chemistry II
60 hours, 4 credits
ML210 Lecture (30 hours, 2.5 credits)
Expanding upon concepts learned in Clinical Chemistry I, this course further examines the principles and procedures of various tests performed in Clinical Chemistry. Integral to this course is continued exploration of the physiological basis for the test, the principle and procedure for the test, and the clinical significance of the test results, including quality control and normal values.

Prerequisite: Clinical Chemistry I

ML220 Hematology II
60 hours, 4 credits
ML220 Lecture (30 hours, 2 credits) ML220L Lab (30 hours, 1.5 credits)
Expanding upon concepts learned in Hematology I, this course further explores the theory and practical application of routine and special hematology procedures. Presents white blood cell function, hemopoiesis and associated diseases. The student laboratory focuses on identifying normal and abnormal white blood cell morphology and the evaluation of stained blood smears. Coagulation principles and techniques will be included.

Prerequisite: Hematology I

ML230 Immunology
40 hours, 3 credits
ML230 Lecture (20 hours, 2 credits) ML230L Lab (20 hours, 1 credit)
Basic immunology and serology concepts will be presented with an emphasis on selected infectious diseases and autoimmune disorders. The theory of immunologic and serologic procedures will also be presented.

Prerequisite: Human Anatomy and Physiology I
N136 Operating Systems Fundamentals 60 hours, 4 credits
Students are introduced to the principles of various types of microcomputer operating systems. Topics include system resources, memory management, processor management, user interface and operating system functions especially related to database resources management. Emphasis is placed on how the user, hardware, and software interface with the operating system.
Prerequisite: none
N137 Programming I 60 hours, 4 credits
This course is designed to teach the student C++ programming utilizing object oriented terminology. C++ expressions, decisions, and loops within the C++ - realm are explored and practiced. This first course in a two course sequence ends with an analysis of functions and classes and how these elements are used in different programming projects.
Prerequisite: Object-Oriented Programming
N138 Game Preproduction 40 hours, 4 credits
This course has been designed to teach you the fundamental philosophies of game design and apply them in a hands-on manner using a step-by-step process that develops problem solving strategies. The techniques taught in this course exist to provide the practical resources needed to build a firm understanding of game development from a production standpoint. Additionally, the information provided is a grounded study for any real life application where inspiration must combine with practical knowledge and application to create a marketable product.
Prerequisite: Game Design Theory I
N139 Game Design Theory I 40 hours, 4 credits
This course introduces the non-technical study of games, the game development process, and the game industry. The course establishes a lexicon for discussing games and introduces tools for analyzing and understanding games and game design. The course will also present an overview of core concepts including game mechanics, game theory, the experience of playing games, and the cultural, technical, and social aspects of games.
Prerequisite: none
N140 Logic and Troubleshooting 40 hours, 4 credits
This course provides students a strong base of Critical Thinking and troubleshooting methodologies for assessing situations and applying logical reasoning to various scenarios. The materials contained within this course will assist in building the students ability to form reasonable hypotheses for solving problems of a technical nature.
Prerequisite: none
N141 Networking Security 40 hours, 3 credits
This course introduces students to general security concepts including authentication methods, cryptography basics, and common network attacks and how to safeguard against them. Students will learn to create secure communications for remote access, e-mail, the Web, directory and file transfer, and wireless data. They will understand the concepts of physical security and disaster recovery. This course also covers a comprehensive introduction to network security. This course uses a combination of lectures, demonstrations, discussions, online assignments, and hands-on labs to reinforce the course materials. Further, this course helps prepare students to take the CompTIA Network+ certification exam.
Prerequisite: Fundamentals of PC Hardware and Software
N142 Foundations of Software Design 40 hours, 3 credits
This course introduces students to fundamental aspects of program design as well as a high-level programming language.
Prerequisite: none
N145 Fundamentals of PC Hardware and Software 60 hours, 4 credits
In this course, students are introduced to the installation, configuration, maintenance, and troubleshooting of personal computer hardware and the software used to support the hardware. Additional topics covered include the relationship between computer hardware and software, computer network protocols, viruses, protection, disaster recovery and maintenance planning. Finally, the student will learn about and conduct the responsibilities of a professional PC technician. To reinforce the materials in this course, the instructor will assign direct hands-on projects to be performed in a physical or remote lab setting. This course helps prepare students to take both parts of the A+ certification exam. Each student will assemble a complete computer system and components.
Prerequisite: Logic and Troubleshooting
N146 Fundamentals of Hardware and Software I 40 hours, 3 credits
This course is a continuation of Fundamentals of Hardware and Software II, which prepared students for the CompTIA A+ 801 exam. This course will prepare students for the CompTIA A+ 220-802 exam, focusing on operating systems, security, mobile devices, and troubleshooting. Using the Windows operating system, students will learn how to set up networking and configure the Mac OS X network environment. This course also presents an overview of core concepts including game mechanics, game theory, the experience of playing games, and the cultural, technical, and social aspects of games.
Prerequisite: none
N147 Fundamentals of Hardware and Software II 40 hours, 3 credits
This course covers material used by helpdesk engineers to troubleshoot and solve user problems. Dealing with the user, identifying the problem, suggesting solutions, and how to follow up the problem will be discussed. Software concerning trouble tickets and tracking progress will be discussed.
Prerequisite: Communicating in Your Profession
N150 Technology's Role in the 21st Century 20 hours, 2 credits
This course provides a broad overview of major technology trends and developments in the late 20th and 21st centuries along with their cultural, economic, and societal impact. Topics include the uses of technology tools in science, industry, education, and the arts. Categories such as communications, commerce, and quality of life will be explored as students review the scope of and application of technology within the context of everyday life.
Prerequisite: none
N156 Mac Integration 40 hours, 3 credits
This course is a continuation of Fundamentals of PC Hardware and Software I. This course provides a strong base for students interested in providing support to a Mac-centric Windows environment. Students will learn how to integrate a Mac client into a Windows network or a network of mixed devices such as Active Directory and Microsoft Exchange. Also covered is basic user configuration. This course maps to the Mac Integration Basics Certification Exam.
Prerequisite: None
N165 Fundamentals of Game Development I 50 hours, 4 credits
This course introduces the non-technical study of game development and the game industry. The course establishes a lexicon for discussing games and introduces tools for analyzing and understanding games and game design. The course will also present an overview of core concepts including game mechanics, game theory, the experience of playing games, and the cultural, technical, and social aspects of games.
Prerequisite: none
N171 Introduction to Networks 40 hours, 3 credits
This course introduces the foundations to understanding computer networks, including structure and function, components, and models of Local Area Networks (LAN), Wide Area Networks (WAN), and the Internet. Students will learn the fundamentals of Ethernet concepts such as IP addressing, protocols, hardware, and network topologies. Students will learn basic configuration of network devices and apply basic troubleshooting techniques. A variety of hands-on activities and simulations will be used. This course introduces some of the concepts covered in the Cisco Certified Entry Network Technician (CCENT) certification exam. CCENT education continues in the CCNP Routing and Switching course.
Prerequisite: Fundamentals of Hardware and Software I
N180 Math for Game and Simulation Production I 50 hours, 4 credits
This course has been designed to teach concepts in linear algebra. The course covers linear equations and matrices, and how these can be applied in various situations. In addition, topics will include determinants, vectors in the plane, and how to calculate cross determinants.
Prerequisite: Advanced Algebra
N200 Systems Analysis 40 hours, 3 credits
This course covers analysis of information systems including networks, server environments, business solutions, and databases. Students will be exposed to different projects that have complex systems and be asked to create analysis documents and diagrams. Improving the efficiency of the systems will be a primary goal of this course. Prerequisite: Introduction to Networks

N201 Cisco Network Routing and Switching 40 hours, 3 credits
This course prepares students to work with routers and switches in a Local Area Network. Students will learn how to configure and troubleshoot Cisco switches and routers. Concepts in the course will include routing protocols like RIP, RIPv2, OSPF, VLANDs and VLAN routing in both IPv4 and IPv6 networks, as well as DHCP, DNS, and NAT. This course will help prepare students to take the Cisco Certified Entry Network Technician (CCENT) Exam by using a variety of hands-on labs and simulations to understand router and switch configuration by emphasizing practical, real-world principles. Prerequisites: Introduction to Networks; Microsoft Windows Server

N204 Human-Computer Interaction and Interface Design 50 hours, 4 credits
How a person interacts with a game is one of the more crucial aspects in determining the success of the game among consumers. This course will emphasize the details and planning process that must be followed to ensure a successful interface for the game that is to be played. Various techniques of creating buttons, menus, and other types of interfaces will be explored to give the student a wide exposure to this important element in creating games. Prerequisite: Programming II

N205 Platform Design and Human-Computer Interaction 60 hours, 4 credits
How a person interacts with a game is one of the more crucial aspects in determining the success of the game among consumers. This course will emphasize the details and planning process that must be followed to ensure a successful interface for the game that is to be played. Various techniques of creating buttons, menus, and other types of interfaces will be explored to give the student a wide exposure to this important element in creating games. Prerequisite: Programming II

N206 Data Structures 60 hours, 4 credits
This course is designed to be an introduction to data structures using C+++. Topics to be covered include lists, stacks, and queues. In addition, additional time is spent on templates and algorithmic analysis as it relates to recursion. Prerequisite: Programming II

N207 Programming II 60 hours, 4 credits
This course is a continuation of Programming I. Topics that will be covered in this course include design analysis, inheritance, and the use of templates in programming. A look at input/output issues is done along with a look at advanced topics in C++ programming and a brief look at how C++ can be started to be utilized in programming. Prerequisite: Programming I

N208 Linux Administration 40 hours, 3 credits
This course is designed to introduce the Linux operating system. The students will learn to install, configure, maintain, administer, and use programming features of the Linux operating system. Students will learn how to download and install source application from the Terminal, run Windows commands, and apply Linux in the enterprise network environment. This course uses a combination of reading, lecture, Internet-based research, and lab work to reinforce the course materials. Further, this course helps prepare students to take an industry accepted Linux+ certification exam. Prerequisite: Microsoft Windows Server

N209 PHP/MySQL Administration 60 hours, 4 credits
Students learn the fundamental areas of two widely used Web application database tools, PHP and MySQL for implementing and managing database-driven websites. Topics will include PHP scripting and advanced administration of MySQL database applications to be utilized through the Internet. Prerequisite: SQL Server Administration

N210 Introduction to Computer Systems 40 hours, 4 credits
This course is an introduction to the study of software control over the various hardware components of a computer’s architecture – the CPU, RAM, and system bus. Topics include development of C language programs with a pseudo-code foundation. CPU operation at the bus level, comparison of procedural languages to machine language, and the development of an assembly language program using multiple addressing modes, branching, and subroutine calls. Prerequisite: Foundations of Software Design

N211 Windows Scripting 50 hours, 3 credits
This course is designed to teach students basic scripting skills that can be used to automate administrative tasks and reporting. Topics will include an introduction to programming structures like variables, decisions, loops, arguments, and functions. Students will create Microsoft Windows-based scripts using technologies such as VBScript, PowerShell and take advantage of additional features in Windows components such as WMI and ADSI. Prerequisite: Windows Active Directory

N212 Fundamentals of Game Development II 60 hours, 4 credits
This course builds on the Fundamentals of Game Development I and introduces students to the different game platforms currently on the market. This includes game consoles as well as mobile platforms. In addition, students will be exposed to the various approaches used for creating games for these platforms as well as for creating platform agnostic games. Prerequisite: Foundations of Game Development I

N213 Fundamentals of Internet Security 40 hours, 3 credits
This course gives students an alternative perspective on securing multiple mobile operating systems. Students will learn how to apply security principles to Android, iOS, and Mac operating systems. They will learn how hackers penetrate these systems and how to properly secure each environment. Students will learn about aspects of BYOD (Bring Your Own Device) and understand what additional security measures need to be implemented to secure devices that are utilizing public networks. Prerequisite: Networking Security

N222 Cybersecurity for Game and Simulation Production 40 hours, 3 credits
This course provides a broad overview of the fundamental principles of physics as they apply to game and simulation programming and prepares students in the use of physics engines within a game development environment. The course will introduce topics to classical mechanics and dynamics, gravity, magnetism, optics and acoustics. Prerequisite: Math for Game and Simulation Production II

N223 Digital Media and Simulation Production 40 hours, 3 credits
This course explores the integration of storytelling and interactivity. From the fundamentals of creating stories to the integration of game technology, students will write and build worlds where story interacts with game structure. Subjects will include linear narrative, myths and the hero’s journey, chafferbots and MUDs, exposition and dialogue trees, spatial narratives and storylines, and a range of interactive storytelling methodologies from campfires to LARP® and text adventures. Prerequisite: Fundamentals of Game Development II

N224 Windows Active Directory 40 hours, 3 credits
This course will teach the concepts of utilizing Microsoft Windows Active Directory. Students will learn to install, set up, configure, utilize, maintain and troubleshoot Windows Active Directory. To reinforce the material in this course the instructor will assign direct hands on projects to be performed in a lab setting. Further, this course helps prepare students to take the Microsoft Certified Technology Specialist exam. Prerequisite: Microsoft Windows Server

N228 Microsoft Windows Server 40 hours, 3 credits
This course provides students with the knowledge and skills necessary to install and configure Windows Servers and perform post-installation and day-to-day administration. The course gives the student the background needed to provide technical support for Windows Servers. This course uses a combination of lectures, demonstrations, discussions, online assignments, and hands-on labs to reinforce the material covered. Further, the course helps students to take the Microsoft Certified Technology Specialist exam. Prerequisite: Fundamentals of PC Hardware and Software II

N230 Fundamentals of Ethical Hacking 40 hours, 3 credits
This course will show students the opposing side to network security. Students will gain insight into the hacking mindset as well as learn how to directly apply ethical principles to the work they perform on a day-to-day basis. Students of this course will learn how to utilize various tools commonly used in network security as well as hacking. The end result of this course is to give the student a stronger perspective on how to utilize tools to better test and secure networks against threats. Prerequisite: Networking Security

N231 Web Application Development 60 hours, 4 credits
This course is designed to provide students with an introduction to current web application development techniques. Topics include HTML5 and CSS3 as well as an introduction in scripting using PHP as well as Javascript. In addition, the core principles of social media application development are covered. Prerequisite: Programming Fundamentals

N233 Software Packaging and Deployment 50 hours, 3 credits
The goal of this course is to provide students an understanding of how to rapidly deploy applications and operating environments. Students will utilize various methods of application deployment through creating automated installs and application and operating systems images. Students will successfully package and deploy applications and operating systems via these methods in a virtual and stand-alone environment. Prerequisite: Microsoft Windows Server

N234 Microsoft Exchange Server 40 hours, 3 credits
In this course students will learn a wide range of information about Exchange Server, from installing, configuring, troubleshooting, and maintenance. It introduces a variety of concepts, such as client configuration. In addition to explaining concepts, the course uses a multitude of real-world examples of networking and messaging issues. This course uses a combination of reading, lecture, and lab work to reinforce student learning. Further, this course helps prepare students to take the Microsoft Certified Technology Specialist exam. Prerequisite: Windows Active Directory

N235 Cisco Networking Fundamentals and Routing 40 hours, 3 credits
In this course students will learn the skills necessary to deploy a new Cisco network or modify an existing network. This course provides a wide range of information, starting with a review of the basic building blocks of networks through advanced Cisco networking topics such as access control list, WAN connectivity, and virtual LANs. The lab assignments included in this course give students adequate hands-on experience with Cisco equipment, allowing them to gain confidence in working with live networks. This course uses a combination of reading, lecture, and lab work to reinforce student learning. Further, this course helps prepare students to take the Cisco CCENT exam. Prerequisites: Networking Fundamentals; Microsoft Windows Server

N236 Database Security 60 hours, 4 credits
This course covers the basic principles of database security and auditing as well as implementation considerations for business databases. It covers security architecture and operating system security fundamentals. In addition, the design of profiles, password policies, privileges and roles are explored. Other topics include virtual private databases, auditing models, application and data auditing, and auditing database activities. Prerequisite: SQL Server Administration

N237 C# 50 hours, 3 credits
Students will work with the C# programming language and gain an understanding of how it can be used to handle important computing tasks. Concepts such as Graphical User Interfaces, multimedia development, and web programming will be explored. Prerequisite: Programming II

N238 Game Programming 40 hours, 3 credits
This course will teach the concepts of utilizing Microsoft Windows Active Directory. Students will learn to install, set up, configure, utilize, maintain and troubleshoot Windows Active Directory. To reinforce the material in this course the instructor will assign direct hands on projects to be performed in a lab setting. Further, this course helps prepare students to take the Microsoft Certified Technology Specialist exam. Prerequisite: Microsoft Windows Server

N239 Advanced C++ for Game and Simulation Production 40 hours, 3 credits
This course gives students an alternative perspective on securing multiple mobile operating systems. Students will learn how to apply security principles to Android, iOS, and Mac operating systems. They will learn how hackers penetrate these systems and how to properly secure each environment. Students will learn about aspects of BYOD (Bring Your Own Device) and understand what additional security measures need to be implemented to secure devices that are utilizing public networks. Prerequisite: Networking Security
N253 Managing Information Security 30 hours, 4 credits
Information security is not only an IT, but a management issue. Therefore, this course introduces students to a detailed examination of the systems-wide perspective of information security. They begin with the strategic planning process for security, which includes an examination of the policies, procedures and staffing functions necessary to organize and administrate ongoing security functions in an organization. Course subjects include security practices, security architecture and models, continuity planning and disaster recovery planning.
Prerequisite: Networking Security

N259 Mobile Support Principles 40 hours, 3 credits
The Mobile Support Principles course covers the challenge of supporting mobile devices within a business. Topics covered are how to install custom software applications on various mobile operating systems as well as deploying standard operating images across multiple mobile devices. Additional time is spent on configuration of various mobile clients, network configuration and general device troubleshooting.
Prerequisite: Introduction to Networks

N266 Console Development 60 hours, 4 credits
One aspect of creating games is determining how they will work with different consoles from various manufacturers. This course guides the student through the various parts of a console that will have an impact on the game (memory, processing, storage, and debugging to name a few). This systematic approach will allow the game programmer to determine what modifications and changes need to be made as games become part of the game libraries for different vendors.
Prerequisite: Programming II

N273 Business Intelligence Reporting 40 hours, 3 credits
The goal of this course is to allow students to understand what business intelligence is and how it affects the success or failure of organizations. In particular, this course will focus on business intelligence using industry-standard reporting tools as the basis for deriving this information.
Prerequisite: SQL Server Administration

N274 SQL Server Administration 40 hours, 3 credits
The goal of this course is to prepare individuals to work with an administrator SQL Server 2008. Students will learn how to install and maintain SQL Server 2008 and also how to use various tools helpful in creating backups, promoting security, and to enhance availability and performance of the database.
Prerequisites: Microsoft Windows Server

N276 Applied Game and Simulation Theory 40 hours, 4 credits
This course covers the applications for and the development of simulation from game-like “Sims” to educational and military simulations. This course combines reading and critical thinking skills with hands-on development of simulations with a 3D game engine. Students will study the theory behind the production of different types of simulations as they learn to apply software to create short simulations.
Prerequisite: Platform Design and Human-Computer Interaction

N286 Math for Game and Simulation Production I 40 hours, 4 credits
This course builds on topics introduced in Math for Game and Simulation Production I. These topics include: graphing and solving equations; polynomial, rational, logarithmic, and exponential functions; analytic geometry; and determining equations for the shape of a graph.
Prerequisite: Math for Game and Simulation Production I

N290 Information Technology Capstone 20 hours, 2 credits
This course summarizes key learning throughout the student’s program. Students apply what they’ve learned by solving a real-world programming problem. This problem-solving exercise encompasses timelines, deadlines, team-building, and communication issues.
Prerequisite: This course is intended to be completed in last quarter of diploma

N301 The Business of Digital Media 60 hours, 4 credits
This course is designed to prepare students for multiple levels of project completion across the business of digital media such as: concept development, production, project management, and content delivery. Important workforce assets of individual drive and assessment, success with creative teams, management of timelines, deadlines, and budgets, and effective leadership are explored as they pertain to the multimedia development pipeline.
Prerequisite: Portfolio Development

N302 Graphics Development with OpenGL 60 hours, 4 credits
The goal of the course is to teach fundamental principles of computer graphic algorithms in relation to game and simulations. The focus is on graphics methods used to render realistic images of scenes applied to the OpenGL system. Much of this involves solutions to problems such as how we represent 3D models, describe their position and motion in 3D, project them into 2D images, and render these 2D projections with pixels. We will also consider photometric problems, such as how we represent light, model the way objects reflect light, and the path that light takes as it refracts through the scene.
Prerequisite: Programming II

N303 Software Systems Principles 40 hours, 3 credits
This course provides a historical perspective of programming languages and their development. Students will study techniques of language translation including lexical analysis, grammar, syntax, and parsers. Topics include the structure and functionality of modern operating system software with an emphasis on concurrent process execution, process scheduling, communication, and API services. The design and development of programs using dedicated OS features is also considered.
Prerequisite: Introduction to Computer Systems

N304 Operating Systems Design 50 hours, 4 credits
In this course, students learn how operating systems such as Windows, Linux, and the Mac OS X are a fundamental component of all computing systems. This course explores how operating systems are responsible for managing the running processes as well as the sharing of system resources such as the printers and storage over network infrastructures. The course provides an in-depth exploration of the design and implementation of modern operating systems. Topics include the evolution of operating systems, scheduling, paging, input/output devices, virtual memory, files, synchronization, and security.
Prerequisite: Software Systems Principles

N305 Figure Drawing 60 hours, 4 credits
Figure Drawing will emphasize the traditional and realistic approaches used to draw the human figure accurately. There will be an emphasis on gesture, proportions and form development using the human figure in studio and in public settings. The basic structural and anatomical concepts will be covered along with an in depth study of motion and gesture drawing skills.
Prerequisite: Color Theory and Techniques

N306 Advanced Network Security 50 hours, 4 credits
This course provides a detailed examination of techniques and concepts surrounding the topic of network defense. Students will learn how to implement strategies for information asset security, utilizing industry tools and techniques. Both hardware and software issues within the field of Information Security will be explored. Students will examine a range of network security topics including virtual private networks, intrusion detection, cloud data security, and incident response strategies.
Prerequisites: Cisco Networking Fundamentals and Routing; Principles of Network Security

N307 Principles of Network Security 40 hours, 3 credits
This course brings to light the concepts needed for network defense techniques. Students will examine the tools, techniques, and technologies used in the securing of information assets. This course is designed to provide the student with a basic understanding of software and hardware components of Information Security. Topics covered include: intrusion detection, virtual private networks (VPN), and incident response strategies and planning, wireless network security.
Prerequisite: Networking Fundamentals

N309 Principles of Computer Graphics 60 hours, 4 credits
The goal of the course is to teach fundamental principles of computer graphic algorithms in relation to video game and simulations. The focus is on graphic methods used to render realistic images of scenes applied to the OpenGL system. Much of this involves solutions to problems such as how we represent 3D models, describe their position and motion in 3D, project them into 2D images, and render these 2D projections with pixels. We will also consider photometric problems, such as how we represent light, model the way objects reflect light, and the path that light takes as it refracts through the scene.
Prerequisite: Programming II

N310 The Study of Animation 60 hours, 4 credits
This course is intended for students with an animation/multimedia background, who want to understand how animation works, from basic theory to execution. The students will develop a sense of observation and timing as it relates to animation, and they will study motion through watching actual animation pieces as well as taking part in exercises that demonstrate animation in action. This course also emphasizes artistic and aesthetic creativity through the study of storytelling, acting, character development, and dramatic structure.
Prerequisite: Digital Media Assembly

N311 Game and Simulation Lighting Techniques 60 hours, 4 credits
This course provides an introduction to 3D programming, with an emphasis on using real-time shaders. The fundamentals of game and simulation lighting techniques will be covered. Students will learn how to do the shader programming to achieve more realistic “looks” in games. 3D lighting, texturing, alpha blending, and stenciling are covered in detail in this course.
Prerequisite: Graphics Development with OpenGL

N312 Advanced Networking 50 hours, 4 credits
This course offers in-depth study of current networking technologies. Topics include OSI model, communication protocols, routing protocols, WLAN architecture (ATM, VPN, MPLS, and hybrid networks), wireless and QoS. Additionally, students will learn about implementing a defined network architecture with basic network security. This course will cover how to configure, maintain, and troubleshoot network devices using appropriate network tools and understand the features and purpose of network technologies. The course also includes basic solution recommendations, analyzing network traffic, and becoming familiar with common protocols and media types.
Prerequisite: Introduction to Networks

N313 Introduction to Information Systems Security 40 hours, 3 credits
This course provides an overview of security concepts and practices with a focus of countermeasure in the information systems environment. Topics include definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity, and confidentiality aspects of information systems.
Prerequisites: Microsoft Windows Server; Network Security

N314 Advanced Cisco Network Security 60 hours, 4 credits
Cisco Certified Network Associate (CCNA) is a first-level technical certification in Information Technology professionals. (CCNA exams are offered after completion of the entry-level CCENT certification.) The CCNA Security Certification helps maximize your investment in foundational network security knowledge and increases confidence in the integrity of your employee’s network. CCNA Security prepares you for Network Security Specialists, Security Administrators, and Network Security Support Engineers. This course will help students prepare for the CCNA Security certification by using hands-on labs and simulations to understand network security principles by emphasizing practical, real-world principles.
Prerequisite: Cisco Network Routing and Switching

N315 Flash Animation 60 hours, 4 credits
This course is an introduction to Macromedia’s Flash. The course will cover the basics of Flash: importing, creating & editing vector graphics and creating simple animations, creating interactive elements and incorporating sound and video and testing Flash movies. Also, students explore the steps in creating Flash productions from start-to-finish, including site map and navigation building, button making and output.
Prerequisite: Multimedia Technologies
N316 Principles of Shader Programming
50 hours, 4 credits
This course provides an introduction to 3D programming, with an emphasis on using real-time shaders. The fundamentals of game and simulation lighting are covered along with how to do the shader programming to achieve more realistic “looks” in games. 3D lighting, texturing, alpha blending, and stenciling are covered in detail in this course. Prerequisite: Principles of Computer Graphics

N320 Polygon Modeling
60 hours, 4 credits
This course demonstrates the techniques of modeling objects in a three-dimensional environment. Students will manipulate primitive objects such as cubes, spheres, pyramids, and cylinders to build more complex polygons, and students will utilize techniques to approximate curved surfaces with multiple polygons. Industry standard software such as 3D Studio Max, ZBrush, and MudBox will be discussed, and students will have the opportunity within an actual software modeling environment to create a variety of polygon objects. Prerequisite: The Study of Animation

N322 Web Application Architecture and Design
50 hours, 4 credits
This course presents key concepts in distributed designs for network enabled software systems and applications. Distributed designs allow applications to span multiple machines and require deliberately planned design approaches. Systems, Stubs will be explained so that scalable, reliable, and secure when implemented within network infrastructures. Topics include object-oriented programming to networked web services, including database applications deployed on very large-scale websites. Prerequisite: Java I

N323 Asset Management
30 hours, 3 credits
This course is designed to teach students best practices in inventory management. Topics include hardware and software audits, asset tracking systems, software licensing, and service contracts management. Prerequisite: Project Management for IT

N324 Portfolio, Package and Publish
40 hours, 4 credits
This course focuses on the process and tasks necessary for game and simulation-specific employment including research and resumes, contacts and connections, and the important demos and elevator pitch. Students will learn how to develop an industry-specific resume, how to best present their skills in a portfolio, and how to package themselves as a top candidate for a position. Students will create a polished resume and cover letter and learn networking skills for their area of interest in game or simulation production. Prerequisites: Game Production Project I; Simulation Production Project I

N325 Advanced Methods of Computer Graphics
60 hours, 4 credits
This course is for photographers and artists, who wish to go well beyond the basics of Photoshop. In addition to covering more sophisticated methods of color correction, image manipulation and printing, students will learn scanning, digital camera usage, the mechanics of calibration and color management, and more advanced sets of controls in Photoshop, all within a framework of artistically professional sensibility which will allow the student to develop their own professional work. Prerequisite: Digital Photography

N326 Legal and Security Issues
40 hours, 4 credits
This course offers an overview of the legal processes involved in implementing and maintaining an E-commerce website. In addition, this course examines the security issues involved in maintaining a web or an intranet/ internet site and potentials for misuse. Prerequisite: Game Engine

N327 SSCP Certification Preparation
60 hours, 4 credits
The SSCP credential ensures that candidates continuously monitor systems to safeguard against security threats. From the course, the student will be competent in access control, cryptography, malicious code and activity, monitoring and analysis, networks and communication, risk, response and recovery, and security operations and administration. Prerequisite: Network Security and Cryptography

N328 Quality Assurance in Game and Simulation Production
50 hours, 4 credits
Quality assurance is one of the most important elements in game production. This course focuses on the management aspect of quality assurance methods. Topics include strategies for playtesting and including playtesting feedback in the iterative design loop. Prerequisite: Software Engineering for Game and Simulation Production

N331 Infrastructure Hardware
50 hours, 4 credits
This course covers hardware design and planning for medium to large scale data center operations. Topics include data center design (power, cooling, space planning), server racks, storage array systems, fiber channel, iSCSI, SAS, and SATA. Students will be able to design a data center for both operational efficiency (Green IT), and to provide adequate fault tolerance and capacity for anticipated growth. Prerequisite: Introduction to Networks

N333 Wireless, Mobile and Cloud Security
50 hours, 3 credits
Wireless, mobile and cloud computing are some of the hottest technologies on the market today. Securing these emerging platforms are often an afterthought, leaving many systems vulnerable to attacks. This course will cover techniques necessary to ensure operational integrity and customer data protection. Prerequisite: Networking Security

N334 Game Engines and Integrated Game Development Environments
60 hours, 4 credits
The goal of this course is to introduce students to the use of game engines and integrated game development tools. Prerequisites for game production. Topics will include a general overview of the available game engines as well as an in depth introduction to the use of Unity. Students in this course will learn how to use Javascript and C# within Unity and how to utilize external game assets within the Unity development environment. Prerequisite: C#
N380 Mobile Platform Development
60 hours, 4 credits
As more devices become smaller and more mobile, the need to have games to entertain users in downtime increases. This course looks at how to create games for mobile platforms using a systematic approach. The Java programming language is utilized in creating these games. How to weave in audio and video is also addressed along with considering factors such as user inputs involved in playing the game.
Prerequisite: Programming II

N386 Algorithm Analysis
40 hours, 4 credits
This course provides a detailed exploration of algorithm design and analysis, including greedy algorithms, divide and conquer, dynamic programming, and backtracking. Students will gain experience with searching and sorting techniques in practical applications. The course will emphasize theNetworcon and analysis of time space complexity within a software design framework.
Prerequisites: Programming II; Probability and Statistics

N362 Technical Writing
20 hours, 2 credits
This course is designed to teach students best practices in authoring technical documentation. Topics include targeting your audience, organization, glossaries, appropriate use of graphics, tables, lists, wikis, and cross referencing. Students will be able to determine what information to present and how to write a white paper, and will understand the pros and cons of wikis and other documentation portals.
Prerequisite: English Composition

N363 Security Strategies for Web Apps and Social Networking
40 hours, 3 credits
This course addresses how the Internet and web-based applications have transformed the way businesses, organizations, and people communicate. With this information came new risks, threats, and vulnerabilities for web-based applications and the people who use them. This course presents security strategies to mitigate the risks associated with web applications and social networking.
Prerequisite: none

N370 Virtualization
50 hours, 4 credits
This course offers an in-depth study of current virtualization technologies and discusses strategies and approaches for virtualization of servers, clients and applications. Topics include vSwitch, distributed virtual switching (DVS), server-side vs. client-side desktop virtualization (SBC & VDI) and virtual appliances. Students will gain hands-on experience with deploying and managing virtual systems and applications.
Prerequisite: Introduction to Networks

N380 Project Management for IT
40 hours, 4 credits
This course covers the project management aspects of the IT department. Students will learn how to properly apply project management principles within the IT department to properly deploy network and software solutions. Students will utilize project management software for tracking purposes as well as develop their own method of project tracking. Topics such as ITIL principles on Project Management will also be infused into the content of the course.
Prerequisite: Support Management
Course Descriptions

N422 Enterprise Application Support 40 hours, 3 credits
This course introduces students to the challenges of supporting complex enterprise applications like e-commerce and ERP systems. Topics include application architecture concepts (front-end, middleware, backend, and client/server), working with application specialists, application performance monitoring, server cluster architecture, security, support and maintenance, and disaster recovery. Prerequisites: Risk Management and Business Continuity

N423 Windows Security Strategies 40 hours, 3 credits
This course discusses security implementations for various Windows platforms and applications. Areas of study include identifying and examining security risks, security solutions, and tools available for various Windows platforms and applications. Prerequisite: none

N424 Storage Management 40 hours, 3 credits
The goal of this course is to cover various methods of data management. Students will learn about Storage Area Networks, Disk Arrays, and data backup. Students will cover topics such as data de-duplication, cloud backup and managing both physical and virtual data backup environments. Topics also covered are how to maintain both onsite and offsite data backups and creating a backup rotation policy. Prerequisites: Advanced Networking; Infrastructure Library; Cloud Computing

N425 Storyboard Development for Digital Media 40 hours, 4 credits
This course will introduce the student to utilizing storyboards to visually represent staging and camera movement. Specific attention will be paid to utilizing storyboards for shot types, angles, cuts, and transitions. Students will analyze existing storyboard samples as a guide to creating their own storyboard project. During the course the students will also examine cinematic visual techniques and terminology. Prerequisite: Digital Media Production

N426 Asset Development II 60 hours, 4 credits
This course provides a brief introduction to development of 3D assets, including the use of 3D modeling, rigging and animation tools. Students learn the production process involved in 3D asset creation and develop the skill necessary to create 3D assets for the games and simulations developed within this program. Prerequisite: Asset Development I

N430 Computer Forensics 40 hours, 3 credits
This course explores computer literacy and criminal investigation legal issues regarding seizure and chain of custody, and technical issues in acquiring computer evidence. Popular file systems are examined. Reporting issues in the legal system are discussed. Prerequisite: Computer Applications and Business Systems Concepts

N431 Multiplayer Game Programming 60 hours, 4 credits
The trend in games is to have many people simultaneously playing a game utilizing the Internet or some other network. Topics included in this course include game architecture concepts, server cluster architecture, data transfer, and how to prevent cheating in MMOG situations. Prerequisite: Practical Game Development

N432 Information Technology Management Capstone 20 hours, 2 credits
This course summarizes key learning throughout the student's program. Students apply what they've learned by completing a network operations plan. The plan will include details of hardware, software, infrastructure design, security, disaster recovery and support/service management. Prerequisite: Advanced Networking; must be completed in the student's final quarter

N433 Operating Systems Design 40 hours, 3 credits
In the course, students learn how operating systems such as Windows, Linux, and the Mac OS X are a fundamental component of all computing systems. This course explores how operating systems are responsible for managing the running processes as well as the sharing of system resources such as the printers and storage over network infrastructures. The course provides an in-depth exploration of the design and implementation of modern operating systems. Topics include the evolution of operating systems, scheduling, paging, input/output devices, virtual memory, files, synchronization, and security. Prerequisite: Enterprise Application Support

N434 Simulation Production Project I 60 hours, 4 credits
This course is designed around a final project in Industrial Simulation. We will focus on design and research issues pertinent to design exploration and presentation through simulations. Throughout the course we will explore concepts in modeling, simulation, and design common to many domains, and investigate specific applications from a variety of fields ranging from weather to ecology to traffic management and architectural interactivity. Prerequisite: Software Engineering for Game and Simulation Production

N435 Digital Video/Audio Project 60 hours, 4 credits
This advanced course in Audio/Video production is for students to create a final project that exemplifies the aesthetic and technical aspects of digital video recording, non-linear editing, special effect generation, and production audio (and associated audio) using After Effects, Premiere, Sound Forge and Director. Also considered will be the preparation of digital video for use in interactive media such as CD, DVD and video casts. Students will produce a final project on DVD. Students may work as a team on this project. Prerequisite: Digital Media Production

N436 Simulation Analysis and Design 50 hours, 4 credits
This course offers students an in-depth exploration of the use of probability theory and statistical methods in the development of computer simulations used to study and model real-world phenomena. Students will build application frameworks to model events and activities within several environments including medical, industrial, military, and scientific simulation. Prerequisite: Algorithm Analysis

N437 Linux Security Strategies 40 hours, 4 credits
This course is an introduction to the securing of Linux platforms and applications. Areas of study include identifying and examining methods of securing Linux platforms and applications and implementing those methods. Prerequisite: Linux Administration

N440 Web Design Project 60 hours, 4 credits
The purpose of this course is the advanced application of knowledge gained by students in the process of developing websites. This course will take a user-centered approach to designing websites and will focus on the entire lifecycle of a website, from the idea of creating a website, through requirements gathering, conceptual design, physical design, testing, and implementation. Prerequisite: Advanced HTML coding with CSS

N441 3D Game Character Creation 60 hours, 4 credits
This course is designed to equip digital media students with skills in 3D character creation and effects in a game environment. During this course students will explore advanced 3D modeling and animation theory and principles which focus on character animation as it applies to the gaming environment. Specifically, these principles and theories are applied to the context of interactive narratives and games. Advanced modeling will also be explored. Students will engage in the study of character posing and rigging for games, advanced animation, creative character animation as well as morphing and blending to create expressive characters. Prerequisite: Polygon Modeling

N442 Hacker Techniques, Tools, and Applications 40 hours, 4 credits
This course is an introduction to hacking tools and incident handling. Areas of instruction include various tools such as banner grabbing, password cracking, and hacking. This course also addresses incident handling methods used when information security is compromised. Prerequisite: none

N443 Service Management 40 hours, 4 credits
This course provides a more in-depth examination of the Information Technology Infrastructure Library (ITIL) public framework of best practices in IT service management. Topics include incident and service level agreements (SLAs), availability and capacity management. Students will write SLAs, cover incident response times, availability, capacity/infrastructure performance. Prerequisite: Support Management

N444 Simulation Production Project II 60 hours, 4 credits
This course is a continuation of the Simulation Production Project I course. Students will continue on their project from the prototype to the final release stage. Prerequisite: Simulation Production Project I

N445 Animation Graphics Project 60 hours, 4 credits
This course combines the accumulated knowledge of students in the design and creation in 3D environments. The culmination of this knowledge will be a final 3D animation project using modeling, texturing and animation techniques. Students are expected to explore various theories and techniques to complete a professional summative 3D animation project. Prerequisite: 3D Game Character Creation

N450 Game Assets 60 hours, 4 credits
This course focuses on the development of visual elements and programming used in the development of a video game. It covers areas such as performance tuning, debugging, designing for test, pipeline management and distribution, study of software architecture design between platforms, object oriented practices for game play, asset management and coding best practices. It also covers areas like cross-platform porting and multi-lingual techniques. Prerequisite: Applied Game and Simulation Theory

N455 Game Audio Assets 60 hours, 4 credits
In this course, we will cover the fundamentals of audio programming for games. Topics covered include basics such as audio formats and common hardware configurations and loading sounds in ADPCM format. Students will explore play back “one shot” and looping sounds; and stream audio from an external device. They will then use these building blocks to write a low-level sound engine that will be implemented into a game engine. Prerequisite: Game Assets

N458 Systems Monitoring 50 hours, 4 credits
This course is designed to teach students to identify potential performance bottlenecks and benchmark performance and implement monitoring techniques to proactively identify and react to changes in the environment. Topics include defining, gathering, and analyzing network monitoring, security monitoring, performance tuning, and metrics and reporting. Prerequisite: Advanced Networking

N459 ISS Capstone 40 hours, 3 credits
This course encompasses all the accumulated knowledge obtained from the entire ISS curriculum and requires the student to respond to a RFP for information systems security consulting. Prerequisite: This course is designed to be taken at the end of the program

N460 Application of Physics for Game and Simulation Production 60 hours, 4 credits
An important aspect in a game or simulation is to be able to render what is happening in the game in realistic terms based on standard real physics principles. This course is designed to allow the game or simulation programmer to be able to translate the ideas and sequences of a game into realistic actions. Key components in this class will be the opportunity for students to develop tools, demos, and working games that utilize and follow real physics. Prerequisite: Programming II

N461 Computer Graphics Programming 50 hours, 4 credits
This course offers a survey of computer industry-standard graphic hardware, foundation graphic operations and implementations, two-dimensional and three-dimensional transformations using matrix calculation, hidden lines and surface removal, illumination and shading models, curves and surface textures, object modeling, and three-dimensional animation. Students will learn how to convert complex mathematical formulae into operational program code. Prerequisite: Programming II
N462 Game Production Project I
60 hours, 4 credits
This course demonstrates advanced techniques for computer game design and programming. Techniques used in game engines, such as: animation synthesis, autonomous character behaviors, building structures for interactive system, solving multiplier interface and social issues are covered in the course. Students utilize these skills to produce a game prototype as a final project.
Prerequisite: Software Engineering for Game and Simulation Production

N463 Game Production Project II
60 hours, 4 credits
This course is a continuation of the Game Production Project I course. Students will continue on their project from the prototype to the final release stage.
Prerequisite: Game Production Project I

N465 Industrial Simulation Project
60 hours, 4 credits
This course is designed around a final project in Industrial Simulation. We will focus on design and research issues pertinent to design exploration and presentation through simulations. Throughout the course we will explore concepts in modeling, simulation, and design common to many domains, and investigate specific applications from a variety of fields ranging from weather to ecology to traffic management and architectural interactivity.
Prerequisite: Multiplayer Game Programming

N466 Unified Communications and Mobile Computing
50 hours, 4 credits
This course teaches students about the trends in telecommunications, the convergence of voice and data communications systems, and how mobile computing is an integral part of business today. Topics include simplifying communications architecture, video conferencing, IM, securing and managing mobile devices, and collaboration tools.
Prerequisite: Advanced Networking

N470 Video Game Production Project
70 hours, 4 credits
This course demonstrates advanced techniques for computer game design and programming. Techniques used in game engines, such as: animation synthesis, autonomous character behaviors, building structures for interactive system, solving multiplier interface and social issues are covered in the course. Students utilize these skills to produce a final project, demonstrating comprehension of the process of professional game creation.
Prerequisite: Multiplayer Game Programming

N471 Engineering Virtual Worlds
50 hours, 4 credits
In this course, students will learn how to create multi-user virtual worlds. Virtual worlds allow network-connected users to interact in real-time within shared two-dimensional and three-dimensional environments. Students will gain an understanding of how virtual worlds change dimensional environments. Students will design and implement a large-scale software project utilizing the skills and techniques they have mastered throughout the program of study. Class and small group meetings will be used for teams to demonstrate the progress of their projects as well as for the teams to meet and discuss their experiences. Class meetings outside of regularly scheduled class sessions will be required.
Prerequisite: Must fall in last quarter of study

N480 Senior Computer Science Capstone
30 hours, 3 credits
The Senior Computer Science Capstone course provides a culminating and integrative educational experience. While participating in a team environment, students will design and implement a large-scale software project utilizing the skills and techniques they have mastered throughout the program of study. Class and small group meetings will be used for teams to demonstrate the progress of their projects as well as for the teams to meet and discuss their experiences. Class meetings outside of regularly scheduled class sessions will be required.
Prerequisite: Must fall in last quarter of study

N113 Introduction to Multimedia Design
40 hours, 3 credits
This course is designed to provide the student an overview and exposure to the basic multimedia concepts and software. Students examine introductory theory and animation as well as four tracks in multimedia: Web, Interactive, Video, and 3D. Preproduction of all multimedia elements are stressed throughout the course with an emphasis on trouble shooting and problem solving. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Introduction to Computer Graphics

N114 3D Modeling
50 hours, 3 credits
This course introduces students to the fundamentals of 3-dimensional modeling. Students learn basic modeling techniques, texture, lighting, and environmental effects, to create forms based on observed objects, as well as student’s original concepts. Basic constructs are covered such as: primitive objects, polygon modeling, nurbs, curves, extrusions, lofting, revolving/lathing, software interface navigation, model exporting and rendering. This course will provide training in a variety of industry-standard 3D design software.
Prerequisite: Introduction to Animation

N115 Networking and Internet Technologies
40 hours, 3 credits
This course provides students with a practical understanding of the structure and operation of the Internet, including various communications and data transfer protocols, an overview of programming for the Internet, how to manage Internet security and e-commerce. Further, students will explore in-depth a variety of technologies and methodologies such as network models and topologies as well as a range of security considerations.
Prerequisite: Students will be able to demonstrate proficiency in working with the Internet as a useful repository of desired information.

N120 Color Theory
40 hours, 3 credits
This course offers methods and exercises for the study of color theory using the computer. Explores the study of the color computer holds advantages of speed and efficiency with many color techniques and solutions, as well as immediate application to projects. The digital approach used in this course will give students knowledge and practice that is immediately relevant as the student moves forward to using the study to color application.
Prerequisite: Design Foundations

N121 Typography
40 hours, 3 credits
This course is an introduction to typographic design for static contexts in print and screen and kinetic contexts in web and broadcast. Basic typographic vocabulary and fundamentals are emphasized. Theoretical presentation is explored through design practice both on paper and utilizing industry standard Adobe software. Multiple exercises are culminated in major typographic projects for print, web, and broadcast.
Prerequisite: Design Foundations

N122 Digital Publishing
40 hours, 3 credits
This course utilizes techniques associated with designing computer graphics and page make-up for desktop publishing. Emphasis is on the exploration of illustration, photo retouching and manipulation, and working toward finished results primarily in printed form as well as web. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Typography
NM141 Digital Media Production
40 hours, 3 credits
This course is a study of the integration of components used in multimedia applications using authoring software. Students use industry-standard software as tools for producing interactive projects. Topics include basic animation techniques, special effects, transitions, and user interactivity. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Audio/Video Editing

NM142 3D Animation
40 hours, 3 credits
Building upon knowledge of 3D modeling and rendering and 3D animation from earlier coursework, this course will focus on advancing 3D animation skills, techniques, and proficiencies towards creating an animated digital short film. Emphasis on refining application of the 12 animation principles, life-like animation, forward and inverse kinematics, scene staging, and camera work. This course will provide training in a variety of industry-standard 3D design software.
Prerequisite: 3D Lighting, Texturing, and Rendering

NM150 Introduction to Animation
40 hours, 3 credits
This course introduces students to the 12 basic principles as well as the processes of animation. Student will learn about research, pre-visualization, storyboarding, animatics, character model sheets, and other processes integral to accessing an animated film. Sketches, source imagery, and audio are utilized to effectively communicate ideas for time-based media. Documentation techniques are employed to chart progress with character and scene development, as well as cameras and lighting. Students will be able to relate the 12 basic principles to examples from animation history while applying them through hands-on analog and digital animation projects.
Prerequisite: Design Foundations

NM160 User-Centered Web Design
40 hours, 3 credits
This course builds upon the fundamentals of web development with a focus on user-centered design. Expanding upon basic HTML and style sheets, the student is introduced to best practices, interface design, and the development of flexible, multi-use sites. Usability and accessibility are also explored in greater depth, using advanced web development tools. Needs of the visitor will be examined, including detecting and responding to the visitor’s browser, as well as utilizing the advanced media capabilities of HTML5 and CSS.
Prerequisites: Fundamentals of Web Design; User Experience Design

NM170 Introduction to Web Scripting
50 hours, 3 credits
This course introduces the advanced capabilities enabled through the use of client-side scripting languages. Students are introduced to basic logic and programming concepts, with a focus on Javascript and AJAX (Asynchronous Javascript and XML). Enhancement of usability and function are explored and emphasized, with attention on collecting and validating user information and interacting with the site visitor.
Prerequisite: Fundamentals of Web Design

NM200 Interactive Media
40 hours, 3 credits
This course is a study of the integration of components used in multimedia applications using authoring software. Students use industry-standard software as well as skills developed in earlier coursework to produce interactive projects that incorporate graphics, sound, and interactive elements. Combining multimedia elements into HTML pages are explored. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Introduction to Animation; Typography

NM210 Print Design
40 hours, 3 credits
This course utilizes techniques associated with designing computer graphics and multi-page and package design for desktop publishing and digital distribution. Students will learn professional practices in proper file setup, saving and exporting, and delivery. Emphasis is on the exploration of combining illustration, images, and type in an effective manner while working toward industry-standard published files primarily in print form.
Prerequisite: Typography

NM222 User Experience Design
40 hours, 3 credits
This course expands on student’s knowledge of interactive design learned in earlier course work, exploring interactive design from the perspective of user experience. Metaphors for graphic interfaces and icon design are studied through industry product examples, student practice exercises and projects. Organizing, scanning, planning, design, prototype models, and creating, working and aesthetic interactive experiences of complex informational content through rich multimedia experiences are covered. Software training builds on previous knowledge to advance student’s skills with a variety of industry-standard design software.
Prerequisite: Interactive Media

NM230 Digital Photography
40 hours, 3 credits
Building upon skills already accomplished in earlier course work, students will advance their skill of professional and technical in digital image making. Professional artist’s sample work will be viewed, analyzed, deconstructed, and discussed in terms of concept, message, technique, composition and approach. A variety of techniques for digital image-based art making will be demonstrated, explored, and practiced. Images will be combined with typographic and written messages. Image output for print, screen, and broadcast will be presented. Software training builds on previous knowledge to advance student’s skills with a variety of industry-accepted Adobe design software.
Prerequisite: Color Theory

NM240 3-Dimensional Animation
40 hours, 3 credits
Once students have learned the basics of 3D modeling and rendering, they will explore the fundamentals of animation and the more advanced methods of modeling and rendering. Students will create photo-realistic products and environments utilizing complex technical techniques and through creative design. Emphasis will be placed on detailed modeling and texture mapping complementing elementary 3D animation and story development. This course will provide training in a variety of industry-accepted Autodesk 3D design software.
Prerequisite: Introduction to 3D Arts and Animation

NM241 Motion Graphics
40 hours, 3 credits
Moving graphic 2D animation is the primary focus of this course. Students will composite video, digital images, motion graphics, vector and pixel grunge, titles, and kinetic typography into cohesive motion graphics pieces. Narrative and non-narrative form will be explored. Projects include cinematic logo design, animated PSAs, broadcast titling, and advertising spots. Students will assemble a demo reel of motion work. Software training builds on previous knowledge to advance student’s skills with a variety of industry-accepted Adobe design software.
Prerequisite: Audio/Video Editing

NM250 Dynamic Content Management
40 hours, 3 credits
This course introduces students to the standards for designing relational databases. The course focuses on record creation, modification, and deletion as well as report generation and database design. In addition, Structured Query Language is utilized to obtain dynamic information for multimedia authoring.
Prerequisite: Fundamentals of Web Authoring and Design

NM251 Digital Media Project
40 hours, 3 credits
This course is a culmination of a student’s accumulated knowledge in narrative and non-narrative digital film creation. Students will produce a proposed film idea from concept to final presentation. Brainstorming, story writing, casting, storyboarding, animatic, character creation, animation, audio and video recording and production, camera techniques, digital capturing/rendering, non-linear editing, post production, titling, compositing, and final output will be evaluated in the final piece. The course will culminate in a screening of final student films.
Prerequisite: Motion Graphics

NM252 Fundamentals of Web Authoring and Design
40 hours, 3 credits
This course focuses on the students’ basic authoring skills by focusing on the demands, details, and subtleties of creating web pages. HTML and supplemental client side scripting are the primary focus of the course. In addition, processes of graphic and multimedia creation – adding interactivity, color use, file management and formats, testing, publishing, and publicizing are addressed. Students use interactivity and multimedia elements to enhance their site design.
Prerequisite: Introduction to Multimedia Design

NM260 Server Side Scripting
40 hours, 3 credits
This course focuses on dynamic interactive websites from a multimedia perspective. Emphasis is on data driven pages, interactivity through client side scripting, dynamic web content and database access through server side scripting.
Prerequisites: Dynamic Content Management; Fundamentals of Web Authoring and Design

NM261 Portfolio Development
40 hours, 3 credits
This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: User Experience Design

NM262 Digital Media Assembly
40 hours, 3 credits
In this course, students will develop and apply scripts to control sprites, video, sound, and interactivity for informational and entertainment animations using authoring software. The project produced in this class will be available for use on CD-ROM. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Multimedia Technologies

NM270 Character Modeling
40 hours, 3 credits
This course is designed to refine skills in 3D character creation and effects. During this course students will explore advanced 3D modeling and animation theory and techniques that focus on character animation as it applies to the gaming environment. Specifically, these principles and theories are applied to the context of interactive narratives and video games. Students will engage in the study of character posing and rigging for games, advanced animation, and morphing, blending, and similar techniques to create more expressive characters. This course will further prepare a student for industry certification in Autodesk 3ds Max.
Prerequisites: Figure Drawing; 3D Lighting, Texturing, and Rendering

NM272 Multimedia Technologies
40 hours, 3 credits
In this course students will learn aspects of advanced programming languages that allow for scripting of complex interactive applications for Internet delivery. Students will also explore the newest technologies and their impact on multimedia and visual design. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Introduction to Multimedia Design

NM280 Multimedia Portfolio Development
20 hours, 2 credits
In this course, students select a primary and secondary track to create an industry-quality portfolio consisting of enhanced and updated projects from previous classes as well as newly created projects. Students will create a final portfolio/demo reel using a consistent theme related to their identity package. This course will provide training in a variety of industry-accepted Adobe design software.
Prerequisite: Digital Media Assembly

NM281 Scripting for Web Servers
40 hours, 3 credits
This course delves deeper into the power of web development through server-side programming. Building upon Introduction to Web Scripting, the student will explore and interact with server-side databases and collect and manipulate data using general PHP scripting language. Students will create dynamic content for web pages to perform simple calculations, collect visitor information, and interact with basic databases.
Prerequisite: Introduction to Web Scripting

NM290 Mobile Web Design
40 hours, 3 credits
This course focuses on current trends in web usage, specifically on the expansion of mobile platforms from laptops to tablets and smartphones. Emphasis is placed on responsive design: creating cross-platform web sites that provide equal and optimal usability across a wide range of devices, screen sizes, and resolutions. Various web authoring and authoring techniques are utilized to provide a fluid and flexible experience for the web visitor.
Prerequisite: User-Centered Web Design
NM301 Interactive Publishing 60 hours, 4 credits
This course builds on prior coursework in interactive media, animation, motion graphics, kinetic typography, audio, and video. The course focuses on graphic, interactive, and animation design for mobile devices such as smartphones and tablets. Issues with user interface, user experience, usability, troubleshooting, and compatibility are explored, and strategies are developed to establish best practices.

Prerequisite: User Experience Design

NM311 Graphic Design History 30 hours, 3 credits
Students will examine the historical, cultural, technological, and social factors that contribute to an understanding of graphic design and its impacts on modern commerce and society.

The development of graphic design from 1920 through the end of the 20th century will be a key focus of the course, with a larger focus on the development of graphic design through the digital revolution to present day. Western and non-western graphic design is represented, with a strong emphasis placed on critical analysis, technical analysis, communication, global perspectives, and cultural impacts.

Prerequisite: Art Appreciation

NM321 Advanced Typography 60 hours, 4 credits
In this course, students will expand their understanding of the use of typography for the successful communication of messages and the enhancement of visual interest and design work. The course will expand on topics such as: information hierarchy, meaning, reading order, and the language of kinetics.

Prerequisite: Typography

NM331 Advanced Color Theory 60 hours, 4 credits
This course builds upon the foundations and practices of color theory. In addition to covering more sophisticated methods of color correction, image manipulation and printing, students will learn scanning techniques, digital camera usage, the mechanics of electronic devices and other more advanced sets of controls.

Students will work within a framework of artistically professional sensibility to develop their own professional workflow and projects.

Prerequisite: Digital Photography

NM341 Advanced Digital Photography 60 hours, 4 credits
This course will engage students in advanced digital imaging projects, building upon instruction, knowledge, and techniques learned in earlier coursework, and contributing to a strong, professional portfolio. Thematic art projects such as a photo essay and theme based art series will be included. This course will include instruction on: setting project requirements, design elements related to digital images, software interface specifics, input, output, image manipulation, and publishing. Experience in industry standard Adobe software is included in the course.

Prerequisite: Advanced Color Theory

NM350 Animation History 40 hours, 3 credits
Students will examine the historical, cultural, technological, and social factors that contribute to the development of animation as a commercial and experimental art form. Key animated films from the turn of the 20th century to present by independent filmmakers as well as films produced by major production houses will be viewed and discussed with an emphasis on critical analysis. A strong emphasis is placed on writing, critical thinking, information literacy, global perspectives, and cultural impacts.

Prerequisite: Introduction to Animation

NM361 Advanced 3D Modeling 60 hours, 4 credits
This course is designed to explore advanced techniques of 3D modeling. Students refine modeling techniques, texture, lighting, and environmental effects to create one original portfolio-quality project. Further development of primitive objects, polygon modeling, nubs, boolean, extrusions, lofting, and revolving/lathing will be explored. This course will provide additional training in industry-standard 3D design software.

Prerequisite: 3D Modeling

NM370 Web Content Management Systems 60 hours, 4 credits
This course explores open-source, web-based content management systems (CMS) which allow the Web designer to create rich and flexible interactive sites. Using a CMS, a web designer can update a complex web site dynamically and rapidly to meet client needs and visitor expectations. Students will be introduced to key PHP-based content management systems like Joomla, Drupal, and Wordpress, and will develop their own topic and theme-based web sites.

Prerequisite: Information Architecture for the Web

NM380 Search Engines, Optimization, and Analytics 60 hours, 4 credits
This course introduces the student to the optimization of web sites for search engine placement. The student will learn how search engines collect and organize information and make it useful and accessible. Search engines and search results will be examined for their impact on information access, copyright and privacy issues, and the changing business landscape. Students will design as well as optimize web pages such as metatags, copyrighting techniques, header and footer optimization, site submission, and linking methods used to improve site ranking and guide visitors to businesses or information.

The course also examines how to track the success—or failure—of those procedures.

Prerequisites: Mobile Web Design; Internet History and E-commerce

NM390 Information Architecture for the Web 60 hours, 4 credits
This course explores the use of design principles to positively affect the user’s web experience. Subjects include traditional architecture, industrial design, library science, and software design. Additional topics include the evolving standards of web information architecture, such as navigation structure, financial transactions, screen paradigms, gesturing and redundant linking. All of the content will be organized into content into appropriate categories, develop interfaces to support those categories, and develop key project deliverables.

Prerequisite: User Experience Design for Web Servers; Advanced User Experience Design

NM401 Advanced Motion Graphics 40 hours, 4 credits
Building on knowledge and techniques from Motion Graphics, students will advance their work with compositing video, digital images, 3D animation, vector and pixel graphics, titles, and kinetic typography into professional motion graphics pieces. Film titling, logo bumpers, broadcast graphics, and special effects will be explored. Students will build upon and add to their demo reel of motion work. Software training builds on previous knowledge to advance student’s skills with a variety of industry-acceded Adobe design software.

Prerequisite: Motion Graphics

NM411 Advanced User Experience Design 60 hours, 4 credits
Students expand upon their knowledge of user experience design to deepen their knowledge of the development process of interfaces and user experiences. Various kinds of software will be examined, from browser-based apps to interfaces for mobile device applications. Authoring software will be employed for demo, testing, and prototyping of interface projects.

User data will be planned, test materials such as paper prototypes will be built and tested on user groups, and the data examined then incorporated into user interface projects.

Prerequisite: Interactive Publishing

NM420 Media Campaign Design 60 hours, 4 credits
Students create a project around an original concept and purpose resulting in a portfolio project that advertises, promotes, or presents a product or service. Some examples may be a new product launch, a real or fictitious product or service, or a public service announcement of a social issue or public concern. The final portfolio piece must contain a component for print, broadcast, and web and may include graphic design, animation, CGI, interactivity, social media, or video. The final project will be presented to the instructor and the class for critique. This course will incorporate a variety of software technology aligned with industry standards.

Prerequisite: Digital Media Project

NM430 Bishop Short Film Project 60 hours, 4 credits
This course combines the accumulated knowledge of narrative and non-narrative digital film, including: screenwriting, pre-production, production, post-production levels. Professional methods of effects in film and video at an advanced, real or fictitious product or service, or a public service announcement of a social issue or public concern. The final portfolio piece must contain a component for print, broadcast, and web and may include graphic design, animation, CGI, interactivity, social media, or video. The final project will be presented to the instructor and the class for critique. This course will incorporate a variety of software technology aligned with industry standards.

Prerequisite: Digital Media Project

NM441 Advanced Portfolio Development 60 hours, 4 credits
In this course, students build upon their previous knowledge of portfolio design and construction. Students gather projects from all coursework to date, assess any gaps in their portfolio work, design new projects to fill in those gaps, and incorporate them into their final portfolio. Students will create any documentation needed to incorporate the projects into their portfolio, including, but not limited to: video, image capture, and recording, 3D renderings, website design, motion graphics, and user interface design. Students will present the included projects within the class for feedback from their instructor and colleagues, and then design, build, and assemble a polished web-based portfolio or demo reel as well as a print-ready portfolio.

Prerequisite: Portfolio Development

NM450 Digital Effects 60 hours, 4 credits
This course focuses on the use and application of effects in film and video at an advanced, post-production level. Professional methods of effects in film and video at an advanced level. Examples may be a new product launch, a real or fictitious product or service, or a public service announcement of a social issue or public concern. The final portfolio piece must contain a component for print, broadcast, and web and may include graphic design, animation, CGI, interactivity, social media, or video. The final project will be presented to the instructor and the class for critique. This course will incorporate a variety of software technology aligned with industry standards.

Prerequisite: Digital Media Project

NM460 Advanced Character Modeling 60 hours, 4 credits
This course is designed to explore advanced techniques of 3D character creation and effects. During this course students will explore advanced 3D modeling and animation theory as well as principles that focus on character design and animation as it applies to virtual environments. Theories and principles of modeling and animation are applied to the context of interactive narratives, simulations, and games. Students will engage in the study of character rigging for games, advanced animation, morphing and blending, and other techniques to create expressive characters.

Prerequisite: Advanced 3D Modeling

NM470 Advanced 3D Rigging 60 hours, 4 credits
In this course, students expand on knowledge from 3D modeling, rigging, and animation to explore advanced techniques of rigging such as: facial rigging, deformation rigs, rigging non-human format characters, analysis of musculoskeletal character anatomy, and rigging refinement for precise articulation. This course will further prepare a student for industry certification in Autodesk software.

Prerequisite: Advanced Character Modeling

NM471 Advanced PHP for E-commerce 60 hours, 4 credits
This course delves further into the use of server-side scripting and the development of web sites utilizing PHP as well as MySQL. Students will apply e-commerce concepts and knowledge of information architecture to develop a reliable, stable, expandable, and secure infrastructure for e-commerce, including content development and shopping cart management. Students will learn how to use PHP to collect information and interact with a MySQL database.

Prerequisite: Web Content Management Systems

NM483 Animation Capstone Project 60 hours, 3 credits
Students will apply their accumulated knowledge of animation and motion graphics to create an original animated short. The culmination of this knowledge will be a final animation project using 2D and/or 3D animation techniques. Students will explore various theories and techniques to complete a professional animation project.

Prerequisite: Advanced 3D Rigging

NM490 Internet History and E-commerce 50 hours, 4 credits
This course explores the history and evolution of the Internet including its influence on business applications for government, corporate, and retail sectors. Topics will be explored including business structures and operations, communications and data transfer protocols, web browsers, browser development history and current issues, web security, and e-commerce. Strategies and organizational models for web-based businesses are emphasized, with a focus on the impact of E-commerce on consumerism, customer relations, advertising, and site maintenance.

Prerequisite: Web Content Management Systems
NU110 Critical Thinking in Nursing
20 hours, 2 credits
This course introduces the students to critical thinking as a professional nurse. Students have the opportunity to use critical thinking skills as the foundation to future nursing courses. Prerequisite: Admission to the Nursing program

NU111 Comprehensive Pharmacology
40 hours, 4 credits
This course provides an overview of essential concepts and principles of pharmacology as applied in the nursing management of client care, to include an overview of drug classifications, drug actions/interactions, and therapeutic and adverse reactions to medications. Students demonstrate proficiency with the use of problem solving skills and mathematical calculations necessary to perform the nursing role. This course provides the foundation for subsequent coursework. Co-requisite: Critical Thinking in Nursing

NU115 Introduction to Professional Nursing
30 hours, 3 credits
This course introduces the student to the role of the professional nurse in contemporary healthcare settings. The student is introduced to the nursing process, therapeutic communication and issues affecting professional nurses. Co-requisite: Critical Thinking in Nursing

NU117 Nutritional Principles in Nursing
40 hours, 4 credits
This course introduces the student to the chemical processes that occur on a cellular level related to nutrient intake and digestion. Emphasis is placed on the concept of Metabolism and the body’s ability to meet basic health and wellness needs as it pertains to a diverse set of clients across the life span. Students will be introduced to basic physiological concepts and are encouraged to explore Clinical and Nursing Judgment, Education and Health Promotion, and Motivational Wellness. Special emphasis is placed on Growth and Development, Cellular Regulation, and clinical nutrition in order to prepare the student to critically apply these principles throughout the nursing program in the form of knowledge, skills, and attitudes. Prerequisite: Admission to a Nursing Program
NU240 Mental Health Nursing
100 hours, 6 credits
This course covers the principles of mental health nursing noting the application of psychiatric and social issues in a variety of settings. This course has both lecture and clinical content. Content includes therapeutic communication, pathophysiology, pharmacology, current treatments using evidence-based practice and the nursing process as the framework.
Prerequisites: Adult Medical Surgical Nursing II; Clinical Nursing Skills II

NU249 Mental Health Nursing
55 hours, 4 credits
NU249 Lecture (32.5 hours, 3 credits) NU249LL Clinical (22.5 hours, 1 credit)
This course is comprised of a theory and clinical component that focuses on the knowledge, Skills, and Attitudes required to function in the appropriate role of the beginning Professional Registered Nurse in an acute care Obstetrics/Maternity Setting, Pediatric Setting, or similar environment. Emphasis is placed on Reproduction as well as Growth and Development. Special Emphasis is placed on Surgical Integrity, Glucose Regulation, Infection Control, and Patient-Centered Care as it applies to this diverse group of clients. The theoretical basis for Complementary and Alternative Medicine, in conjunction with specific pharmacologic therapies for these clients will be examined. Students are required to critically apply all previously introduced Health and Wellness Concepts, as well as Metabolism, Education, Health Promotion, and Clinical Judgment, to content-specific exemplars presented in this course. The student must achieve proficiency in a variety of nursing skills and attitudes, inclusive of psychomotor skills and affective interactions, pharmacotherapeutic education, and patient-centered, holistic care in order to successfully complete this course.
Prerequisite: Fundamentals of Professional Nursing

NU250 Nursing Care of the Elderly
100 hours, 6 credits
This course explores caring for the elderly client in theory and clinical settings. The content builds on previous learning experiences in order to plan and implement care in a comprehensive approach to normal aging. Content addresses physiological, psychological and cognitive functioning, review legal and ethical issues, and examine the normal aging process.
Prerequisite: Mental Health Nursing

NU254 Professional Nursing II
110 hours, 6 credits
NU254 Lecture (32.5 hours, 3 credits) NU254L Lab (10 hours, 1 credit) NU254LL Clinical (67.5 hours, 2 credits)
This course is comprised of a theory, lab, and clinical component where students are building on the fundamental concepts and nursing abilities developed in Professional Nursing I. Emphasis is placed on concepts such as intracranial regulation, sensory perception, glucose regulation, metabolism, and immunity. This course will continue to build on previous concepts with a special emphasis on mobility, elimination, cardiovascular regulation, integrity, perfusion, fluid/electrolyte and acid/base balance, gas exchange, and thermoregulation. The theoretical basis for Clinical Judgment, as it relates to Communication, Interdisciplinary Collaboration, and Evidence-Based Practice in the Clinical Setting, is required for successful completion of this course. The student must demonstrate increasing proficiency in all knowledge, skills, and attitudes necessary to provide, safe, quality care for a diverse set of clients across the lifespan.
Prerequisite: Professional Nursing I

NU255 Maternal Child Health Nursing
60 hours, 4 credits
NU265 Lecture (30 hours, 3 credits) NU265LL Clinical (30 hours, 1 credit)
This course consists of both a theory and clinical component that focuses on the knowledge, Skills, and Attitudes required to function in the appropriate role of the beginning Professional Registered Nurse in an acute care Obstetrics/Maternity Setting, Pediatric Setting, or similar environment. Emphasis is placed on Reproduction as well as Growth and Development. Special Emphasis is placed on Surgical Integrity, Glucose Regulation, Infection Control, and Patient-Centered Care as it applies to this diverse group of clients. The theoretical basis for Complementary and Alternative Medicine, in conjunction with specific pharmacologic therapies for these clients will be examined. Students are required to critically apply all previously introduced Health and Wellness Concepts, as well as Metabolism, Education, Health Promotion, and Clinical Judgment, to content-specific exemplars presented in this course. The student must achieve proficiency in a variety of nursing skills and attitudes, inclusive of psychomotor skills and affective interactions, pharmacotherapeutic education, and patient-centered, holistic care in order to successfully complete this course.
Prerequisite: Professional Nursing I

NU280 Role, Scope, Quality, and Leadership in Professional Nursing
80 hours, 4 credits
NU280 Lecture (20 hours, 2 credits) NU280LL Clinical (60 hours, 2 credits)
This course is comprised of a theory and clinical component where students are able to demonstrate the knowledge, skills, and attitudes necessary to function effectively throughout the Professional Nursing Program. Emphasis is placed on Clinical Judgment, Professionalism, Quality Improvement, and Leadership. In order to successfully complete this course, the student must exhibit appropriate characteristics in the clinical setting related to Communication, Interdisciplinary Collaboration, Advocacy, Patient-Centered Care, Evidence-Based Practice, Education, Health Promotion, and Motivational Wellness. The student must also demonstrate proficiency in all knowledge, skills, and attitudes necessary to provide, safe, quality care for a diverse set of clients across the lifespan at the level of a beginning graduate Professional Registered Nurse to complete this course.
Prerequisite: Professional Nursing III

NU294 Professional Nursing Capstone
20 hours, 2 credits
This capstone course reflects on the student’s journey through the profession effectively in multiple roles, prepares the student for licensure, and mentors the student on transition to practice. The Concept-Based Framework is reviewed, along with the Professional Nursing Competencies with special emphasis on Professionalism, Individual Functional Ability, and Leadership. Students critically evaluate the knowledge, skills, and attitudes needed to successfully complete the NCLEX-RN and safely transition to a beginning Graduate Professional Registered Nurse role.
Pre or Co-requisites: Professional Nursing II; Role, Scope, Quality, and Leadership in Professional Nursing

NU295 Leadership in Nursing
80 hours, 4 credits
This capstone course examines the role of the professional nurse in leadership settings. Content includes review of leadership and management issues, responsibilities of team leader and nurse manager, in addition to issues such as managing multiple patients and disaster nursing. This course has both a theory and a clinical component.
Prerequisite: Mental Health Nursing

NU278 Professional Nursing III
117.5 hours, 6 credits
NU278 Lecture (30 hours, 3 credits) NU278LL Lab (5 hours, 0.25 credits) NU278LL Clinical (82.5 hours, 2.75 credits)
This course is comprised of a theory, lab, and clinical component where students are completing their development of the fundamental concepts and nursing abilities required for the Professional Registered Nurse Role. Emphasis is placed on concepts such as Cellular Regulation, End-of-Life Integrity, Complementary and Alternative Therapies, and Crisis/Disaster Nursing. This course will continue to build on previous concepts with a special emphasis on Cardiovascular Integrity, Perfusion, Gas Exchange, Fluid/Electrolyte and Acid/Base Balance, and Tissue Integrity. The theoretical basis for Clinical Judgment, as it relates to Patient-Centered Care, Evidence-Based Practice, and Nursing Informatics in the Clinical Setting is required for successful completion of this course. The student must also demonstrate increasing proficiency in knowledge, skills, and attitudes necessary to provide, safe, quality care for a diverse set of clients across the lifespan.
Prerequisite: Professional Nursing II

NU290 Comprehensive Pharmacology Lab
80 hours, 4 credits
NU290 Lecture (20 hours, 2 credits) NU290LL Clinical (60 hours, 2 credits)
This course provides an overview of essential concepts and principles of pharmacology as applied in the nursing management of client care, to include an overview of drug classifications, drug actions/interactions, and therapeutic and adverse reactions to medications. Students demonstrate proficiency with the use of problem-solving skills and mathematical calculations necessary to perform the nursing role. This course provides the foundation for subsequent coursework.
Prerequisite: none

NU144 Comprehensive Pharmacology Lab
40 hours, 2 credits
This course prepares the student to administer medications. The six roles of the individual, dosage calculation, routes of administration, proper use and storage of medications, patient observation and documentation are included. Clinical skills are practiced in the nursing lab. This course includes the practice and demonstration of medication administration.

Prerequisite: none

NU1211C Adult Nursing I
230 hours, 13 credits
This is the first of three adult-health nursing courses. In this course, students continue to develop their role as a member of the profession of nursing as a provider of care to clients across the lifespan with uncomplicated medical issues. This course focuses on the physical, biological, and social sciences; and the role of the nurse as provider of care, communicator, teacher, manager, and member of a profession who is expanding and providing the framework for clinical applications and evaluation. The role of the nurse as provider of care, communicator, teacher, manager, and member of a profession who is expanding and providing the framework for clinical applications and evaluation.

Prerequisite: none

NU265 Maternal Child Health Nursing
80 hours, 4 credits
This course covers the principles of mental health nursing noting the application of psychiatric and social issues in a variety of settings. This course has both lecture and clinical content. Content includes therapeutic communication, pathophysiology, pharmacology, current treatments using evidence-based practice and the nursing process as the framework.
Prerequisites: Adult Medical Surgical Nursing II; Clinical Nursing Skills II

NU1211C Adult Nursing I
230 hours, 13 credits
This is the first of three adult-health nursing courses. In this course, students continue to develop their role as a member of the profession of nursing as a provider of care to clients across the lifespan with uncomplicated medical issues. This course focuses on the physical, biological, and social sciences; and the role of the nurse as provider of care, communicator, teacher, manager, and member of a profession who is expanding and providing the framework for clinical applications and evaluation. The role of the nurse as provider of care, communicator, teacher, manager, and member of a profession who is expanding and providing the framework for clinical applications and evaluation.

Prerequisite: none

NU144C Maternal-Child Nursing
220 hours, 12 credits
This course covers the principles of mental health nursing noting the application of psychiatric and social issues in a variety of settings. This course has both lecture and clinical content. Content includes therapeutic communication, pathophysiology, pharmacology, current treatments using evidence-based practice and the nursing process as the framework.
Prerequisites: none
COURSE DESCRIPTIONS

RASMUSSEN COLLEGE

NUR 2711C Adult Nursing II
230 hours, 4 credits
This is the second of three adult health nursing courses. The focus of this course is on the care of adults with altered health status in acute care and psychiatric settings. This course continues to develop their role as a member of the profession of nursing as a provider of care to clients with more complex medical-surgical alterations in health. Emphasis is placed on knowledge and skills relating to advanced adult healthcare in medical-surgical and psychiatric settings. The course curriculum includes concepts that are socially diverse, cultural, and ethnic in nature with regard to the care of clients across the lifespan to include both adult and geriatric clients. This course integrates community health concepts and prepares entry level nurses to work effectively in multiple roles, with individuals, families, and communities; addressing the varied clients and different settings in which nurses practice. The role of the nurse as provider of care, communicator, teacher, manager, and member of a profession are expanded and provide the framework for clinical application and evaluation. Theoretical knowledge and principles are applied in the skills laboratory and clinical setting.

Prerequisites: Foundations of Nursing; Comprehensive Pharmacology; Adult Nursing I

NUR 2712C Adult Nursing III
90 hours, 3 credits
This is the third of three adult health nursing courses. The focus of this course is on the care of adults with altered health status. This concentrated clinical course in an acute care setting promotes the student’s transition from student to graduate with its emphasis on management of care and learning functional health patterns, professional behaviors, communication, Clinical decision making, caring interventions, teaching and learning, collaboration and management. This course integrates a broad in-depth application of the nursing process in the clinical management of group of patients. The course curriculum includes concepts that are socially diverse, cultural, and ethnic in nature with regard to the care of clients across the lifespan to include both adult and geriatric clients. This course integrates community health concepts and prepares entry level nurses to work effectively in multiple roles, with individuals, families, and communities; addressing the varied clients and different settings in which nurses practice. The role of the nurse as provider of care, communicator, teacher, manager, and member of a profession are expanded and provide the framework for clinical application and evaluation. Theoretical knowledge and principles are applied in the skills laboratory and clinical setting.

Prerequisites: Foundations of Nursing; Comprehensive Pharmacology; Adult Nursing I

NUR 2820 Nursing Role and Scope
90 hours, 3 credits
This is the second of three adult health nursing courses. The focus of this course is on the role of the registered nurse are stressed. The role of ethical, and professional responsibilities the role of the registered nurse. Client care, decision making, caring interventions, teaching and learning, collaboration, and managing care activities include: comparative analysis of communication styles, fostering open communication, family roles, dietary preferences, safety and concerns associated with cultural beliefs, values and practices of cultural norms and the impact on health care practice. Nursing interventions that integrate and examine evidence based practice related to various cultural beliefs will be discussed. The importance of incorporating a holistic view in the care and treatment of the patient will be demonstrated within this course.

Prerequisites: Quality and Safety in Nursing Practice; Health Assessment

NUR 3816 Dimensions of Professional Nursing
40 hours, 4 credits
This course investigates the evolution of nursing with an emphasis on professional values, standards and ethics. Students will explore professional roles and responsibilities that are critical to evidence-based nursing practice. Opportunities will be presented that provide for strengthening critical thinking skills and the development of a personal philosophy statement of nursing practice.

Prerequisites: Current, unencumbered RN license that is valid in the United States; completion of all college prep work, including a minimum of 52 credit hours of transferable general education course work required for admission to the program

NUR 4232 Integration of Evidence-Based Practice and Research in Nursing
40 hours, 4 credits
This course is designed to support the baccalaureate nurse scholar who contributes to the science of nursing practice by translating current evidence into practice. Students will study the use of evidence based practice models to identify practice issues, search and critique published research, and to propose creative, innovative, or evidence-based solutions to clinical practice problems. Emphasis is on developing strategies to incorporate evidence into practice and the use of evidence to improve professional nursing practice.

Prerequisites: Research Methods; Successful completion of all other BSN courses

NUR 4529 Public Health and Community Nursing
40 hours, 4 credits
This course provides an overview of concepts that impact the professional role of the baccalaureate nurse in the community setting. This course is designed to provide students with the opportunity to synthesize and comprehensively apply and integrate theoretical and clinical experiences from previous nursing courses into a capstone experience. Students will use critical thinking skills and evidence-based practice to promote patient centered nursing care that encompasses quality and safety. Students will plan and implement a practice experience consistent with the professional standards of the baccalaureate nurse. The capstone preceptorship supports the role transformation of students and promotes clinical competence at the BSN preparation level.

Prerequisites: Successful completion of all other BSN courses and/or Co-requisite: Leadership and Management in Nursing

PB 115 Introduction to Laboratory Processing
50 hours, 4 credits
Pre or Co-requisite: Public Health and Community Nursing

PB 115 Lecture (20 hours, 2 credits)
PB 115 Lab (20 hours, 1 credit)
This course will introduce the role of the phlebotomist in a clinical laboratory setting. Students will learn how to adhere to safety and compliance regulations related to specimen collection and processing. This course also focuses on pre-analytic factors of the sample or patient as they relate to and influence laboratory procedures.

Prerequisite: none
PL214 Contracts: Managing Legal Relationships 40 hours, 4 credits
This course will provide students with a practical approach to the law of contracts. The class discussions and assignments will include analyzing contracts, breach of contracts, and the remedies provided for a breach of contract.
Prerequisite: Introduction to Law and the Legal System or enrolled in Certificate PL145 Paralegal Ethics 40 hours, 4 credits
This course provides a strong theoretical and practical foundation for solving ethical dilemmas. Students will gain a realistic picture not only of what ethical questions arise in paralegal studies, but also how to resolve these issues with sound moral decisions and proper responses.
Prerequisite: Introduction to Law and the Legal System or enrolled in Certificate PL215 Real Estate Law 40 hours, 4 credits
This course provides the basic concepts of the law of real property enabling the student to perform connected duties in a law office, title company, or financial institution. Upon completion of the course, the student will be able to prepare purchase and sales agreements, deeds, mortgages, closing statements with renderings and other real estate related documents. The student will have a working knowledge of title searches and a thorough understanding of closing procedures. The student will also become familiar with mortgage foreclosures, landlord-tenant law, and zoning regulations.
Prerequisite: Introduction to Law and the Legal System
PL216 Corporate Law 40 hours, 4 credits
This course provides students an overview of the formation, operation, and dissolution of the corporate entity. Stockholders rights and remedies as corporate owners will be examined. Corporate documents and corporate formalities will be discussed.
Prerequisite: Introduction to Law and the Legal System
PL226 Law Office Technology: Cyberspace and the Paralegal Profession 40 hours, 4 credits
This course introduces students to the fundamentals of how to use computer technology to accomplish tasks performed by paralegals in a law office. Students will be introduced to and given the opportunity to utilize law-oriented computer software applications. Students will be exposed to exercises designed to provide the skills utilized by paralegals in file management, time, and document management and computer-based legal research and document movement.
Prerequisite: Introduction to Law and the Legal System
PL228 Torts: Auto Accidents and Other Legal Injuries 40 hours, 4 credits
This course examines the fundamentals of tort law and provides a basic understanding of the principles of tort litigation. Through classroom discussions, projects and supervised library research, students will develop an overview of causes of actions in torts and their relevancy to the paralegal.
Prerequisite: Introduction to Law and the Legal System
PL230 Family Law 40 hours, 4 credits
This course is designed to teach the student to handle client interviews, to draft necessary pleadings and supporting documents, and to perform work that is related to the practice of family law and domestic relations matters. The student will develop an understanding of the law relating to marriage, cohabitation, divorce, annulment, custody and support, adoption, guardianship and paternity. Students will draft pleadings and documents including antenuptial and property settlement agreements.
Prerequisite: Introduction to Law and the Legal System
PL235 Legal Research 40 hours, 4 credits
This course introduces the Legal Research process for paralegals. An overview of legal source materials and how and when they are incorporated in the legal research process will be examined. Students will develop information literacy skills specific to the Paralegal field by working with primary sources, state and federal statutory codes and other secondary sources, like legal encyclopedias, treatises, and state specific practice books. Students will develop skills in legal application, analysis, and synthesis skills by identifying and classifying the best sources that apply to legal problems. Students will evaluate the relevance of sources for legal problems and critically evaluate the level of authority of various legal sources.
Prerequisite: Introduction to Law and the Legal System or enrolled in Certificate PL240 Legal Writing 40 hours, 4 credits
After examining the sources of law and the structure of the federal and state court systems, students will be introduced to case and statutory analysis and to an understanding of the role of the paralegal in performing substantive legal analysis and writing tasks. They will learn how to analyze and synthesize written opinions. Students will use the results of their research from the Legal Research course in connection with at least three (3) significant writing projects, including memoranda of law. High level communication skills will be developed to effectively communicate in writing to different potential readers, including judges, attorneys, judges in an office, trial court judges, and appellate panel judges. Analysis and preparation of high level legal content as well as formatting, citation rules, and other items needed for writing in this field will be developed. Students will organize an appellate brief which requires specific, rule based, formatting and structural content. This content includes items such as tables of cases and other authorities, a table of contents, statement of the case, argument, and conclusion.
Prerequisites: Legal Research; English Composition
PL280 Paralegal Capstone 50 hours, 5 credits
This course will provide students with an opportunity to integrate learning, skills, and theoretical knowledge from the Paralegal program in the form of real-world paralegal activities simulated in the online environment. Interview videos will be reviewed and analyzed, paralegal files completed, and “paperless office” and “paperless office” methods will be practiced.
Prerequisite or Co-requisite: Law Office Technology: Cyberspace and the Paralegal Profession; Students must be in their last or second-to-last quarter.

PL290 Paralegal Internship 130 hours, 5 credits
This course provides the student with the opportunity to gain practical work experience under the supervision of an attorney. The student must periodically submit written reports to the supervising instructor describing his/her experiences during the internship. The student is supervised by his/her supervisor at the conclusion of the internship.
Prerequisite: Students must be enrolled in their last or second-to-last quarter
PN100 Nursing Foundations 100 hours, 6 credits
This introductory course is comprised of both a theory and a clinical component. Students are introduced to the concepts and nursing centered care based upon evidence and quality. Emphasis is placed on safety, psychomotor skills, therapeutic communication, and adult growth and development. The student must achieve a variety of nursing competencies to successfully complete this course.
Prerequisite: Program admission
PN101 Practical Anatomy and Physiology I: Comprehensive Pharmacology: Comprehensive Pharmacology Lab
PN11 Fundamentals of Practical Nursing 112.5 hours, 6 credits
PN11 Lecture (30 hours, 3 credits)
PN11 Lab (15 hours, 1 credit)
PN11LL Clinical (67.5 hours, 2.5 credits)
This course is comprised of a theory, lab, and clinical component. Students are introduced to the fundamental concepts and nursing abilities required to meet basic health and wellness needs. The theoretical basis for nursing judgment, patient-centered care, growth and development, and basic physiological concepts are presented. Emphasis is placed on knowledge, skills, and attitudes needed to provide safe, quality care for a diverse set of clients across the lifespan. Special emphasis is placed on teamwork, computer, and nursing informatics as it pertains to the healthcare infrastructure. The student must demonstrate proficiency in a variety of nursing skills in order to successfully complete this course.
Prerequisite: Admission to the Practical Nursing Program Pre or Co-requisite: Introduction to Practical Nursing
PN105 Introduction to Practical Nursing 20 hours, 2 credits
This course introduces the student to key concepts of Practical Nursing. The student will be exposed to the practical nursing expectations and scope of practice in diverse healthcare settings. Also included are aspects of patient-centered care based upon evidence and quality. The Concept-based framework for the Practical Nursing Program is introduced, along with the fundamental QSEN Core Competencies. Special emphasis is placed on Teamwork, Communication, and Nursing informatics. Students will delve into the knowledge, skills, and attitudes needed to practice safely in the nursing profession by discovering their own learning styles and personal identities.
Prerequisite: Admission to the Practical Nursing Program
PN115 Nursing I
90 hours, 5 credits
This course is an introduction to medical/surgical nursing and is comprised of both a theory and clinical component. Content includes nursing documentation, medication administration, the nursing process, and trans-cultural considerations. Emphasis is placed on basic pathophysiology, diagnostic procedures, common treatment modalities, nursing interventions, and critical-thinking skills for patients with disorders of the cardiovascular and respiratory systems. Prerequisites: Nursing Foundations; Comprehensive Pharmacology; Comprehensive Pharmacology Lab; Human Anatomy and Physiology I Co-requisite: Psychosocial Nursing

PN120 Psychosocial Nursing
80 hours, 4 credits
This course presents an overview of the underlying principles of psychiatric/mental health nursing and how those concepts transcend practice settings; it is comprised of both a theory and clinical component. Content includes surgical care, fluid and electrolyte balance, pain management, and care environments. Emphasis is placed on basic pathophysiology, diagnostic procedures, common treatment modalities, nursing interventions, and critical-thinking skills for patients with disorders of the reproductive, musculoskeletal, urologic, and endocrine systems. Prerequisite: none

PN129 Practical Nursing I
110 hours, 6 credits
PN129 Lecture (32.5 hours, 3 credits) PN129L Lab (15 hours, 1 credit) PN129LL Clinical (67.5 hours, 2 credits)
This course is comprised of a theory, lab, and clinical component where students are building beginning Practical Nurse skill level. The theoretical emphasis is placed on Absorption, Distribution, Metabolism, and Excretion (ADME), as well as the current “rights of medication administration,” and basic dosage calculation. Patient education and motivational wellness will be introduced. The course will continue to build upon critical thinking concepts and nursing judgment to ensure basic safety in the administration of medications at a beginning Practical Nurse skill level. The student must demonstrate proficiency in a variety of clinical skills, related to medication administration within the lab setting, in order to successfully complete this course. Pre or Co-requisite: Structure and Function of the Human Body; College Algebra

PN130 Maternal - Child Nursing
80 hours, 4 credits
This course introduces maternal-child nursing and is comprised of both a theory and clinical component. Students explore concepts relevant to the care of the obstetrical, newborn, and pediatric patient as well as sexuality and fertility issues. Emphasis is placed on family-centered care. Obstetrical content includes progression through pregnancy, childbirth, and postpartum care including newborn and high-risk infant care. Pediatric content includes concepts of growth and development and fundamentals of health maintenance, health promotion, and disease prevention. Prerequisite: Nursing I Co-requisite: Nursing II

PN135 Nursing III
120 hours, 6 credits
This course is a continuation of Nursing II and is comprised of both theory and clinical components. Emphasis is placed on basic pathophysiology, diagnostic procedures, common treatment modalities, nursing interventions, and critical-thinking skills for patients with disorders of the digestive, blood, lymph, integument, immune, and neurological systems. Modalities of care across the healthcare system are discussed. Prerequisites: Nursing II; Maternal - Child Nursing; Nutrition and Diet Therapy Co-requisites: Nursing Seminar; Geriatric Nursing PN138 Basic Pharmacology
40 hours, 3 credits
PN138 Lecture (20 hours, 2 credits) PN138L Lab (20 hours, 1 credit)
This course is comprised of a theory and lab component where students acquire knowledge, skills, and attitudes to safely and effectively provide pharmacologic therapies to patients. Theoretical Emphasis is placed on Absorption, Distribution, Metabolism, and Excretion (ADME), as well as the current “rights of medication administration,” and basic dosage calculation. Prerequisite: beginning Practical Nursing I

PN146 Practical Nursing II
110 hours, 6 credits
PN146 Lecture (32.5 hours, 1 credit) PN146L Lab (10 hours, 1 credit) PN146LL Clinical (67.5 hours, 2 credits)
This course is comprised of a theory, lab, and clinical component where students are building on the fundamental concepts and nursing abilities developed in Practical Nursing I. Emphasis is placed on concepts such as Surgical Integrity, Pain Management, and Glucose Regulation. This course will continue to build on previous concepts with a special emphasis on Fluids, Electrolyte and Acid/Base Balance, Elimination, Mobility, and Infection Control. The theoretical basis for Nursing Judgment, as it relates to Communication and Teamwork in the Clinical Setting, is required for successful completion of this course. The student must also demonstrate increasing proficiency in all knowledge, skills, and attitudes necessary to provide, safe, quality care for a diverse set of clients across the lifespan in order to successfully complete the series. Prerequisite: none

PN148 Gerontologic Nursing
30 hours, 3 credits
This course is comprised of a theory component where students acquire knowledge, skills, and attitudes to safely and effectively support the Functional Ability of the aging adult. Emphasis is placed on concepts such as Emotional and Cognitive Integrity, Neurological Adaptation, and End-of-Life Integrity. This course will continue to build on concepts required to meet basic health and wellness needs that are specific to the aging adult. Communication, as well as Nursing Ethics and Law as it applies to this specific population. Students are expected to apply Nursing Judgment and Critical Thought to principles presented in this course throughout concurrent and future Nursing Lab and Clinical Experiences. Prerequisite: Fundamentals of Practical Nursing Pre or Co-requisites: Basic Pharmacology; Nutritional Principles in Nursing

PN150 Geriatric Nursing
80 hours, 4 credits
This online course explores care for the older adult and is comprised of both a theory and clinical component. The content builds on previous learning experiences to incorporate a more in-depth study of the normal aging process to assure comprehensive nursing care for the older adult patient. Content will address the psychological, cultural, spiritual, legal, and ethical aspects related to geriatric nursing care. Prerequisites: Nursing II; Maternal - Child Nursing; Nutrition Co-requisites: Nursing III; Nursing Seminar

PN1545 Nursing Seminar
20 hours, 2 credits
This course examines the role of the practical nurse. Content includes the history of nursing, practical nursing scope of practice, legal and ethical considerations, and NCLEX-PN review. Content is designed to facilitate transition from the role of student to the role of graduate practical nurse. Emphasis is placed on assessing personal accountability for nursing actions. The importance of participation in continuing educational activities is emphasized. Prerequisite: none

PN146 Practical Nursing II
110 hours, 6 credits
PN146 Lecture (32.5 hours, 1 credit) PN146L Lab (10 hours, 1 credit) PN146LL Clinical (67.5 hours, 2 credits)
This course is comprised of a theory, lab, and clinical component where students are building on the fundamental concepts and nursing abilities developed in Practical Nursing I. Emphasis is placed on concepts such as Surgical Integrity, Pain Management, and Glucose Regulation. This course will continue to build on previous concepts with a special emphasis on Fluids, Electrolyte and Acid/Base Balance, Elimination, Mobility, and Infection Control. The theoretical basis for Nursing Judgment, as it relates to Communication and Teamwork in the Clinical Setting, is required for successful completion of this course. The student must also demonstrate increasing proficiency in all knowledge, skills, and attitudes necessary to provide, safe, quality care for a diverse set of clients across the lifespan in order to successfully complete the series. Prerequisite: none

PN152 Family Nursing
30 hours, 4 credits
PN152 Lecture (30 hours, 3 credits) PN152LL Clinical (30 hours, 1 credit)
This course consists of both a theory and clinical component that focuses on the Knowledge, Skills, and Attitudes required to function in the appropriate role of the Practical Nurse in a Family Health Clinic, Pediatric Clinical Setting, or similar environment. Emphasis is placed on Reproduction as well as Growth and Development. Special Emphasis is placed on Surgery, Nutrition, Infection Control, and Patient-Centered Care as it applies to this diverse group of clients. The theoretical basis for Complementary and Alternative Medicine, in conjunction with specific pharmacologic therapies for these clients will be introduced. Students are required to critically apply all previously introduced Health and Wellness Concepts, as well as Metabolism and Nursing Judgment, to content-specific examples presented in this course. The student must achieve proficiency in a variety of nursing skills and attitudes, inclusive of psychomotor skills and affective interactions in the clinical setting, in order to successfully complete this course. Prerequisite: Practical Nursing I

PN161 Family Nursing
60 hours, 4 credits
PN161 Lecture (30 hours, 3 credits) PN161L Lab (10 hours, 0.5 credit) PN161LL Clinical (75 hours, 2.5 credits)
This course reflects on the student’s journey through the Practical Nursing Program, prepares the student for licensure, and mentors the student on transition to practice. The Concept-Based Framework is reviewed, along with the fundamental QSEN Core Competencies with special emphasis on Quality Improvement, Professionalism, and Leadership. Students will delve into the knowledge, skills, and attitudes needed to successfully complete the NCLEX-PN and safely transition to a beginning Graduate Practical Nurse role. Prerequisite: Practical Nursing I
PT105 Introduction to Pharmacy 40 hours, 4 credits
An introduction to the technician's role in pharmacy practice. The student will gain a basic knowledge of chemistry and become knowledgeable in correct use of CPR. Emphasis will be on patient profiles, receiving and interpreting drug orders, routes of administration, dosage forms, and brand versus generic drugs. The importance of accuracy will be addressed along with methods of avoiding medication errors.
Prerequisite: none

PT111 Pharmacy Technician Overview 40 hours, 4 credits
This course is an overview of all pharmacy technician certificate program courses and concepts, with an emphasis on the reviewing and preparation of materials which comprise the Pharmacy Technician Certification Board examination.
Prerequisite: Pharmacy Technician student in last or second-to-last quarter

PT120 Pharmacy Math and Dosages 40 hours, 4 credits
This course will provide the student with the necessary math skills to effectively work within a pharmacy setting. In addition to ratios and proportions, dosage calculations, and conversions, the student will develop knowledge and skills to perform business math functions related to retail pharmacy practice.
Prerequisite: Introduction to Pharmacy

PT125 Pharmacy Software/Automation/Insurance Billing 40 hours, 3 credits
Hands-on experience using pharmacy software will be gained via entering patient profiles and prescriptions. The student will learn how to process prescriptions, understand common insurance rejection codes, and gain knowledge of how to solve rejections. Automated ordering, receiving, and maintenance of inventory will be addressed. Students will gain understanding of the various payment methods received by retail pharmacies. The student will explore various automation machines used within pharmacy settings.
Prerequisites: Pharmacy Math and Dosages

PT235 Pharmacy Technician Practicum I – Outpatient/Retail 90 hours, 3 credits
This course offers supervised practical experience in outpatient settings with a minimum of 90 hours of externship experience in the unit dose-area of a pharmacy. The practicum will be under the direction of practicing pharmacists and pharmacy technicians. This practicum will allow the student to gain experience as a pharmacy technician in an actual pharmacy setting and is essential to training.
Prerequisites: Pharmacy Technician Practicum I – Outpatient / Retail; Pharmacy Technician Practicum II – Unit Dosage / IV

PT240 Unit Dose and Medication Preparation 40 hours, 3 credits
In this course, the student will apply knowledge of medication charts and pharmacy math to correctly dispense and chart delivery of patient medications. Emphasis is on correctly filling orders with correct drug, dosage, and frequency. The course will stress aseptic techniques and the maintenance of sterile conditions. The student will learn to read an IV label, select appropriate additives and base solutions, and properly prepare the prescribed IV compound.
Prerequisites: Introduction to Pharmacy; Pharmacy Math and Dosages

PT250 Pharmacy Technician Capstone 30 hours, 3 credits
This course is an overview of all pharmacy technician program courses and concepts, with an emphasis on the reviewing and preparation of materials which comprise the Pharmacy Technician Certification Board examination.
Prerequisite: Pharmacy Technician student in last or second-to-last quarter

SI115 Keyboarding I 40 hours, 3 credits
This course introduces students to the keyboard and basic formatting for business documents. An objective of 25 wpm on 5-minute timed writings with 5 or fewer errors is the course goal.
Prerequisite: none

SI220 Word for Windows 40 hours, 3 credits
This course is designed to investigate the advanced applications and concepts available in Microsoft Office Word. Students will be introduced to word processing features ranging from the creation of new documents to mail merge and web pages. This course is designed to help prepare students for the Word portion of the MOS certification exam.
Prerequisite: Computer Applications and Business Systems Concepts

SD101 Discrete Structures for Computer Science 40 hours, 3 credits
This course provides a broad understanding of discrete mathematical topics that form the basis of computer science. Topics to be covered include truth tables, logical propositions, elements of set theory, as well as basic notions of functions and mathematical induction. Students will explore the logical constructs that are the underlying model of discrete systems.
Prerequisite: Programming Fundamentals

SD140 Mobile Application Development 40 hours, 3 credits
In this course, students will understand the development cycle of programs and applications for mobile devices. Utilizing the Java language, students will create both standalone programs as well as program suites for mobile marketplace commerce systems where applications can be deployed. Instruction will focus on mobile development best practices for ease and efficiency of program development.
Prerequisite in the Software Application Development AS Degree program: Java I
Prerequisite in the Game and Simulation BS Degree program: Web Application Development

SD225 Object-Oriented Programming 40 hours, 3 credits
This course will provide students with an understanding of the basic concepts of object-oriented programming including encapsulation, inheritance, and polymorphism. Students will explore the uses of class templates as well as their attributes, behaviors, and the methods that can be applied to them. Programs will be developed and implemented utilizing the Java programming language.

Prerequisite: Programming Fundamentals

ST100 Fundamentals of Surgical Technology 70 hours, 4 credits
This course will orient the student to surgical technology and prepare them for scrub and circulator duties as well as Surgical Procedures I, and Surgical Practicum I and II. Topics include sterilization and disinfection, infection control, safety standards, equipment, biocultural, surgical, supplies and instrumentation.
Prerequisites: Medical Terminology; Introduction to Human Biology

ST105 Surgical Procedures I 70 hours, 4 credits
This course is designed to provide the student with a clinical experience that includes a solid introduction to the operating room, and to scrub and circulating routines. This course functions to expand and apply knowledge gained in the Surgical Procedures courses. One of the assumptions of this curriculum is that the student who has passed the Clinical Readiness portion of the program will be ready to apply knowledge by scrubbing and circulating in a supervised setting beginning Week 1 of the current quarter.
Prerequisite: Successful completion of all ST core courses except Surgical Tech Practicum I, Career Development and Seminar courses

ST120 Surgical Pharmacology 20 hours, 2 credits
Students in this course will demonstrate an understanding of pharmacology and anesthesia concepts and their applications related to the field of surgical technology. They will study anesthesia agents, methods, and techniques of administration. They will also be able to define terminology related to pharmacology, identify medications used on surgical patients, and describe safe practices of medication handling in the surgical environment.

Prerequisites: Medical Terminology; Introduction to Human Biology

ST125 Surgical Microbiology 20 hours, 2 credits
This course has been designed to educate the student in the treatment of the disease-causing organisms that may present with a surgical patient or develop post-surgery as an acquired infection. This course specifically addresses the needs of the surgical technologist in maintaining aseptic techniques and caring for surgical patients before, during, and after surgery.
Prerequisites: Medical Terminology; Human Anatomy and Physiology I

ST209 Surgical Procedures II 70 hours, 4 credits
This course further expands upon the duties and responsibilities as the role of scrub in the field of surgical technology. Surgical areas explored and applied in this course include gynecologic, orthopedic, cardiothoracic, peripheral vascular, and neurosurgery. This course is a preparatory class for Surgical Procedures III and Surgical Practicum I and II.

Prerequisite: Surgical Procedures I

ST214 Surgical Procedures III 70 hours, 4 credits
This course will expand on the duties and responsibilities as the role of scrub in the field of surgical technology. Surgical areas explored and applied in this course include, gynecotmy, orthopedic, cardiothoracic, peripheral vascular, and neurosurgery. This course is a preparatory class for Surgical Practicum I and II.

Prerequisite: Surgical Procedures II

ST215 Surgical Tech Practicum I 250 hours, 8 credits
This course is designed to provide the student with a clinical experience that includes a solid introduction to the operating room, and to scrub and circulating routines. This course functions to expand and apply knowledge gained in the Surgical Procedures courses. One of the assumptions of this curriculum is that the student who has passed the Clinical Readiness portion of the program will be ready to apply knowledge by scrubbing and circulating in a supervised setting beginning Week 1 of the current quarter.

Prerequisite: Successful completion of all ST core courses except Surgical Tech Practicum I, Career Development and Seminar courses

ST220 Surgical Tech Practicum II 250 hours, 8 credits
This course is designed to provide the student with a clinical experience that includes a solid introduction to the operating room, and to scrub and circulating routines. This course functions to expand and apply knowledge gained in the Surgical Procedures courses and the Surgical Tech Practicum I clinical experience. One of the assumptions of this curriculum is that the student who has passed Surgical Tech Practicum I will continue to apply knowledge by scrubbing and circulating in a supervised setting beginning Week 1 of this course.

Prerequisite: Surgical Tech Practicum I
W107 Programming Fundamentals 40 hours, 3 credits
Students will work with the Java programming language to learn about Java bytecode programs and how they are executed within a Java virtual machine. Students will study class libraries and gain an understanding of how they perform important computing tasks, how they interact with computer hardware and operating systems, and how they handle deficiencies encountered on computing platforms. Concepts such as Graphical User Interfaces, multimedia development, and web programming will be explored as well as the use of Java programming in the development of applications for mobile devices.
Prerequisite: none

W108 Introduction to Website Design 40 hours, 3 credits
Intended for beginning- to intermediate-level web authors, this course provides an overview of the World Wide Web and an introduction to HTML, JavaScript, and webpage design principles. The course also introduces students to web-authoring tools that facilitate and enhance page creation.
Prerequisite: Computer Applications and Business Systems Concepts

W109 Relational Databases 40 hours, 3 credits
This course covers relational databases and their efficient design. The course will include the definition of tables and indexes, logical and physical design, the E-R model, and transaction management. The use of Structured Query Language (SQL) will be emphasized.
Prerequisite: Programming Fundamentals

W110 JavaScript 40 hours, 3 credits
In this course students learn how to effectively create web pages using the JavaScript programming language. Students will gain exposure to programming, debugging, and testing web pages created with this language. This course builds upon HTML principles.
Prerequisites: Introduction to HTML; Programming Fundamentals

W116 Introduction to Web Design Software 40 hours, 3 credits
This course will introduce beginners to the tools and knowledge needed in creating interesting, usable, and well-designed websites.
Prerequisite: none

W118 Introduction to HTML 40 hours, 3 credits
This course will introduce students to the basics of HTML. Students will learn the latest in HTML, conforming to XML and XHTML coding standards. The course is a step-by-step approach for learning how to create, format, and enhance a webpage using HTML.
Prerequisite: none

W125 Introduction to Visual Basic 40 hours, 3 credits
The students who take this course will learn to create basic applications using Visual Basic .NET. This course incorporates the basic concepts of programming, problem solving, and programming logic, as well as the design techniques of an object-oriented language. Topics in the course include graphic interface design and development, control properties, database access files.
Prerequisite: Programming Fundamentals

W201 Advanced Visual Basic 40 hours, 3 credits
The students who take this course will learn to create applications using Visual Basic .NET. This course incorporates the basic concepts of programming, problem solving, and programming logic, as well as the design techniques of an object-oriented language. Topics in the course include graphic interface design and development, control properties, DBMS, SQL, and ASP.NET.
Prerequisite: Introduction to Visual Basic

W210 Java I 40 hours, 3 credits
Students will work with the Java programming language to learn about Java bytecode programs and how they are executed within a Java virtual machine. Students will study class libraries and gain an understanding of how they perform important computing tasks, how they interact with computer hardware and operating systems, and how they handle deficiencies encountered on computing platforms. Concepts such as Graphical User Interfaces, multimedia development, and web programming will be explored as well as the use of Java programming in the development of applications for mobile devices.
Prerequisite: Object-Oriented Programming

W215 PERL/CGI 40 hours, 3 credits
This course will cover the PERL scripting language, the development of PERL code for web applications, and client/server socket programming using PERL.
Prerequisite: JavaScript

W216 PHP/MySQL 40 hours, 3 credits
This course covers the use of PHP scripting language and the MySQL database to create dynamic webpages. Topics include PHP scripting fundamentals; creating, accessing, and manipulating data with the MySQL database within a PHP program; creating HTML forms; and writing secure PHP programs.
Prerequisite: Java I

W230 Web Programming Capstone 20 hours, 2 credits
This course summarizes key learning throughout the student’s program. Students apply what they have learned by solving a real-world programming problem. This problem-solving exercise encompasses timelines, deadlines, team-building, and communication issues.
Prerequisites: Java I; PERL/CGI. This course is intended to be completed in the student’s last quarter.
ADMISSIONS AND ENROLLMENT PROCEDURES

Congratulations on taking the first steps toward earning your degree and achieving your professional goals. If you haven’t already done so, schedule a time to discuss your educational and career objectives with a member of our admissions team. Contact information is at the end of this document and on our website at rasmussen.edu. Our staff is knowledgeable in helping you select the right major to prepare you for your desired career.

Whether you are looking at a campus-based, online, or a blended learning model, our staff will assist you in planning your course schedule and connect you with our student financial services team to get you started on your journey toward earning a college degree.

When you’ve chosen the program that best meets your needs, apply for admission by submitting or completing the following:

- Application Form
- Attestation of high school graduation or equivalency
- Enrollment Agreement
- Rasmussen College entrance placement exam(s)
- Rasmussen College Experience Course (if applicable)
- All financial arrangements are complete, submitted, and verified
- Criminal background check, some programs require applicants to complete a criminal background check. Please see College Acceptance or Rejection of Application for Admission for more details
- Individuals applying for admission to the Computer Science, Law Enforcement, Medical Laboratory Technician, Software Application Development, Surgical Technologist, or School of Nursing programs must meet program-specific admissions requirements, in addition to all general Rasmussen College admissions requirements. See the admissions policies for these programs online. Academic Information and College Policies.
- International Students are required to submit the following in addition to that above in order to apply for admission to Rasmussen College:
  - TOEFL test score of 500 paper-based or 173 computer-based or 61 for Internet-based.
  - Graduates of high schools outside of the United States need to provide an official transcript or high school diploma along with their standard attainment. Additionally, if the transcript/diploma is not in English, it needs to be evaluated by an academic credential evaluation agency to indicate the student’s education level equivalent to U.S. secondary education standards.
  - Rasmussen College is an approved Student and Exchange Visitor Program (SEVP) School. All international students seeking an F-1 Visa will need to provide evidence that all of the qualifications of the Form I-20 have been met before Rasmussen College will issue an I-20.

Rasmussen College will notify you in writing of your acceptance or rejection. All money paid to the College will be refunded if you are not accepted except any non-refundable test fees required for the Medical Laboratory Technician, Surgical Technologist, or School of Nursing programs. All new students will complete an orientation program prior to beginning classes which includes an experiential course and an informational session covering college policies and services. This required orientation program provides students with valuable tools and knowledge necessary for success at Rasmussen College.

UNLESS OTHERWISE NOTED, THE POLICIES IN THIS CATALOG REPLACE ALL PREVIOUSLY ISSUED VERSIONS.

Rasmussen College Admissions

Nondiscrimination Policy

Rasmussen College is committed to the principle of equal opportunity in education. Rasmussen College admits students without regard to their race, color, sex, national or ethnic origin, religion, sexual orientation, ancestry, disability, veteran status, marital status, parental status, or any other protected status to all the rights, privileges, programs, and other activities generally accorded or made available to students at Rasmussen College. Rasmussen College does not discriminate against individuals on the basis of race, color, sex, national or ethnic origin, religion, sexual orientation, ancestry, disability, veteran status, marital status, parental status, or any other protected status, in the administration of its educational policies, admissions policies, scholarship and loan programs, and other Rasmussen College administered programs and activities. Otherwise qualified persons are not subject to discrimination on the basis of disability.

Student Definition

The word “student” means the student himself or herself if he/she is the party to the contract, or his/her parents or guardian or another person, if the parent, guardian, or other person is party to the contract on behalf of the student.

College Acceptance or Rejection of Application for Admission

The College will notify each applicant in writing of acceptance or rejection based on fulfillment of the following requirements:

- Completed application form and enrollment agreement
- An attestation of high school graduation or equivalency. If any information provided on the attestation is found to be false, the student will be subject to immediate dismissal from the College, all credits will be invalidated and any financial aid will have to be repaid.
- Applicants providing a college transcript indicating a grade of C or higher or a grade of Pass in college-level English and/or mathematics are not required to complete College entrance placement examinations in the corresponding subject area and will not require developmental coursework in areas in which they have previously proven this proficiency.
- Applicants without a conferred associate’s degree or higher and who have not completed a college-level English course are required to complete the Reading & Writing sections of the placement examination. Students who have not completed a college-level math course are required to complete an orientation portion of the placement examination.

Applicants providing a transcript with a conferred associate’s degree or higher are not required to complete the College entrance placement examination in Reading and Writing and will not require remedial coursework in this area. Students providing a transcript with a conferred Associate’s degree or higher indicating a passing grade in college-level mathematics are not required to complete the College entrance placement examination in mathematics and will not require remedial coursework in this area.

Successful completion of Rasmussen College Experience Course. All prospective students, except as noted below, of Rasmussen College must successfully complete the College Experience Course with a cumulative score of 80% or higher in order to continue the enrollment process. Students who do not successfully pass the College Experience Course with a score of 80% or higher on the first attempt will be allowed an additional opportunity to re-take the course three months after the start of the first attempt. The student may be allowed to retake earlier than the three months upon a granted appeal. A third and final attempt may be granted based on two conditions: 1) one year has passed since the original first attempt; 2) a written request is submitted by the student. The following students are exempt from the College Experience Course requirement: graduates of Rasmussen College within the last two years, students who successfully completed the Child Development Associate preparation programs (CDDA) within the last 12 months or entered into a program; students accepted into Surgical Technologist, Medical Laboratory Technician, Law Enforcement Skills, Law Enforcement Academic and Law Enforcement AAS, Nursing, Flex Choice or AcceleratED programs, Early Honors program and Individual Progress and Audit students as well as reentering students who have already successfully completed the College Experience Course.

Students accepted into Surgical Technologist, Medical Laboratory Technician, Law Enforcement Skills, Law Enforcement Academic and Law Enforcement AAS, Nursing, Early Honors program and Individual Progress and Audit students as well as reentering students who have already successfully completed the College Experience Course will be required to successfully complete the Online College Readiness Course.

- All financial arrangements are complete, submitted and verified
- For selected programs, applicants must pass a criminal background check. See additional information.
- Individuals applying for admission to the Computer Science, Law Enforcement, Medical Laboratory Technician, Software Application Development, Surgical Technologist, or School of Nursing programs must meet program-specific admissions requirements, in addition to all general Rasmussen College admissions requirements. See the admissions policies for these programs online. Academic Information and College Policies.
- International Students are required to submit the following in addition to that above in order to apply for admission to Rasmussen College:
  - Graduates of high schools outside of the United States need to provide an official transcript or high school diploma along with their standard attainment. Additionally, if the transcript/diploma is not in English, it needs to be evaluated by an academic credential evaluation agency to indicate the student’s education level equivalent to U.S. secondary education standards.
  - TOEFL test score of 500 paper-based or 173 computer-based or 61 for Internet-based.
  - Rasmussen College is an approved Student and Exchange Visitor Program (SEVP) School. All international students seeking an F-1 Visa will need to provide evidence that all of the qualifications of the Form I-20 have been met before Rasmussen College will issue an I-20. Form I-20 is a government form that tells the U.S. government that you are eligible for F-1 Student Status. It certifies that:
    1) you are or expect to be a full-time student pursuing a degree at Rasmussen College;
    2) you meet our admissions requirements;
    3) you proved to us that you have enough financial resources to study and live in the U.S. without working illegally or suffering from poverty.

In addition to all other admissions requirements, students must be at least 16 years old to enroll at Rasmussen College.

The College reserves the right to reject any applicant on the good faith belief that the applicant is seeking to enroll for any reason other than to obtain an educational degree or credential, or if the College determines that admission of the applicant would create a potential danger or disruption to the College or its existing students, staff and faculty.

In the event of rejection, any monies paid will be refunded in full. The date of acceptance by the College shall be presumed to be the date of delivery of the notice of acceptance, and if delivered by mail, the postmarked date of the letter of acceptance.

- Official and unofficial transcripts and grade reports for courses completed at regionally or nationally accredited institutions of higher learning as recognized by the Department of Education and the Council on Higher Education Accreditation (CHEA) will be accepted.

888-5-RASMUSSEN
ACADEMIC INFORMATION AND COLLEGE POLICIES

ADMISIIONS REQUIREMENTS

Background Checks
For some programs, Rasmussen College requires applicants to pass a background check before admission. Note that “passing” a criminal background check as determined by Rasmussen College, in its sole discretion. The background check is designed to alert students to issues that may impair their ability to complete clinical, externship or practicum activities, obtain employment upon graduation, or accumulate unnecessary student loan debt.

The following programs require a general background check for admission in all states:

- Criminal Justice
- Fire Science
- Health Information Management
- Health Information Technician
- Healthcare Management
- Human Services
- Law Enforcement
- Law Enforcement Academic
- Law Enforcement Skills
- Medical Billing and Coding
- Paralegal
- Pharmacy Technician

The following programs require a general background check for admission in all states except Minnesota. In Minnesota, these programs require a Minnesota Department of Human Services background check for admission:

- Health Sciences
- Medical Assistant
- Medical Laboratory Technician
- Practical Nursing
- Professional Nursing
- Surgical Technologist

In Minnesota, the following programs require a Minnesota Bureau of Criminal Apprehension background check in addition to the general background check for admission:

- Law Enforcement
- Law Enforcement Academic
- Law Enforcement Skills

In Florida, the following programs require a Florida Department of Law Enforcement (FDLE) background check in addition to the general background check for admission:

- Medical Assistant
- Medical Laboratory Technician
- Practical Nursing
- Professional Nursing

Programs listed here may not be available in each state. See program pages in this catalog or program listings on rasmussen.edu for program availability.

General Criminal and FDLE Background Check Process

A student enrolling in any of the general criminal or FDLE background check designated programs must complete a Background Release Form, as well as a Background Check Attestation. Campuses will be notified directly of applicants whose background check results are clear. If the background check reveals a potential problem, Rasmussen College will review the applicant’s background to determine whether the applicant is eligible to start the program. If a student is not eligible for a program, he/she is also not eligible for financial aid while attending school for that program, and any financial aid funds disbursed must be returned to the lender. A student enrolling in a program that requires a criminal background check will not have his/her aid admitted until the student is determined to be eligible either through a Minnesota blue clearance letter or set aside status. The student may be eligible for MDHS funding until the background check process is complete.

A student who receives a MDHS yellow letter may attend class for one quarter while the Minnesota Department of Human Services (MDHS) finalizes its decision. If the MDHS has not finalized its decision by the end of the student’s first quarter of enrollment, the student will be withdrawn from the College and not allowed to continue into a second quarter. If the MDHS finalizes its decision with a blue clearance letter or set aside status, the student may continue until the student successfully going through the appeals process. If a student enrolling in a program that requires a FDLE background check is determined ineligible for admission, the following must be completed:

- All Title IV, state and grant aid (Grants, Scholarships, and VA) must be returned.
- The student must return all course resources.
- If a student is taking transferable general education courses, the student may elect to finish those courses for that quarter, if the student pays for the course resources.

A student enrolling in a program that requires a Minnesota Bureau of Criminal Apprehension (MDHS) background check designated program must complete a Background Release Form, as well as a Background Check Attestation. Campuses will be notified directly of applicants whose background check results are clear. If the background check reveals a potential problem, Rasmussen College will review the applicant’s background to determine whether the applicant is eligible to start the program. If a student is not eligible for a program, he/she is also not eligible for financial aid while attending school for that program, and any financial aid funds disbursed must be returned to the lender. This process may delay a student’s funding until the background check process is complete.

The College will send either a possible issue letter or a pre-adverse action letter to all applicants whose background check reveals a potential problem. A possible issue letter informs applicants that a potential problem revealed in their background check may prevent the student from completing practicum activities, field trip experiences, and/or finding employment in-field after graduation. Applicants who receive a possible issue letter may acknowledge the issue and make an informed decision to continue with the program, or they may choose to change programs.

A pre-adverse action letter informs the student that the College is about to take adverse action by either not allowing the applicant to continue in their current program, or removing a student from a current program, based on the background check. After receiving a pre-adverse letter the student may contact the background check firm directly to dispute the nature or origin of any information contained in the background check. Within seven days of sending the pre-adverse action letter the College will send the student an adverse action letter indicating the action to be taken. The Director of Admissions will contact the applicant to explain the options available. If the applicant wishes to appeal the decision, a written appeal should be submitted to the Director of Admissions. The College will review the appeal and issue a final decision. A student whose appeal has been denied has the right to request a file review. If the applicant is denied, he/she must provide supplemental or additional information to support such a request for reconsideration.

Minnesota Department of Human Services Background Check Process

A student enrolling in any of the MDHS designated programs must complete a Background Release Form, as well as a Background Check Attestation. If a student determines his/her aid is eligible for a program, he/she is also eligible for financial aid while attending school for that program, and any financial aid funds disbursed must be returned to the lender.

A student enrolling in a program that requires a Minnesota Bureau of Criminal Apprehension (MDHS) background check will not have his/her aid admitted until the student is determined to be eligible either through a Minnesota blue clearance letter or set aside status. The student may be eligible for MDHS funding until the background check process is complete.

A student who receives a MDHS yellow letter may attend class for one quarter while the Minnesota Department of Human Services (MDHS) finalizes its decision. If the MDHS has not finalized its decision by the end of the student’s first quarter of enrollment, the student will be withdrawn from the College and not allowed to continue into a second quarter. If the MDHS finalizes its decision with a blue clearance letter or set aside status, the student may continue until the student successfully going through the appeals process. If a student enrolling in any of the MDHS designated programs is determined ineligible for admission, the following must be completed:

- The student must return all course resources.
- The student must submit a Commissioner’s Reconsideration with the MDHS. If the Commissioner sets aside the disqualification, Rasmussen College will allow the student to apply for re-entrance-enrollment for the next subsequent start date.
Applying For Admission into the School of Nursing Practical Nursing or Professional Nursing Programs

Applicants pursuing admittance into a Practical Nursing or Professional Nursing Program must complete the following steps in order to be deemed eligible for admission:

1. Applicants must achieve a score on the College entrance examination acceptable for admission into the College at a level that does not require remedial coursework. Alternatively the applicant must provide a college transcript indicating a grade of C or higher in college-level English and/or Mathematics. Applicants must complete and pass a Minnesota Health Information Management BS Degree program must possess an

School of Nursing and the School of Health Sciences Entrance Exam

Applicants who have successfully completed College entrance placement requirements for the College will be given access by admissions to the online registration process for the School of Health Sciences and School of Nursing Entrance Exam. Here the applicant may register and pay associated fees for the study materials and exam. Based on exam scores, applicants may apply for a School of Health Science or School of Nursing program of study for which they qualify. Applicants not successful after the second attempt must wait 12 months before reapplying to the School of Nursing or to the Medical Laboratory Technician (MLT) or Surgical Technologist (ST) program. Applicants who have previously taken the entrance exam within the past twelve months for another institution may, at their own expense, have the results transferred to Rasmussen College. Transfer of scores will be verified by the Dean of Nursing and/or Academic Dean and will count as one of the two attempts allowed in a 12 month period. Any entrance exam results dated more than 12 months prior to application to Rasmussen College will not be considered.

Current students in other programs wishing to transfer into a course of study requiring the admissions standards outlined above will be required to take or retake the Entrance Exam according to test/re-test limitations and must meet the following composite score thresholds:

- TEAS Score for admissions eligibility for Associate Degree Nursing (ADN) program and Mobility Bridge Entrance Exam: 65% or higher composite score
- TEAS Score for admissions eligibility for Practical Nursing Diploma: 55% or higher composite score
- TEAS Score for admissions eligibility for MLT or ST programs: 55% or higher composite score

Applying for Admission to the School of Health Sciences Associate’s Phlebotomy Specialization Degree or Certificate

In addition to the College entrance requirements, applicants pursuing admittance into the Phlebotomy Certificate or Health Sciences Associate’s degree programs must complete the following prior to being deemed eligible for admission:

- The applicant will be required to have current Basic Life Saving & Cardio Pulmonary Resuscitation Certification with Defibrillator (BLS - CPR with Defibrillator). The certificate must have been issued by either the American Heart Association or American Red Cross Professional Rescuers.
- Critical Care/Screening
- Any additional program specific requirements as specified at the time of enrollment.
- Applicants with prior college credits will receive a transcript evaluation during the admissions process.
- Applicants will receive a letter from the College in the mail confirming acceptance once all admissions requirements have been met, including attendance at programmatic orientation.

Applying for Admission into the School of Health Sciences Associate’s General Specialization Degree

In addition to the College entrance requirements, applicants pursuing admittance into the Health Sciences Associate’s degree General specialization programs must complete the following prior to being deemed eligible for admission:

- The applicant will be required to have current Basic Life Saving & Cardio Pulmonary Resuscitation Certification with Defibrillator (BLS - CPR with Defibrillator). The certificate must have been issued by either the American Heart Association or American Red Cross Professional Rescuers.
- Critical Care/Screening
- Any additional program specific requirements as specified at the time of enrollment.
- Applicants with prior college credits will receive a transcript evaluation during the admissions process.
- Applicants will receive a letter from the College in the mail confirming acceptance once all admissions requirements have been met, including attendance at programmatic orientation.
- Accepted applicants must attend the Rasmussen College General Orientation.
- Any additional program specific requirements as specified at the time of enrollment.

Applying for Admission into the Medical Laboratory Technician and Surgical Technologist Programs

Applicants pursuing admittance into the Medical Laboratory Technician (MLT) and Surgical Technologist (ST) programs must complete the following steps in order to be deemed eligible for admission:

- Applicants must achieve a score on the College entrance placement exam acceptable for admission into the College at a level that does not require remedial coursework. Alternatively the applicant must provide a college transcript indicating a grade of C or higher in college-level English and/or Mathematics. Former or current students who have previously attempted the entrance exam may provide a college transcript indicating a grade of C or higher in college-level English and Mathematics. Applicants not successful after the second attempt must wait 12 months before reapplying to the School of Nursing or to the Medical Laboratory Technician (MLT) or Surgical Technologist (ST) program. Applicants who have previously taken the entrance exam within the past twelve months for another institution may, at their own expense, have the results transferred to Rasmussen College. Transfer of scores will be verified by the Dean of Nursing and/or Academic Dean and will count as one of the two attempts allowed in a 12 month period. Any entrance exam results dated more than 12 months prior to application to Rasmussen College will not be considered.

Current students in other programs wishing to transfer into a course of study requiring the admissions standards outlined above will be required to take or retake the Entrance Exam according to test/re-test limitations and must meet the following composite score thresholds:

- TEAS Score for admissions eligibility for Associate Degree Nursing (ADN) program and Mobility Bridge Entrance Exam: 65% or higher composite score
- TEAS Score for admissions eligibility for Practical Nursing Diploma: 55% or higher composite score
- TEAS Score for admissions eligibility for MLT or ST programs: 55% or higher composite score

Applying for Admission to the Paralegal Certificate Program

Admission into the Paralegal Certificate program requires candidates to have earned an Associate’s degree which includes general-education courses equivalent to those required in Rasmussen College’s Paralegal Associate’s, or a bachelor’s degree of higher.

Applying for Admission into the Health Information Management Bachelor’s Program

Applicants pursuing admittance into the Health Information Management BS degree program must possess an Associate’s degree in Health Information Technology/Management from a CAHIHM accredited program earned within the past five years or have an Associate’s degree and possess a current RHIT credential. If the degree was obtained over five years ago, the student needs to have work experience in the health information industry within the last five years and approval by the Program Coordinator.
Rasmussen College Early Honors Program

High school juniors and seniors who have reached the minimum age of 16 have the opportunity to earn college credit through Rasmussen College’s Early Honors Program. The Early Honors Program is a great way for high school students to experience college while still supported by high school staff and mentors, try a course that may not be offered at the high school, or explore a possible future career by taking an introductory course.

Early Honors coursework is available both on campus and online based on space available.

Rasmussen College Early Honors Program Terms and Conditions

Students must meet the following criteria and expectations to participate in the Rasmussen College Early Honors Program:

- Applicants must complete an Early Honors Program Application, which includes a high school attestation indicating expected graduation date.
- Applicants must have prior approval from a parent/guardian to be admitted into the program (requires a signed Early Honors Parent/Guardian Approval Form).
- Applicants must submit a signed Early Honors High School Approval Form.
- Applicants must be high school juniors or seniors and have a minimum cumulative high school grade point average of 2.25 out of a possible 4.00. Proof of GPA must be validated by a High School Counselor or Administrator on the Early Honors High School Approval Form.
- Applicants must score at least a 25 on the writing portion of the Rasmussen College entrance placement exam to be accepted to the Early Honors Program.
- The Early Honors Program Application deadline is four weeks prior to the start of the intended quarter of enrollment.
- Enrollment in the Program is limited to 20 students per quarter, per campus.
- Early Honors students may enter the Early Honors Program in the fall quarter of their junior year.
- The Early Honors program ends with the completion of spring quarter of the student’s senior year.
- A maximum of 24 credits per student can be taken in the Early Honors Program.
- Early Honors students may take up to 8 credits per quarter without a tuition charge.
- To continue enrollment in the Early Honors Program, students must maintain a minimum Rasmussen College cumulative grade point average of 2.00.
- Early Honors students may take one course in their first quarter of enrollment. Upon receiving a grade of B or higher in their first course, students can request to be scheduled for the second quarter.
- Students must maintain a cumulative grade point average of 3.0 in order to take two courses per quarter.
- Early Honors Applicants must meet with the Director of Admissions and Dean before being accepted to the Early Honors Program to ensure they meet all criteria and requirements, and to approve their schedule.
- Early Honors students will be accepted on a space available basis for each course selected.
- Early Honors students must meet all course prerequisites as listed in the catalog.
- Nursing courses designated with a “PN”, “PRN”, “NU” or “NUR” are not available to Early Honors students.
- Early Honors students are responsible for the course resources fee for each course taken. Most technology courses require access to specialized hardware and software, which are available to students at all Rasmussen campuses. Early Honors students electing to complete courses online will need to secure access to required hardware and software. The College will provide specific technology requirements information for each course.
- Students will receive college credit towards a degree, diploma, or certificate at Rasmussen College for all successfully completed courses.
- Early Honors students will be issued an official transcript from Rasmussen College. These credits may be transferable at the discretion of the receiving institution.
- Early Honors students will receive high school dual enrollment credit for successfully completed Early Honors course at the discretion of the student’s high school. Approval for dual enrollment credit must be confirmed on the High School Approval Form.
- Early Honors students may apply to a full program offered by Rasmussen College by completing the Application for Admission.
PRIMARY SOURCES OF FINANCIAL AID AND HOW TO APPLY

Each campus has a professionally staffed Student Financial Services Office designed to help you apply for federal, state, and private assistance. The primary purpose of financial aid is to help students who otherwise would not be able to attend a post-secondary institution to meet the cost of higher education. The basic responsibility for financing your education lies with you and your family. Aid is based upon documented financial need — the difference between the cost of college and your ability to pay for it. Potential costs include books, tuition, supplies, room and board, transportation, living expenses, and child care costs.

There are three basic types of aid available to Rasmussen students:
• Various state and federal student loan programs.
• Gift aid, also known as grants, is assistance you do not have to pay back and is usually based upon financial need.
• Employment through work study programs may provide relevant work experience and decrease the necessity of borrowing student loans for living expenses.

Tuition Rates
Please see the Tuition Structure section under Academic Information and College Policies for complete information on tuition rates.

Gift aid and work study are awarded annually based on the fiscal year dates of July 1 through June 30. Students attending in more than one fiscal year period must reapply for financial aid assistance.

*This program is available only for North Dakota residents.
**These programs are available only for Minnesota residents.
SCHOLARSHIP AND GRANT PROGRAMS

Rasmussen College offers the following institutional scholarship and grant programs. All scholarships are non-cash scholarships. Some campuses have additional scholarships available; please contact your Student Financial Services Office for more information.

Achieve Scholarship
Rasmussen students may be eligible to receive an Achieve Scholarship award based upon specific enrollment criteria. Recipients can receive up to $8,000 (U.S.) in quarterly increments (of $500 per quarter) while attending as a full-time student (12 credits or more). Students in the Nursing Programs (Practical Nursing and Professional Nursing) and AccelerED programs are not eligible for the scholarship. For a complete list of terms and conditions, visit rasmussen.edu/achieve or talk to a Program Manager.

Real/Change Scholarship
New prospective students enrolling in select programs at Rasmussen College may be eligible for the Real/Change Scholarship. The scholarship award amounts up to $1,400 per year toward your tuition costs—up to $2,800 in additional scholarship funding for an Associate's degree and $5,600 for a Bachelor's degree. This scholarship will be awarded quarterly while attending Rasmussen College and is calculated and applied as a 10% reduction from the current tuition rate. In order to be eligible for the scholarship, new students must enroll at Rasmussen College in one of the select programs for the designated start date. Students must be continuously enrolled and maintain a minimum CGPA of 2.5 for the duration of their enrollment to receive their scholarship. For a complete list of terms and conditions, including the list of eligible programs and start dates, visit rasmussen.edu/realchange.

Early Honors Program
Rasmussen College is proud to offer select high school juniors and seniors who have reached the minimum age of 16, the opportunity to begin their professional career training early. The Early Honors Program is designed to reward those who have a strong academic background and a desire to succeed.

Military Discount
All current and retired military personnel, as well as veterans, enrolling in a degree, Diploma, or Certificate program may be eligible for a tuition discount at part-time tuition rates. In addition, the College will extend the discount to the spouse and dependents, age 18-21, of any Service member on active duty as outlined above.

Corporate Discount
Some companies receive a tuition discount or grant from Rasmussen College for eligible employees. Contact your campus for details.

Restrictions
Students are eligible for only one of the following scholarship and grant programs at a time:
- Early Honors Program
- Military Discount
- Corporate Discount
- AccelerED Partner Success Grant
- AccelerED Scholarship
- Achieve Scholarship

Students can combine any of the above with the Real/Change Scholarship, if they are eligible. The Real/Change Scholarship will be applied after the primary scholarship or grant has been applied.

Employer Tuition Reimbursement
Many employers today offer tuition reimbursement to their employees earning a degree. Whether it’s full reimbursement or partial, we want to make using your tuition reimbursement plan as seamless as possible so you can reduce the cost of your education, as well as potentially reduce the amount of loans required to fund your degree. To take advantage of tuition reimbursement, check with your employer about what tuition reimbursement options may be available to you. Then, contact your Program Manager or the Student Financial Services Department to discuss your tuition reimbursement options.

High School Professional Program
Rasmussen College offers free courses for high school professionals are available to high school teachers and counselors who are employed at high schools (grades 9-12) in Minnesota, North Dakota, Florida, Illinois, Kansas, and Wisconsin. Current status as a high school professional will be verified by Rasmussen College prior to the start of any course. Attendance is required at an orientation, which must be completed prior to the start date of the professional’s first course. Offer is limited to one course, per quarter, per high school professional. A maximum of 50 seats in online courses will be available to high school teachers and counselors each quarter. There is no maximum on cumulative number of classes that may be taken. Tuition free courses for high school professionals are offered on a space-available basis, with priority given to other enrolled Rasmussen students who must complete the course as part of their degree program at Rasmussen College.

High School Professional Program participants are responsible for the course resources fee for each course taken. Most technology courses require access to specialized hardware and software, which are available to students at all Rasmussen campuses. High School Professional Program participants electing to complete courses online will need to secure access to required hardware and software. The College will provide specific technology requirements information for each course. Grades will be recorded as audit grades with the student classified as an audit student.

Rasmussen College Academic Policies apply to participants in the High School Professional program.

ACADEMIC POLICIES

Individual Progress
Students may enroll in one or more courses at a time, or in succeeding quarters, without enrolling in a program of study. To be considered for admission, individual progress students must complete the application for admission and registration. The Rasmussen College entrance placement exam is not required for IP students. Individual progress coursework is assessed at the full cost of each course. Individual progress students remain enrolled at Rasmussen College as long as they continue to select coursework and meet all additional requirements. Upon successful completion of courses, individual progress students will receive a letter grade and be awarded credits. To enroll in a program at Rasmussen College, students must complete all remaining programmatic application requirements (including the entrance placement test). Eligible individual progress courses will be applied to their degree program, and count as credits attempted and earned for purposes of Satisfactory Academic Progress (SAP).

Auditing a Course
A student who audits a course does so for the purpose of self-enrichment and academic exploration. Students not enrolled in an eligible program who elect to take courses without earning college credit are considered auditors. This non-credit option is NOT available for courses beginning with a “CE” “NM” “NU” “NUR” “PN” “PT” “ST” “MC” and “W”. Students who elect to complete courses on a non-credit basis are not guaranteed full technology access; however, every effort will be made to provide technology resources. Students are expected to pursue this option for the Audit grade to a letter grade and earn credit for an additional fee. An audit student is considered a learner and is expected that the student will participate with reasonable regularity and assigned work, particularly if s/he expects to convert the Audit grade to a letter grade or higher at a future time.

Developmental Education and Rasmussen College Entrance Placement Exam Re-test Policy
The goal of developmental education is to provide students with a solid foundation of basic skills and knowledge as they move on to college level courses. Placement into Foundation courses results in placing students into developmental education courses. Students who have not completed a college-level English course are required to complete the reading and writing sections of the placement examination. Students who have not completed a college-level math course are required to complete the math portion of the placement examination. Students who did not take the STEP or COMPASS test but who have successfully completed the courses at Rasmussen College for which Foundation courses are prerequisites, or their equivalents, do not need to take the College entrance placement examination. Returning students who have not successfully completed the Foundation courses, their equivalents, or the courses for which Foundation courses are prerequisites must take the College entrance placement examination. Returning students who have not successfully completed the Foundation courses, their equivalents, or the courses for which Foundation courses are prerequisites must take the College entrance placement examination. Coursework in Math or English that is numbered below 100 is considered to be developmental. College entrance placement examination scores are used to appropriately place students in English and Math courses according to skill level. See Entrance Assessment Table for placement scores.
These credits are not counted toward graduation, and each must be passed. Foundations of 4X in order for the student to proceed to the next course in the sequence. Students who transfer from other colleges, and whose test scores fall within the range of remediation, will be required to complete the Foundation courses. Students who test at remediation level, and who wish to transfer to courses that have Foundations as prerequisites, must first successfully complete the Foundation courses. Students enrolled in Foundation courses are eligible for financial aid. Foundation courses must be taken in conjunction with courses contained in an eligible program.

Students who place below the level of B080 Reading and Writing Strategies are not eligible for admission to Rasmussen College. Students who place below the level of B080 Reading and Writing Strategies and are not admitted to Rasmussen College may, after three months, have the option to re-take the assessment test. The College entrance placement examination may not be re-taken for initial placement purposes after the start of a Foundation level course. On occasion, however, a re-test may be allowed prior to the start of a quarter. Such re-tests are only granted if extenuating circumstances exist that lead the College to determine a re-test is needed to accurately determine the student’s ability level. Only one such re-test may be allowed, at the discretion of the Academic Dean.

* These include official and unofficial transcripts and grade reports for coursework completed at regionally or nationally accredited institutions of higher learning, as recognized by the Department of Education and the Council on Higher Education Accreditation (CHEA).

Foundation Courses Timeframe

To help ensure student success, students requiring foundational coursework may attempt one such course in their first quarter of enrollment. Students requiring two foundation courses must attempt the first course, Reading and Writing Strategies (B080), in their first quarter of enrollment and the second course, Combined Basic and Intermediate Algebra (B095) in Illinois and Practical Math (B087) in other states, in their second quarter of enrollment. If a student withdraws from or does not pass a Foundation course, the student must successfully complete that course in the subsequent full quarter of enrollment or the student will be dismissed from the College. As such, any required Foundations courses must be completed no later than the end of the student’s third full quarter of enrollment, or the student will be dismissed from the College.

Students requiring two foundation courses must attempt Reading and Writing Strategies (B080) and one additional course in their program of enrollment prior to enrolling in the foundation math course. Upon successful completion of the first foundation course, Reading and Writing Strategies, and at least three credits of coursework in their program with a grade of C or higher, the student will be allowed to take a full-time credit load, if desired.

Foundation Course Grading

All Foundation courses are satisfactory/unsatisfactory (SX/UX) courses. The following grading scale is then used to determine if students have passed the courses:

Reading and Writing Strategies

SX 73% or higher UX Below 73%

Practical Math

SX 73% or higher UX Below 73%

Seminar Course Grading

1. The E185, E270, E320, and E410 seminar courses are satisfactory/unsatisfactory (SX/UX) courses.

2. Students are to complete and submit the components of their Graduation Assessment Portfolio (GAP), a general education skills assessment, as assigned in the appropriate seminar courses designated for each program.

3. If a student does not successfully submit an assigned GAP general education assessment piece in the appropriate seminar course, then he or she will be unable to earn enough points to pass that seminar course.

E185, E270, E320, and E410 Seminars

SX 73% or higher UX Below 73%

Common Grading System Percentage Scale

Letter Grade Percentage Range

A 100 to 93%
A- 92 to 90%
B+ 89 to 87%
B 86 to 83%
B- 82 to 80%
C+ 79 to 77%
C 76 to 73%
C- 72 to 70%
D+ 69 to 67%
D 66 to 63%
D- 62 to 60%
F Below 60%

Some General Education courses may contain a lecture component with a co-requisite lab component. If a grade is achieved at or above the threshold of 60% in both components of a course which consists of lecture and lab components, each component will receive the grade earned independently. Failure to earn a grade at or above the threshold of 60% in either the lecture or lab component will result in failure of both components of the course.

Point Scale

Alphabetical Grading System

Grade Grade Points Description

A 4.00 Excellent
A- 3.75
B+ 3.50 Very Good
B 3.00 Good
B- 2.75
C+ 2.50 Average
C 2.00
C- 1.75

S/SX NA Unsatisfactory
TO NA Test-Out
TR NA Official Transfer Credit
UX/UX NA Unsatisfactory
UX/UD NA Unsatisfactory Drop
WF/WK/ WP NA Withdrawal Fail
WP/WK/ WP NA Withdrawal Pass

Competency Courses

Competency-based courses allow students to progress by demonstrating their competence, which means they prove that they have mastered the knowledge and skills (called competencies) required for a particular course. Rasmussen College partners with multiple developers of competency courses to provide offerings that align with the course objectives of the College’s instructor-led courses. Each objective is typically directed to ensure that students have learned that competency. Competency courses are groups of assessments that allow students to prove their ability to perform a specific task. Completing the competency demonstrates that students have learned that competency and are able to apply that knowledge and skill.

Each competency course contains a selection of competencies called “Modules” where similar competencies are grouped; these self-paced modules allows students to demonstrate mastery of different subjects and sections of the curriculum in one single location. Depending on the subject matter in a competency course may be converted to credits that will transfer into Rasmussen College credits.

• Students may attempt a competency course as long as they are concurrently enrolled and taking coursework in an eligible program.

• Enrolled students may elect to take a Rasmussen competency course in lieu of an online, instructor-led course for any course that has been identified as having a competency course equivalent.

• Upon successful completion of a competency course, Rasmussen College will issue a Certificate of Successful Competency Completion. The certificate will be placed in the student’s academic file.

• If a student has already attempted an online, instructor-led course, as indicated by a posted W/WD or F/FA grade, the student will not be allowed to attempt the equivalent competency course. A student may attempt a competency course and later enroll in an equivalent instructor-led course as long as the competency transfer credit has not been awarded.

• Competency courses will not count as credits for financial aid eligibility.

• Students have 60 days from the date they access a competency course to complete it. Students may apply in writing for one additional 30-day extension to complete the competency course; additional requirements may apply. Students are allowed a maximum of one 30-day extension per competency course.

• Students who do not successfully complete a competency course within the allotted time will be required to take the course as an instructor-led course.

• Competency courses must be completed prior to or concurrently with the final instructor-led course in the program.

Health Sciences Programs Grade Scale

The following grade scale applies to all BMS, CVT, EK, HH, HIM, HSA, HSC, M, MA, MEA, ML, MLT, MTB, NUR, OB, PB, PC, PT, PTH, and ST coursework in School of Health Sciences programs.

Letter Grade Percentage Range

A 100 to 93%
A- 92 to 90%
B+ 89 to 87%
B 86 to 83%
B- 82 to 80%
C+ 79 to 77%
C 76 to 73%
C- 72 to 70%
D+ 69 to 67%
D 66 to 63%
D- 62 to 60%
F Below 60%

D- 62 to 60%
F Below 60%

School of Health Sciences courses may contain a co-requisite lab component, co-requisite externship and/or practicum learning component, or both in addition to the lecture component of a course. Satisfactory performance (score of 78% or higher) in each component of the course whether lecture, lab, and/or clinical experience is required to earn a passing grade in the course. Failure to earn a satisfactory grade in the lecture, lab, and/or externship/practicum component will result in failure of all components of the course. If a satisfactory grade is achieved in the lab and/or clinical learning experience, the grade earned in the lecture component will appear on the transcript as the final grade in the course. Students are required to achieve an overall total mean grade average at or above the threshold of 78% for all courses taken in a given term. A student will be required to complete a competency course, in order to pass. Once this 78% exam threshold criterion has been met, the final grade for the Nursing course will be based on the grade points earned for exams, assignments, quizzes, and other course work requirements.

Laboratory and clinical learning performance is graded as satisfactory (S) or unsatisfactory (UX). Repeating Courses Policy

Students who are meeting Satisfactory Academic Progress may re-take courses up to three times, but only at regular tuition rates. Students repeating a course for a second or third time may count the credits for that course in a financial aid award calculation only if they earned an “F/FA” in all previous attempts of that course. If a student elects to repeat a course for which a grade above “F/FA” was earned, the credits are included in the financial aid award calculation only if the program requires a higher grade to be considered “passing” than what the student has previously earned. In this case if the student fails the previously passed course all future eligibility to receive financial aid for that course is discontinued. The credits for all repeated courses, along with the credits from prior attempted courses, may not be included for the purposes of determining Satisfactory Academic Progress. The highest grade earned from the course will be used in the calculation of the student’s cumulative GPA. The student’s GPA will be recalculated to reflect the highest letter grade. If more than one attempt results in the same letter grade, only the most recent one will be used in the calculation of GPA. Students who fail a required course three times and have a cumulative grade point average of 2.0 or greater may be able to switch to another program that does not include the course as a required part of the program curriculum without going through the program appeal process. Students who fail a required course three times, and who cannot switch to another program as determined by the program change appeal process, will be terminated from the College. Those students cannot return to the College until they successfully complete an equivalent to the course elsewhere by earning a grade of C or higher and transferring it back to Rasmussen College, in accordance with the transfer of credit requirements. In the case of transfer credit, an “F/FA” grade will remain in the GPA calculation. However, all of the course credits both failed and transferred, count in the student’s Cumulative Completion Rate (CCR).

Nursing Programs Grade Scale

Students are required to earn at least a “C” in all Nursing courses. This applies to all NUR, NUR, PN, and PNW coursework level 000 through 4999.

Letter Grade Percentage Range

A 100 to 94%
A- 93 to 85%
B+ 84% to 78%
B 77% to 74%
Below 74%
Academic Information and College Policies

Independent Study Policy

Independent Study is a course in which a student contracts to meet regularly with a qualified instructor to fulfill the assignments, tests, projects, and other tasks necessary to achieve the performance objectives of a given course. Independent study requires a student to be motivated and organized. Because an independent study does not provide the student with the same opportunities to interact with higher education, it is to be offered only when there is no alternative and as infrequently as possible. Students may take, and the College may offer, a course through independent study under the following conditions:

1. The course is not currently offered on-site or online.
2. Completion of the course is necessary for on-time graduation.
3. The need for a course in the quarter in question does not arise from the student’s decision to withdraw from the course in an earlier quarter, the student’s failure to satisfactorily complete the course required, the student’s decision to change programs, or the student’s decision to change courses.
4. The student will complete work of a similar quantity and quality as required in a regularly scheduled course, or by a schedule established by the standard performance objectives for the class.
5. The Academic Dean approves the plan for completing the course work.

Equipment

Rasmussen College strives to maintain its role as an educational leader in current technology. Rasmussen College provides technology and computer access, and internet access at each campus. Students will also have access to printers, additional software packages, electronic databases, course materials, and the help lab as needed at a Rasmussen College campus.

Graduation Requirements

degrees, Diplomas, and Certificates are awarded solely on the basis of performance requirements listed, and not on the basis of clock hours in attendance. Students must complete 33% of their program requirements at Rasmussen College, and no more than 67% may be completed via transfer credits, course waivers, credit by examination, or other means. Students in the Medical Assisting, Medical Laboratory Technology, and Practical Nursing programs must complete 50% of their program requirements at Rasmussen College, and no more than 55% may be completed via transfer credits, course waivers, credit by examination, or other means. Students in the Professional Nursing Associate’s degree program must complete at least 45% of their program requirements at Rasmussen College, and no more than 55% may be completed via transfer credits, course waivers, credit by examination, or other means. Students in the RN to Bachelor of Science Nursing program may transfer a maximum of 75% of total program credits into the program.
Academic Overload Policy

An academic or credit overload occurs when a student registers for more than 20 credits per quarter. Students wishing to schedule an overload must obtain the signature of the Student Advisor as well as the approval and signature of the Academic Dean of the campus in which they are enrolled. In order to apply for an overload, the student must have completed a minimum of 32 credits at Rasmussen College. The student must also be meeting the Rasmussen College Standards of Satisfactory Academic Progress (SAP) and have a cumulative grade point average at least 2.75 to apply for an overload. Students with a cumulative grade point average of 2.75 or above will be eligible to take up to 24 total credits in the approved quarter. The student must apply for approval no later than two weeks prior to the start date of the session in which the overload is desired. Any future overload requests for transfer students must follow the Academic Overload Approval Form for the full term. The Academic Overload Approval Form is available through a Student Advisor.

Academic Overload Policy for Five and Six Week Courses

An academic or credit overload occurs when a student registers for more than 10 credits per six week session. Students wishing to schedule an overload must obtain the signature of the Student Advisor as well as the approval and signature of the Academic Dean of the campus in which they are enrolled. In order to apply for an overload, the student must have completed a minimum of 32 credits at Rasmussen College. The student must also be meeting the Rasmussen College Standards of Satisfactory Academic Progress (SAP) and have a cumulative grade point average at least 2.75 to apply for an overload. Students with a cumulative grade point average of 2.75 or above will be eligible to take up to 12 total credits in the approved quarter. For students who are newly transferring to the College, a minimum of 24 credits must be completed in Transfer Credit courses with a grade of “C” or higher before the sixth Friday of the term and may drop a course after the third Friday of the term, which is the close of the drop/add period. When a student notifies the College of withdrawal from a class:

1. On or before the close of the drop/add period, the class will be dropped without being recorded on the student’s transcript and tuition will not be charged.

2. Following the first week of the quarter and on or before the third Friday of the term, students will receive a WF/WXF on their transcript. The student’s grade point average will not be affected, the credits will be counted as cumulative credits attempted, and tuition will continue to reflect the tuition billed at the close of the drop/add period.

3. Following the third week of the quarter, students will receive an ON/DU/DD/WF/DD for any classes dropped. The student’s grade point average will not be affected, the credits will be counted as cumulative credits attempted, and tuition will continue to reflect the tuition billed at the close of the drop/add period.

Academic Program Completion

When a student notifies the College that they wish to withdraw from a class, the student’s grade point average will not be affected, the credits will be counted as cumulative credits attempted, and tuition will continue to reflect the tuition billed at the close of the drop/add period.

Course Withdrawals

The credits for all courses in which the last date of attendance was after the drop deadline will be counted in the cumulative credits attempted.

Online Course

Students may be required to take online courses in order to complete a degree. All new students will complete an orientation program prior to beginning classes. Online course activities and assignments at Rasmussen College are conducted via chat email, message boards, and interactive websites.

Tuition and fees for online courses are assessed at the same rate as for residential courses unless otherwise indicated. Online courses do not include on-campus training and support while operating in the online environment. A list of computer hardware and software requirements is also available if provided to students upon enrollment. Textbooks and other resources required for online courses are available at the Rasmussen College bookstore.

Academic Honors

Term Honors and Dean’s List Recognition Each term, Rasmussen College recognizes outstanding academic achievement by awarding certificates of achievement. Enrolled, degree-seeking students who earn a term grade point average of 3.75-4.0 will receive a Dean’s List certificate.

Graduation Honors

Rasmussen College recognizes outstanding academic achievement by awarding honors to graduates who meet minimum qualifications. Students who earn an Associate’s or Bachelor’s degree, complete all graduation requirements, and earn a cumulative grade point average of 3.50 or higher will graduate with academic honors and will receive gold cords for the graduation ceremony as a symbol of this achievement. An honors designation will appear on the diploma of an honors graduate who has completed the Associate’s or Bachelor’s degree program. Additionally, the following honors will be noted on the diploma of Bachelor’s degree students: Cum Laude: Bachelor’s students who earn a cumulative grade point average of 3.30-3.50, Magna Cum Laude: Bachelor’s students who earn a cumulative grade point average of 3.75-3.79, Summa Cum Laude: Bachelor’s students who earn a cumulative grade point average of 3.67-3.749

Rasmussen College Standards of Satisfactory Academic Progress (SAP)

Satisfactory Academic Progress, or SAP, is defined as the successful progression through an academic program within a prescribed timeframe. Cumulative grade point averages and successful completion of credits attempted are monitored quarterly, and students not meeting the standards are notified. Students who do not meet the standard will be required to participate in Project Rally, which includes online learning tools and consultations with a member of the College team. The student is expected to complete the online learning tool in Project Rally by the first Friday of the quarter. Failure to complete this tool may result in an administrative withdrawal from the College.

SAP Components: All students must meet all three of the components that are used to measure a student’s Satisfactory Academic Progress (SAP) towards the completion of an Academic Program. The three components are as follows:

1. GPA. Rasmussen College students are required to achieve and maintain a minimum Cumulative Grade Point Average (CGPA) of 2.00.

2. Pace/Cumulative Completion Rate (CCR). This is the pace at which a student progresses through a program. CCR is calculated by dividing cumulative credits earned by cumulative credits attempted within a program (e.g., 6 credits earned + 12 credits attempted = 50%). Minimum standards are listed in the chart below.

3. Duration of Eligibility. This is the maximum time frame for program completion and is equal to 150% of the number of total credits required to complete the program (e.g., maximum time frame for a 90-credit program = 90 X 150%, or 135 credits).

In calculating Pace/CCR and Duration of Eligibility, the following grades will be considered attempted, but will not be considered as credits successfully completed or earned: F/A/FD, U/UD/UN, W/DW/WF/WM/WX, IN/IN. In addition, Foundation courses are not included in the number of credits attempted or successfully completed when assessing satisfactory progress.

Financial Aid Warning: If a student’s CGPA falls below 2.00, or if Pace/CCR standards or Duration of Eligibility requirements are not met, the student will be placed on Financial Aid Warning for the subsequent quarter. A student is eligible for financial aid during the Financial Aid Warning period. A student who fails to meet any one of the three components of SAP at the end of the Financial Aid Warning period is not eligible for financial aid. Not Eligible for Financial Aid: A student who fails to meet the minimum Satisfactory Academic Progress requirements of the end of either the Financial Aid Warning or Financial Aid Probation period, and who does not successfully appeal, is not eligible for further financial aid funding. Appeals: A student may appeal his/her assigned status of Not Eligible for Financial Aid to the Academic Review Committee, which will determine whether mitigating circumstances exist, and, if so, will forward the appeal to the Vice President of Compliance and Financial Services. All appeals must be made in writing and must address the nature of the circumstances that the student believes warrant exemption from the policy to the stated above. All appeals will be reviewed and ruled on within ten business days, and students will be notified in writing regarding the outcome of the appeal. The ruling of the Vice President of Compliance and Financial Services is final and cannot be appealed.

Financial Aid Probation: If a student fails to make Satisfactory Academic Progress, but submits a successful appeal and has his/her eligibility for aid reinstated, he/she will be placed on Financial Aid Probation. A student is eligible for financial aid during the Financial Aid Probation period. At the end of the Financial Aid Probation period, the student must meet minimum SAP requirements to be eligible for further financial aid funding. A student who fails to meet either the CGPA, Pace/CCR, or Duration of Eligibility requirements at the end of the Financial Aid Probation period is not eligible for financial aid.

Students must regain Satisfactory Academic Progress within two quarters or they will be terminated from the College. All students will be terminated if they fail to make satisfactory academic progress in any term.

Students who withdraw from the College and later re-enter are treated as continuing students and must meet progress requirements. Re-entry does not negate previous academic status or satisfactory progress requirements. Satisfactory Academic Progress calculations for a re-entering student who changes programs will include only the grades and credits attempted and earned in courses that are part of the student’s new program; standard SAP requirements will be followed from the re-entry point and for each quarter thereafter. If other courses have been taken at another institution and can be transferred to the College, credits transferred to the College and the most recent GPA transferred to the College, a minimum of 24 credits must be earned at Rasmussen College.

Students who fail to notify the College that they wish to withdraw from a class are still scheduled in the class, but will be administratively dropped from the class by the Friday of the second week of the term. Withdrawals for less than two weeks prior to the start date of the session in which the overload is desired. Any future overload requests for transfer students must follow the Academic Overload Approval Form for the full term. The Academic Overload Approval Form is available through a Student Advisor.

Drop/Add Class Policy

Course registration practices ensure that the College is able to provide quality instruction through obtaining a minimum class size of 12 students per course.

Full-quarter drop/add period:

Students may add courses through the first Friday of the quarter, which is the close of the drop/add period. When a student notifies the College of withdrawal from a class:

1. On or before the close of the drop/add period, the class will be dropped without being recorded on the student’s transcript and tuition will not be charged.

2. Following the first week of the quarter and on or before the third Friday of the term, students will receive a WF/WXF on their transcript. The student’s grade point average will not be affected, the credits will be counted as cumulative credits attempted, and tuition will continue to reflect the tuition billed at the close of the drop/add period.

3. Following the third week of the quarter, students will receive an ON/DU/DD/WF/DD for any classes dropped. The student’s grade point average will not be affected, the credits will be counted as cumulative credits attempted, and tuition will continue to reflect the tuition billed at the close of the drop/add period.

Course Withdrawals

The credits for all courses in which the last date of attendance was after the drop deadline will be counted in the cumulative credits attempted.

Online Course

Students may be required to take online courses in order to complete a degree. All new students will complete an orientation program prior to beginning classes. Online course activities and assignments at Rasmussen College are conducted via chat email, message boards, and interactive websites.

Tuition and fees for online courses are assessed at the same rate as for residential courses unless otherwise indicated. Online courses do not include on-campus training and support while operating in the online environment. A list of computer hardware and software requirements is also available if provided to students upon enrollment. Textbooks and other resources required for online courses are available at the Rasmussen College bookstore.

Academic Honors

Term Honors and Dean’s List Recognition Each term, Rasmussen College recognizes outstanding academic achievement by awarding certificates of achievement. Enrolled, degree-seeking students who earn a term grade point average of 3.75-4.0 will receive an Honor Roll certificate. Enrolled, degree-seeking students who earn a term grade point average of 3.75-4.0 will receive a Dean’s List certificate.

Graduation Honors

Rasmussen College recognizes outstanding academic achievement by awarding honors to graduates who meet minimum qualifications. Students who earn an Associate’s or Bachelor’s degree, complete all graduation requirements, and earn a cumulative grade point average of 3.50 or higher will graduate with academic honors and will receive gold cords for the graduation ceremony as a symbol of this achievement. An honors designation will appear on the diploma of an honors graduate who has completed the Associate’s or Bachelor’s degree program. Additionally, the following honors will be noted on the diploma of Bachelor’s degree students: Cum Laude: Bachelor’s students who earn a cumulative grade point average of 3.50-3.655, Magna Cum Laude: Bachelor’s students who earn a cumulative grade point average of 3.67-3.749, Summa Cum Laude: Bachelor’s students who earn a cumulative grade point average of 3.75-4.00
Transfer of Previously Earned College Credit and Prior Learning and Waivers

General Transfer Credit Policy
- Rasmussen College reserves the right to accept or deny transfer of credit based on the guidelines below.
- Students who wish to transfer credits to Rasmussen College must apply for admission to the College.
- Students must request that official transcripts containing coursework for review be sent directly to Rasmussen College. It is the student’s responsibility to ensure that all official transcripts have been received by Rasmussen College.

As part of the acceptance process, official and unofficial transcripts will be evaluated for transfer of credit. Students will receive notification regarding the total number of credits accepted for transfer and the equivalent Rasmussen College courses.

A student may send copies of transcripts or documents during the initial admissions process for estimation purposes only. Any transfer credit conditionally awarded with the use of an unofficial transcript will be rescinded if an official transcript is not received by Rasmussen College prior to the completion of the student’s first quarter, after which the student will be required to complete the necessary credits in order to receive the degree.

College-level courses completed at regionally or nationally accredited institutions of higher learning as recognized by the Department of Education and the Council on Higher Education Accreditation (CHEA) or recognized by the American Council on Education, will be considered for college transfer.

Students must complete 35% of their program requirements at Rasmussen College, and no more than 67% may be completed via transfer credits, course waivers, credit by examination, or other means, except as not below.

1. Students in the Medical Assisting, Medical Laboratory Technician, and Surgical Technology programs must complete at least 50% of their program requirements at Rasmussen College, and no more than 50% may be completed via transfer credits, course waivers, credit by examination, or other means, with the exception of “block transfer” candidates for the Surgical Technology and Professional Nurse Associate degree programs.

2. Students in the Professional Nurse Associate degree program must complete at least 45% of their program requirements at Rasmussen College, and no more than 55% may be completed via transfer credits, course waivers, credit by examination, or other means.

3. Students eligible and approved for the Surgical Technology Associate degree program’s Block Transfer must complete 33% of their program requirements at Rasmussen College, and no more than 67% may be completed via transfer credits, course waivers, credit by examination, or other means.

4. Students in the Nursing Bachelor’s degree program must complete at least 25% of their program requirements at Rasmussen College, and no more than 75% may be completed via transfer credits, course waivers, credit by examination, or other means.

Rasmussen College awards quarter credits. In considering transfer courses, a semester credit is equivalent to 1.5 quarter credits. The calculated number is rounded down. Transfer credits based on a different unit of credit than quarters will be subject to conversion prior to being transferred.

International transcripts must be evaluated by a NACES approved organization (National Association of Credential Evaluation Services) or by AACRAO International Education Services (IES) to ensure the student’s credit is accepted at Rasmussen College. Review is the student’s responsibility.

Transfer credit is evaluated based on the program in which the student is applying for or is currently enrolled in.

Credits earned at Rasmussen College will be transferred directly from one Rasmussen College campus to another. Only the classes that are applicable to the current program will be posted or calculated.

Grade points from institutions other than Rasmussen College will not be computed in the Rasmussen College grade point average, but will be entered as courses attempted and earned for determining Satisfaction Academic Progress. All credits considered to be earned toward program completion, including test-out, transfer, and course waiver credits, are also credits attempted.

Courses which have been accepted for transfer will be listed on the student’s transcript with a Test-Out (OT) designation. Transcripts which have been conditionally accepted pending the receipt of an official transcript will be listed with a Pending Transfer (PT) designation. Any pending transfer credits still remaining at the end of the student’s program will be removed and the student will be required to complete the program requirements in order to graduate.

Courses for which a student has received credit by examination will be listed on the student’s transcript with a Test Out (TO) designation.

Course by course transfer credits from regionally or nationally accredited institutions of higher learning will be evaluated on course content. Most courses that are comparable in content will be accepted.

Course must have the minimum number of credits that of the Rasmussen College course.

Only courses completed with a grade of C or higher, or a grade of Pass (in a Pass/Fail grading system), will be eligible for transfer credit.

Grade points from institutions other than Rasmussen College will not be computed in the Rasmussen College grade-point average. Grades and grades from courses taken at any of the Rasmussen College campuses, which pertain to the current program, will be computed in the student’s final grade-point average.

General education credits may be considered for transfer regardless of completion date.

Credits in Major and Core Courses in the School of Technology must have been earned within the previous three (3) years of the assessment date. Prefixes included in Florida and Kansas: CAP, CDA, CEN, CET, CDL, CRNA, CRNP, CT, DNP, DACAB, ISM, MAA, and MTB. Prefixes included in Illinois, Minnesota, North Dakota, Wisconsin: N, S, and W. This excludes the following courses, which do not have exemptions:

1. Computer Applications and Business Systems Concepts
2. Excel

Credits in Major and Core Courses in the School of Design must have been earned within the previous three (3) years of the assessment date, excluding Drawing from Observation and Figure Drawing courses, which do not expire.

Nursing Programs will not accept any core courses transfer credits (prefixes NUR/ RP/ RN/ NL/ CRNA) unless the course is equivalent to Rasmussen course content.

The following courses in the Medical Assisting Program are not transferable; MA102 Introduction to Medical Assisting, MA141 Clinical Skills I, MA145 Clinical Skills II, MA225 Laboratory Skills, MA265 Medical Assisting Externship, and MA285 Medical Assisting Capstone.

Transfer of credit for Medical Laboratory Technician and Surgical Technology core courses (ML and ST prefixes) has a 24 month time frame from course completion time limit. Students who have completed similar coursework that exceeds the 24 month limit can test-out of the course with a 73% or greater score on a course assessment. All transfers or test-outs into the Medical Laboratory Technician and Surgical Technologist programs are based on program space availability.

Externship, Internship, Practicum and Reflection Courses cannot be transferred in from another institution of higher learning.

Seminar Courses cannot be transferred in from another institution of higher learning.

For students in MN who enroll in the Law Enforcement Associate’s, Law Enforcement Academic Certificate, or Law Enforcement Skills Certificate programs, transfer credits for law enforcement specific classes (J or LE prefixes) can only be accepted if the incoming course is from a regionally accredited college that is POST Board approved. Students who have credits that are not transferable are eligible to demonstrate competency by completing the course specific test out, if available.

Competency Course Transfer Policy
- Rasmussen College offers credit for competency courses at Rasmussen College will appear as a credit by examination (TO) grade on a transcript. Competency course credits awarded through credit by examination (TO) may not be transferable to another institution.
- Rasmussen College offers credit for successfully completed competency courses that have been approved by the American Council on Education (ACE) will appear as a transfer of credit (TR) on a transcript.
- The decision to accept transfer credits is always at the discretion of the receiving institution.
- Courses earned through competency courses count toward the transfer maximum. Credits earned through competency courses will count toward earned credits.

2-2 Matriculation for Baccalaureate Candidates
For students who have completed an Associate’s degree who enroll in a Rasmussen College Bachelor’s degree in a similar program area (i.e., business degrees are required for business, accounting for accounting, criminal justice/ law enforcement for criminal justice), they will receive immediate junior-level standing.

Rasmussen College AAS/AS graduates will receive actual credits earned up to 95 credits (39 in Illinois).

A block of up to 91 quarter credits for graduates from outside institutions will be awarded.

If a student has more AAS/AS credits than the enrollment program requires, then the student may take over-unregistered courses.

The School Director will provide a list of courses for reduction when needed. This applies only to the Business Management BS degree.

If the student has taken all of the required upper division courses and is eligible for short credits, the remaining credits will be fulfilled by taking unregistered electives.

Students must complete the required number of total credits in the program to earn a Rasmussen College Bachelor of Science degree.

For the Bachelor in Computer Science, the two year degree must be in an equivalent computer science field and they have a programming course comparable to Programming II and a math course comparable to Calculus II in order to qualify. If those conditions are not met, the 2+2 policy cannot be applied.

For the Bachelor in Health Information Management, qualifying Associate degrees have to be from a CAHIIM accredited program and completed within the last five years. If the degree was obtained over five years ago, the student needs to have work experience in the health information industry within the health information industry within the last five years and be approved by the Program Coordinator. The student may also enroll if he/she has an RHIT credential and an earned Associate degree in any field. If so, the student needs to submit his/her AHIMA membership card, showing it as current.

For Bachelor of Science Healthcare Management program students, credits will be transferred based on the guidelines below.

1) Health Sciences Programs (including Medical Assisting AAS/AS, Health Information Technician AAS/AS, Medical Administration AAS/AS, Pharmacy Technician AAS/AS)
   - Transfer 45 lower level core credits in a block transfer and 32 lower level General Education credits (34 in Illinois) for a total of 73 credits (75 in Illinois). In addition, these students will need to take Financial Accounting I, Financial Accounting II, Introduction to Business and Introduction to Human Resource Management in the core.

2) Business Programs:
   a) Business Management AAS/AS – Transfer 49 lower level core credits in a block transfer and 32 lower level General Education credits (34 in Illinois) for a total of 81 credits (83 in Illinois). In addition, these students will need to take Medical Terminology, Electronic Health Records, and Medical Office Procedures.
   b) Accounting AAS/AS – Transfer 44 lower level core credits in a block transfer and 32 lower level General Education credits (34 in Illinois) for a total of 76 credits (78 in Illinois). In addition, these students will need to take Introduction to Human Resource Management, Medical Terminology, Electronic Health Records and Medical Office Procedures.
General Education Block Transfer for Baccalaureate Candidates

For students with a completion degree, general education coursework will be transferred as a block regardless of conferred degree or degree sought through Rasmussen College.

- All required general education courses must be met due to credit limitations.
- Confirmed Associate’s degrees may be posted as a block of up to 40-credits (up to 42-credits in Illinois), depending upon the Program.
- Confirmed Baccalaureate degrees may be posted as a block of up to 64-credits (up to 66-credit block in Illinois), depending upon the program, comprised of up to 40-lower level and 24 upper-level credits (up to 42 lower-level and 24 upper-level credits in Illinois).

- For those students without an earned degree, successfully completed general education credits will be applied.

Medical Assisting Associate’s Degree Complete Block Transfer

A block transfer of 51 core credits may be allowed into the Medical Assistant Associate’s Degree program if one of the following criteria is met:

1. Graduated from a CAAHEP or ABHES accredited MA diploma or certificate program within the past 3 years and holds a current CMA (AAMA) or RMA (AMT) certification.

2. Graduated over 3 years ago from a CAAHEP or ABHES accredited MA diploma or certificate program, but has worked as a MA within for the past 3 years and holds a current CMA (AAMA) or RMA (AMT) certification.

Students may seek a course-by-course transfer credits or course waiver for MA250/MEA 2290 (Radiography Skills) only if they have a limit of up to 64-credits block.

When applying this policy, the transfer maximum is 67%. Rasmussen College Medical Assisting Diploma graduates will receive actual credits earned in their program up to a maximum of 67%. The maximum earned actual credit value of the current diploma program.

Block Transfer for Health Sciences Associate’s Degree

For students who have completed a healthcare Certificate or Diploma in the last five years and enroll into the Health Sciences Associate’s Degree program, a total block transfer of 19 major/core credits may be posted.

For students who have completed a Diploma or Associate’s Degree in Medical Assisting in the last five years and enroll into the Health Sciences Associate’s Degree program EKG Technician Track, a total block transfer of 26 major/core credits may be posted.

RN to Bachelor of Science Nursing (RN to BSN) Policy

Students who have met the acceptance for admissions requirements and have a current unencumbered Registered Nurse (RN) license and have successfully completed an Associate’s degree in Nursing will receive a transfer, equivalent to 113 credits for their general education, nursing core and licensure.

Students who have met the acceptance for admission requirements and have a current unencumbered RN license without an Associate’s Degree will receive 66 credits for their nursing core and licensure. These students will need to have previously completed 15 transferrable course credits comparable to Introduction to Human Biology, Introduction to Microbiology, Human Anatomy & Physiology I and Human Anatomy & Physiology II to enroll in this program, as Rasmussen does not offer these courses online. The remaining 28 credits of lower division General Education, if not transferred in from a previous college transcript, will need to be completed.

- Upper division core classes are not transferrable.
- Upper division General Education coursework is transferrable and follows the standard Course by Course Transfer Policy.

- The total percentage of credits that may be transferred into the program is 75%.

Mobility Bridge Entrance Option

Students who have successfully completed a practical nursing program and hold a current unencumbered practical nursing license will receive credit for NUR1171/NUR1117 Nutritional Principles (4 credits) and NUR1151/NUR1121 Fundamentals of Professional Nursing (6 credits) in the Professional Nursing AS Degree program. The student’s credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student’s transcript as a Course Waiver (CW). Students may also transfer in up to 47 credits in successfully completed applicable general education coursework. Graduates of Rasmussen College’s Practical Nursing program will receive credit for GZ24/ENC1101 English Composition, Q233/MAT103 College Algebra, and the Communication course the student completed in the Practical Nursing program (for a total of 12 additional general education credits). Rasmussen graduates shall contact the campus in which they intend to enroll to determine whether they have completed additional coursework that is eligible for transfer. Students must successfully complete all remaining coursework in the Professional Nursing AS Degree program to earn this degree.

Surgical Technologist Associate’s Degree Complete Block Policy

Students who have graduated from a CAAHEP or OR套 Surgical Technology diploma or certificate program and hold the CST (INBSTAT) certification will receive a total block transfer of 36 general education credits. Students may also transfer in up to 47 credits in successfully completed applicable general education coursework.

- Students must successfully complete all remaining coursework in the Professional Nursing AS Degree program to earn this degree.

Credit by Examination (for non-Competency Courses)

- Enrolled students may request credit by examination for courses if an exam has been developed.

- Students seeking to utilize a Microbiology credit by examination must provide transcripts indicating they have successfully passed with a C grade or higher from an accredited institution a Microbiology course of a minimum four quarter credits which contains both a didactic component and lab. Qualified students who score 73% or higher on the credit by examination will earn a Microbiology “TO” on their Rasmussen College transcript.

- A completion score of 77% or higher is required to earn credit by examination.

- The examination grade will be posted as Test-out (TO) on the student transcript.

- Credits earned count in the transfer maximum.

- Credit by examination will not count as credits for financial aid-eligibility.

A credit by examination may be taken only once for each course.

- If a student has already attempted the course, as indicated by a posted W/D/DP/WP or F/F/A/FD grade, no test-out attempt will be allowed.

- Credits awarded through credit by examination (TO) may be transferable to another institution.

- Contact your Student Advisor for a list of available challenge exams

Course Waver Policies

Medical Coding Practicum Waiver

- Students with a minimum cumulative GPA of 3.0 in their program major courses may request a waiver for the Medical Coding practicum coursework. Students must complete and submit the required paperwork to their Program Coordinator/Director prior to the start of the quarter of the practicum.

- Students must have a variety of experiences in the necessary medical fields rather than from just one area, and documentation will be required from the student’s employer. The Program Coordinator/Director will influence the student’s Practicum Records of the result of the evaluation.

- If the waiver is granted, the grade will be posted on the student transcript as a Course Waiver (CW) once the course waiver form is signed.

School of Education Waivers

- Students who have a current and valid CDA Credential, awarded by the Council for Professional Recognition, and are enrolled in the Early Childhood Education Associate’s degree, Early Childhood Education Diploma, or Early Childhood Education Certificate may request a waiver from Foundations of Child Development, Early Childhood Education Curriculum and Instruction; and Health, Safety and Nutrition/CDA Application.

- The student’s credential will be reviewed, and if the criteria are met, Rasmussen College will waive the course requirements and the grades will be posted on the student transcript as a Course Waiver (CW) once the course waiver request form is signed.

School of Justice Studies Waivers

- Course waivers will be considered for students who have select professional certifications from recognized state police/corrections academies.

- Course waivers will be considered for specific courses within the School of Justice Studies related to the certification.

- No time limit for earning certifications.

- The student’s credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student’s transcript as a Course Waiver (CW) once the course waiver form is issued.

School of Technology Waivers

- Course waivers will be considered for students who have select professional certifications from the Computing Technology Industry Association (CompTIA); Microsoft; Cisco; (ISC)²; Apple, VMware; EMC²; Oracle; C ++ Institute.

- Course waivers will be considered for specific courses within the School of Justice Studies related to the certification.

- Certifications must have been earned within the last three years or are current through renewal.

- Contact your Student Advisor for a list of available challenge exams.

- The student’s credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student’s transcript as a Course Waiver (CW) once the course waiver request form is signed.

School of Design Waivers

- Course Waivers will be considered for students who have select professional certifications from Adobe (Certified Associate or Certified Expert) and Autodesk.

- Course Waivers will be considered for specific courses within the School of Design related to the certification.

- Certifications must have been earned within the last three years or are current through renewal.
The student’s credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student’s transcript as a Course Waiver (CW) once the course waiver request form is signed.

School of Health Sciences Waivers
• Course waivers will be considered for students who have earned the Certified Coding Specialist (CCS) or CCS-P from AHIMA. In addition, an X-Ray operator or radiologic technician certification may also be considered.

• Certifications must be current.
• Course waivers will be considered for specific courses related to the certification.

• The student’s credential will be reviewed, and if the criteria are met, will waive the course requirements and the grades will be posted on the student’s transcript as a Course Waiver (CW) once the course waiver request form is signed.

School of Nursing Waivers
• Students who enroll in the Professional Nursing AS program and have a practical nursing license that is current and unencumbered on the date their program starts at Rasmussen College, may request a waiver from NU117/NUR117 Nutritional Principles in Nursing and NU203/NUR203 Fundamentals of Professional Nursing.

• The student’s license status, as recorded on the state’s licensing website will be reviewed, and if the criteria are met, Rasmussen College will waive the course requirements and the grade will be posted on the student transcript as Course Waiver (CW) once the course waiver request form is signed.

• This does not apply to the Illinois Professional Nursing AS program.

College Equivalency Credit
Credits earned through college equivalency programs will be posted on student transcripts as Test-Out credits (TO), and will be assigned letter grades or applied to cumulative grade point average. Rasmussen College recognizes the following college equivalencies:
• Advanced Placement (AP) examinations administered by The College Board. A score of 3 or higher required.
• College-Level Examination Program (CLEP) examinations administered by The College Board. A score of 50 or higher required for computer-based testing since 2/15/2003. For paper-based exams taken prior to 2/15/2003, the CLEP APC recommended score will be used.
• DSST, DANTES, Excelsior College Exams. Passing scores are determined by the individual test requirements.
• Prior Learning Assessment (PLA) credits may be earned by going through the PLA process as established through The Council for Adult Experiential Learning (CAEL).
• Other types of college equivalency courses and/or examinations may be evaluated for eligibility by the Associate College Registrars.

Military Experience Equivalency Credit
College credit for military service may be awarded upon review of a military transcript. Rasmussen College follows the American Council of Education (ACE) recommendations on transferring credit. These credits are usually listed on the American Council on Education Registry Transcript (SMART), Defense Activity for Non-Traditional Education Support (DANTES) transcript, College Level Examination Program (CLEP) transcript, Coast Guard Credential Initiative (CGI) transcript, Army American Council on Education Registry Transcript System (AARTS) transcript, or Community College of the Air Force (CCAF) transcript. ACE military credits recommendations which have been accepted for transfer will be listed on the student’s transcript with a Transfer (TR) designation.

Transfer to Other Colleges
Rasmussen College does not imply or guarantee that credits completed at Rasmussen College will be accepted or transferable to any other college, university, or institution. The evaluation of courses or students who would like to transfer credits earned at Rasmussen College to another school should understand that the decision to accept transfer credits is always at the discretion of the receiving institution. Please see the Manager of Student Records with questions about transfer to other colleges.

Transcripts
Transcripts for graduates and students who have completed their course of study are provided without charge; however a fee of $5.00 is charged for all other transcripts.

The institution reserves the right to withhold official academic transcripts from students under certain circumstances such as having an outstanding financial obligation to the College.

EXTERNSHIPS, PRACTICUMS, AND CLINICALS

Health Sciences Externships,
Practicums, Externships,
Practicums and externships for Health Sciences programs are, to be conducted in Rasmussen approved locations. Each practicum site will be established utilizing an agreement to determine the responsibilities of the practicum partner, Rasmussen College, and the participating student. Students may need to travel out of the immediate area to complete practicum activities. The cost of any such travel is the responsibility of the student. Practicums/ Externships in Health Sciences programs have attendance expectations that differ from the general Rasmussen College Attendance Policy. These attendance policies can be found in the program-specific manuals/handbooks.

In order to successfully complete a practicum experience, students must complete the required number of practicum hours for the course. Students who do not complete all required practicum hours during the quarter in which the course is scheduled will fail the practicum course.

All activities associated with the course work, especially while the student is completing his or her clinical rotations, will be educational in nature. The student will not receive any monetary remuneration during this educational experience. Nor will he or she be hired for the practicum experience.

Often, students will be offered a position towards the end of their rotation. It must be understood by both parties that should compensation occur for time associated with the practicum requirement, the student may be dismissed from the program and forfeit any accumulated hours.

POLICY AND GRIEVANCES

Accommodations Policy
The staff of Rasmussen College in disability services is to create an accessible college community where students with disabilities have an equal opportunity to participate fully in all aspects of the educational experience. Rasmussen College recognizes its obligation under the Americans with Disabilities Act of 1990 (Public Law 101-336, Integrated Public Service Act of 1973) to accommodate specific disabilities. The college must commit to the success of its students and faculty by prohibiting discrimination on the basis of disability and requiring reasonable accommodations to qualified disabled students in all programs and activities.

Students with disabilities do not have to self-identify or register with the Office of Student Accommodations Coordinator, although the College encourages them to do so. Students seeking academic accommodations must contact the Campus Accommodations Coordinator to request such services. Students who are unsure who to contact should check with the Academic Dean or Campus Director.

Attendance
A basic requirement for employment in any organization is regular, on-time attendance. Rasmussen College students are expected to be on time and in regular attendance for all of their classes. Workplace etiquette also requires a call if an absence is necessary. Rasmussen College students are expected to call the College and to indicate if they are absent or tardy. It is the student’s responsibility to contact the instructor to get missed information, class work, and assignments.

Attendance requirements are met by (a) attending a face-to-face course session at the campus or other class location, or (b) substantive online activity, including commentary in the discussion section of the online classroom, posting of required assignments and course quizzes and exams in a timely manner. Discussion posts in the student lounge area of the classroom are encouraged but do not count as attendance activities. Attendance is not equivalent to participation. Student grades will be impacted by the frequency and quality of participation in class, whether face-to-face or online, consistent with the requirements of the particular course and as outlined in the course syllabus.

Rasmussen College uses a standard grading scale for its courses (although some programs may be required to follow additional standards). Faculty are required to keep accurate attendance records which are submitted to the Student Records. Rasmussen College makes attendance records available to supporting agencies and prospective employers.

Students must maintain regular attendance and be in satisfactory academic standing to remain eligible for financial aid.

First Week Attendance: Students are expected to meet attendance requirements in their courses on or before the seventh (7th) day of the start of a term. Students who have not met the attendance requirement in at least one scheduled College course within seven days of the start of a term may be administratively withdrawn from the College.

Course Attendance: If a student has been in attendance in a course within 14 days of their last date of attendance in that course, he or she may be administratively withdrawn from the course. If the student has been in attendance in any courses within 14 days of their last day of attendance, he or she may be administratively withdrawn from the College. Upon withdrawal a student's financial aid eligibility will be adjusted according to the Institution’s refund policy as described in the College Catalog and will be assigned grades according to the Rasmussen College Drop/Add Class Policy.

Practicums/Externships in Nursing and Health Sciences programs have attendance requirements that are more stringent than the attendance policy above. Attendance policies for programs with additional requirements can be found in program-specific manuals/handbooks.

Rasmussen College Academic Integrity Policy
Introduction
As an institution of higher learning, Rasmussen College is committed to preparing students to be effective, productive and successful contributors to a global community. In pursuit of this commitment, students, faculty and staff of Rasmussen College are expected to uphold the highest standards of personal ethics. Students of Rasmussen College commit to holding themselves and their peers to the foremost level of academic integrity, and accept responsibility should behaviors and actions fall short of the College’s expectations.

II. Definitions
a) Academic Misconduct: is any violation of the Academic Integrity Policy, including all forms of academic cheating but including not limited to acts listed below and any other act permitted to go unreported to the student.

b) Cheating: Distributing or receiving answers or information by any means other than those expressly permitted by an instructor for any academic exercise. Examples include:

i. Copying answers, data, or information for any academic exercise from another student in which the student is not expressly permitted to work jointly with others.

ii. Impersonation: Assuming another student’s identity or allowing another person to complete an academic exercise on one’s own behalf.

iii. Using or attempting to use unauthorized materials, tests, devices, notes, information or study aids in any academic exercise (i.e., assignments, discussions, tests, quizzes, papers, labs).

iv. Collaboration: Knowingly attempting, attempting to assist, or receiving assistance from another student or students to commit academic misconduct, or conspiring with any other person or persons outside of the College to commit misconduct.

v. Fabrication, Falsification, Forgery: Deliberately falsifying, altering, or inventing student records, information or citations. Forgery is the act of imitating or counterfeiting documents, signatures, and the like.

vi. Plagiarism: The act of representing an individual’s or an organization’s words, thoughts, or ideas as one’s own. Examples include:

i. Using information (a paraphrase or quotation), in whole or in part from a source without attempting to give credit to the author of that source.

ii. Using charts, illustrations, images, figures, equations, etc., without citing the source.

iii. Using an academic exercise (in whole or in part) purchased or copied from a ghostwriter or paper/essay mill.

iv. Copyright infringement or piracy, including the use, alteration, or duplication of media, software, code, or information when expressly prohibited or where copyright exists or is implied.

v. Submitting work previously graded in another course without prior approval by the course instructor; or submitting the same work in two or more concurrent courses without prior approval by all course instructors.

III. Violations
A student who violates the Academic Integrity policy faces severe penalty from the College. Violations may occur in one or more courses in one or more quarters and accumulate for all quarters in which the student is enrolled. Upon conclusion by the student’s instructor and the Dean of Students, the student has committed Academic Misconduct, the following penalties will be applied:

Academic Information and College Policies

**Academic Information and College Policies**

---

**Advanced English students enrolled in the field of study are prohibited from using inappropriate material or viewing sites which have been identified as facilitating the violation of copyright/intellectual property protections or other suspicious illegal activity. Prohibited material could include pornographic images, illegal file sharing programs (such as the illegal downloading and sharing of music), or other violations of the Rasmussen College Acceptable Use Policy. Violations will result in the loss of network privileges and possibly other penalties up to and including dismissal.**

**Anti-Hazing Policy**

It shall be the policy of the College to strictly prohibit any action or situation which may recklessly or intentionally endanger the mental, physical health or safety of its students for the purpose of initiation or admission into or affiliation with any organization operating under the sanction of the College. This policy applies to any student or other person who may be associated with any student organization. Violation of this policy may result in disciplinary action but is not limited to suspension and/or termination from school or employment. The Campus Director shall be responsible for the administration of this policy.

**Dress Code**

Rasmussen College encourages students to dress as if they were going to work and to start acquiring a wardrobe suitable for employment after graduation. Several programs, including those in our School of Nursing and our School of Health Sciences, have stringent dress code and professional appearance requirements. Standards are specified in the applicable program handbooks. In some cases, failure to meet the required standard may impact a student’s ability to participate in an externship or clinical experience, and may ultimately impact the student’s grade. Please consult the handbook specific to your program for dress code expectations. See your Program Coordinator/Dean for details.

**Rasmussen College Minimum Technical Requirements**

In order to be successful in online courses, you must use a computer system that meets or exceeds the minimum technical requirements specified in the course. If you do not meet those requirements, you may need to attend a campus to complete some assignments. Due to frequent changes in technology, technical requirements change periodically.

Technical requirements for online courses to run properly are located on the following website: content.learningmanagement/ course_files/techinfo/techinfo_ols.html, which is updated regularly to reflect current requirements. Current technical requirements are as follows:

- **Technical Requirements**
  - These are the technical requirements necessary for your online courses to run properly. Please read this information carefully, as you must ensure that your system meets the minimum technical requirements.
  - Please note, some courses require the use of software that is not Mac compatible. If you use a Mac, you may need to attend a campus, use a PC, or run the software in emulation mode in order to complete some required course activities and assignments.
  - **1. Web Browser Requirements**
    - The following web browsers are formally supported and tested:
      - With PCs running Windows OS:
        - Google Chrome
        - Firefox
        - Internet Explorer version 8, 9 or 10;
      - With Macs running OS X:
        - Firefox
        - Safari 5 or 6.0
    - Please note, there is currently no support for Firefox, Internet Explorer, Safari or Chrome on mobile devices.
  - **2. Cookies Must Be Enabled on your Browser**
    - A cookie is a small file that is placed on your computer by the server. Cookies are a very common Internet technology used by many websites, such as Amazon or eBay. Your browser has a setting that allows you to control whether you allow cookies or not. Since cookies are so common, your browser probably already has cookies enabled. If you are unsure whether your browser is set up properly, please call the Personal Support Center.
  - **3. Required Plug-ins**
    - Flash: Your courses may include images or animations that require the Flash plug-in. If you do not have Flash installed, or have difficulty viewing the animations, you may download the most current version of the Flash plug-in here: get.adobe.com/flashplayer/.
    - Shockwave: Your courses may include images or animations that require the Shockwave plug-in. If you do not have Shockwave installed, or have difficulty viewing the animations, you may load the most current version of the Shockwave plug-in here: get.adobe.com/shockwave/
  - **Acrobat Reader**
    - Your courses may include .pdf files, which require the Acrobat Acrobat Reader. If Acrobat is not installed on your computer, please download the free Adobe Acrobat Reader: get.adobe.com/reader/.
    - **Microsoft PowerPoint**
      - Your courses may include Microsoft PowerPoint presentations. If you do not have PowerPoint installed on your computer, you may use the free PowerPoint viewer to view the course materials. Download the free PowerPoint viewer here: microsoft.com/en-us/download/details.aspx?id=13.
    - **Microsoft Word**
      - Your courses require the use of Microsoft Word to turn in written assignments. If you do not have Word, please contact your instructor.
    - **Microsoft Excel**
      - Your courses may require Microsoft Excel spreadsheet software. If you do not have Excel, please contact your instructor.
    - **ZIP File Compression Utility**
      - Your courses may require the use of a compression utility, like 7-Zip, to create a “zipped” file (i.e. filename.zip). If you do not have a compression utility installed on your computer, you may download a free copy of 7-Zip here: 7-zip.org.
      - If your computer is running Windows XP, or newer, there is a compression utility already built in. For help “zipping” and “unzipping” files using the Windows compression tools, please view the directions at http://www.nondamday.info/ course_files/techinfo/techinfo_ols.html.
A library user is responsible for any items checked out in his or her name. Rasmussen College retains the right to deny borrowing privileges to any person in violation of this or any other library policy.

Loans Circulating materials are loaned for 21 calendar days and may be renewed up to two times if there are no outstanding holds on the material. Special materials are loaned for 3 hours or 3 days, depending on the material type. Restricted items may not be renewed. Library materials must be returned to the library on or before the end of the loan period. Returned materials are accepted at any campus library and may be delivered in person or mailed to the campus. Non-circulating materials are not loaned but may be used in the library.

Fees and Restriction of Borrower Privileges Users will receive a reminder 2 days in advance of an item’s due date.
Following the grace period (5 days for circulating items; 10 hours for special materials), items are considered overdue and borrower privileges will be restricted until all items returned or fees are paid for lost materials. After 30 days past the end of the grace period, the material is considered lost. The library reserves the right to charge for replacement costs. Replacement costs are assessed per each individual item. The library will charge $55.00, or the cost of the replacing the item plus a $5.00 processing fee.

In the event that a library material is returned damaged, the borrower will be assessed a fee to repair or replace the damaged item. In the event an irreplaceable item is damaged, the library will assess a $55.00 fee.

Rasmussen College cannot override fines incurred at other libraries, including fines for Interlibrary Loan items lost or returned late.

Library fees are assessed through the Department of Student Financial Services. Rasmussen College reserves the right to withhold the release of academic information, and other records, pending payment of any amount due to the College.

Non-Discrimination Policy Rasmussen is strongly committed to providing equal employment opportunity for students and all applicants for employment. For us, this is the only acceptable way to operate our College. Rasmussen employment practices conform both with the letter and spirit of federal, state, and local laws and regulations regarding non-discrimination in employment, compensation, and benefits.

Anti-Harassment and Sexual Violence Policy It is Rasmussen College’s policy and responsibility to provide our employees and students an environment that is free from harassment. Rasmussen College expressly prohibits harassment of employees or students on the basis of gender. Harassment undermines our College community morale and our commitment to treat each other with dignity and respect. This policy is related to and is in conformity with the Equal Opportunity Policy of Rasmussen College to recruit, employ, retain, and promote employees without regard to race, color, religion, creed, ancestry, gender, marital status, sexual orientation, national origin, age, physical or other disability, military or veteran status, or receipt of public assistance. Prompt investigation of allegations will be made on a confidential basis to ascertain the veracity of the complaint and appropriate corrective action will be taken. An Executive Vice President or President will be notified of all allegations. This will ensure a prompt, consistent, and appropriate investigation.

It is a violation of policy for any member of our community to create a hostile, discriminatory, or intimidating environment. sexual harassment and it is a violation of policy for any member of the College community to take action against an individual for reporting sexual harassment.

This policy covers actions of all students and employees, whether co-worker, manager or by any other persons doing business with or for Rasmussen.

Informal and Formal Complaints Members of this College community who believe they have been sexually harassed or have been the victim of sexual assault may turn to the assistance of the Campus Director, Regional Vice President, Executive Vice President or President. Whether or not a person consults with a school official, he/she has the option of making an informal or formal complaint according to the procedures outlined below.

No retaliatory actions may be taken against any person because he/she made such a complaint or against any member of the College community who serves as an advisor or advocate for any party in any such complaint. No retaliatory actions may be taken again any member of the College community merely because he/she is or has been the object of such a complaint.

Informal Resolution Early efforts to control a potentially harassing situation are very important.

1. Sometimes sexual harassment can be stopped by telling the person directly that you are uncomfortable with his/her behavior and would like it to stop.
2. Writing a letter to the person or taking to the person’s supervisor can also be effective.
3. Go to a sexual harassment/violence information center or discuss the matter with a friend.
4. Talk to others who might also be victims of harassment.
5. Any employee, faculty member, staff member, or student is encouraged to discuss incidents of possible sexual harassment with the Campus Director, Regional Vice President, or College President.

A Campus Director contacted by a person who may have been subjected to sexual harassment will give advice and guidance on both informal and formal procedures for solving the problem.

During the informal inquiry process, all information will be kept confidential to the great a degree as legally possible.

No specific circumstances, including the names of the people involved, will be reported to anyone else, except the President, Executive Vice President and the Human Resources Director and Corporate Counsel, without the written permission of the person making the complaint. However, if, in the course of the inquiry Rasmussen College finds that the circumstances warrant a formal investigation, it will be necessary to inform the person complained against.

Incidents should be reported within 30 days.

At any time during the procedures, both the person bringing a complaint and the person against whom the complaint is made may have a representative present in discussions with the Campus Director.

Rasmussen College can discuss an informal complaint with the Campus Director, Regional Vice President, Executive Vice President or President.

1. If the person who discusses an informal complaint with an adviser or the person against whom the informal complaint is made, the College will make record of the circumstances and will provide guidance about various ways to resolve the problem or avoid future occurrences.

While the confidentiality of the information received regarding the privacy of the individuals involved, and the wishes of the complaining person regarding action by the College cannot be guaranteed in every instance, they will be protected to as great a degree as is legally possible. The expressed wishes of the complaining person for confidentiality will be considered in the context of the College’s obligation to act upon the charge and the right of the charged party to obtain information.

In most cases, however, confidentiality will be strictly maintained by the College and those involved in the investigation.

2. If the person bringing the complaint is willing to be identified to the person against whom the complaint is made and wishes to attempt resolution of the problem, the College will make a confidential record of the circumstances (signed by the complainant) and suggest and/or undertake appropriate discussions with the persons involved.

3. When a number of people report incidents of sexual harassment that have occurred in a public context (for instance offensive sexual remarks in a classroom lecture) or when the College receives repeated complaints from different people that an individual has engaged in other forms of sexual harassment, the College may inform the person complained against without revealing the identity of the complainant.

Definitions Sexual harassment: Unwelcome sexual advances, requests for sexual favors, and verbal or physical conduct of a sexual nature constituting sexual harassment when:

1) Submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment or academic advancement.
2) Submission to or rejection of such conduct by an individual’s employment or academic advancement.
3) Such conduct has the purpose or effect of unreasonably interfering with an individual’s work performance or creating an intimidating, hostile, or offensive working or academic environment.

This policy prohibits behavior such as, but not limited to:
1. Unwanted sexual advances;
2. Offering employment benefits in exchange for sexual favors;
3. Making or threatening reprisals after a negative response to sexual advances;
4. Verbal sexual advances or propositions;
5. Displaying sexually suggestive objects, pictures, cartoons or posters (includes by electronic means);
6. Sexually offensive comments, graphic verbal commentary about an individual’s body or dress, sexually explicit jokes and innuendos, and other sexually-oriented statements; and
7. Physical conduct, such as: touching, assault, or impeding or blocking movements.

Sexual harassment can occur in situations where one person has power over another, but it can also occur between equals. Both men and women can be sexually harassed. Sexual harassment can be as blatant as rape or as subtle as a touch. Harassment under the third part of the definition often consists of callous insensitivity to the experience of others.

Normal, courteous, mutually respectful, pleasant, non-confrontational interactions between employees, including men and women, that is acceptable to and welcomed by both parties, are not considered to be harassment, including sexual harassment.

There are basically two types of sexual harassment:

1. “Quid pro quo” harassment, where submission to harassment is used as the basis for employment decisions.

Employee benefits such as raises, promotions, better working hours, etc., are directly linked to compliance with sexual advances. Therefore, only someone in a supervisory capacity (with the authority to grant such benefits) can engage in quid pro quo harassment. Scarcely a supervisor promising an employee a raise if she goes on a date with him; a manager telling an employee she will fire him if he does not have sex with her.

2. “Hostile work environment,” where the harassment creates an offensive and unpleasant working environment.

Hostile work environment can be created by anyone in the workplace: whether it be supervisors, other employees, or customers. Hostile environment harassment consists of a pattern of behaviour, such as verbal harassment, unwelcome sexual materials, or even unwelcome physical contact as a regular part of the work environment.

Cartoons or posters of a sexual nature, vulgar or lewd comments or jokes, or unwanted touching or fondling all fall into this category.

For further information please refer to the EEOC’s website at eoc.gov or call the EEOC Publications Distribution Center at 800-669-3362 (voice), 800-800-3302 (TTY).

Sexual orientation harassment: Sexual harassment includes harassment based on sexual orientation. Sexual orientation harassment is verbal or physical conduct that is based on an individual’s actual or perceived sexual orientation, because of his/her sexual orientation and that is sufficiently severe, pervasive, or persistent so as to have the purpose or effect of creating a hostile or work or educational environment.

Romantic/sexual relationships between superior and subordinate: Substantial risks are involved even in seemingly consensual romantic/sexual relationships where a power differential exists between the involved parties. The respect and trust accorded a faculty member or other employee by a student, as well as the power exercised by faculty in giving grades, advice, praise, recommendations, opportunities for further study, or other forms of advancement may greatly diminish the student’s actual freedom of choice concerning the relationship.
Similarly, the authority of the supervisor to hire, fire, evaluate performance, make recommendations, assign and oversee the work activities of employees may interfere with the employee’s ability to choose freely in the relationship. Furthermore, it is extremely difficult to discern risky where age, background, stature, credentials or other characteristics contribute to the perceptions that a power differential exists between the involved parties which limits the student or employee’s ability to make informed choices about the relationship.

Claims of consensual romantic relationships will not protect individuals from sexual harassment charges nor guarantee a successful defense if charges are made. It is in the faculty member’s, supervisor’s, or instructor’s interest to bear the burden of accountability because of his/her special power and responsibility, and it is exceedingly difficult to use mutual consent as a defense. Therefore, all employees should be aware of the risks and consequences involved in entering a romantic/sexual relationship where there is a superior/subordinate relationship.

Sexual assault: Sexual activity, including sexual penetration or sexual conduct carried out under coercion, with the threat of a weapon, through the threat of bodily harm, through a position of authority, or when the victim/survivor is mentally or physically disabled or helpless constitutes criminal sexual conduct.

Having a previous relationship of any nature, including prior sexual contact with the victim/survivor is not an accepted defense for sexual assault. The victim/survivor does not need to prove that he/she resisted and another witness is not needed to prosecute the case.

The relative age of the persons involved, the victim/survivor’s fear of bodily harm to sell or another, the use of threat to carry weapons by the perpetrator, and the infliction of either physical or emotional anguish upon the victim/survivor are among the criteria by which courts account state laws on Criminal Sexual Conduct and under the Crime Victims Bill of Rights.

Formal Complaints by Students and Employees

a. A formal complaint of sexual harassment must include a written statement, signed by the complainant specifying the incident(s) of sexual harassment. The statement may be prepared by the complainant or by an advisor as a record of the complaint. The complaint must be addressed to the Campus Director or other manager who will immediately report the complaint to an Executive Vice President or President and the Human Resource Director or Corporate Counsel.

The Human Resource Director and/or Corporate Counsel, with the assistance of the Campus Director or other manager will formally investigate the complaint and present the findings and recommendations to an Executive Vice President or President.

b. The College will investigate formal complaints in the following manner:

1. The person who is first contacted, after initial discussions with the complainant, will inform the College what actions the individual(s) involved. Rasmussen will decide whether the circumstances reported in the complaint warrant a formal investigation or an informal inquiry.

2. If the circumstances warrant an investigation, Rasmussen will inform the person complained of the name of the person making the complaint as well as the name of the complainant. The College will then limit the investigation to what is necessary to resolve the complaint or make a recommendation. If it is necessary for the College to speak to any other person other than those involved in the complaint, they will do so only after informing the complainant of a person and the person complained against.

3. The College’s first priority will be to attempt to resolve the problem through a mutual agreement of the complainant and the person complained against.

4. The College will be in communication with the complainant until the complaint is resolved. The complainant will be informed of procedures being followed throughout the investigation although not of the specific conversations held with the person complained against.

5. The College will resolve complaints expeditiously. To the extent possible, the College will complete its investigation and make its recommendations within 60 days from the time the formal investigation is initiated.

6. If a formal complaint has been preceded by an informal inquiry, the College will decide whether there are sufficient grounds to warrant a formal investigation.

7. After an investigation of the complaint the College will:

1. Look at all the facts and circumstances surrounding the allegations to determine if there is reasonable cause to believe that harassment has occurred and report its findings and the resolution to an Executive Vice President or President;

2. Report its findings with appropriate recommendations for corrective action to an Executive Vice President or President;

3. Report to an Executive Vice President or President its finding that there is insufficient evidence to support the complaint.

Victims’ Rights Under Sexual Assault Policy

If the assault is alleged to have been committed by a member of our college community on property owned by the College the following additional policy applies:

1. The victim is aware that criminal charges can be made with local law enforcement officials;

2. The prompt assistance of campus administration, or Rasmussen management at the request of the victim, in notifying the appropriate law enforcement officials of a sexual assault incident;

3. A sexual assault victim’s participation in and access to the presence of this victim and any other support person at any campus or college facility disciplinary proceeding concerning a sexual assault complaint;

4. Notice to a sexual assault victim of the outcome of any campus or college facility disciplinary proceeding concerning a sexual assault complaint, consistent with laws relating to data practices;

5. The complete and prompt assistance of campus administration, or Rasmussen management at the direction of law enforcement authorities, in obtaining, securing, and maintaining evidence in connection with a sexual assault incident;

6. The assistance of campus administration or Rasmussen management in preserving, for a sexual assault complaint or victim, materials relevant to a campus disciplinary proceeding;

7. The assistance of campus and/or other Rasmussen personnel, in cooperation with the appropriate law enforcement authorities, at a sexual assault victim’s request, in shielding them from unwanted contact with the alleged assailant, including transfer of the victim to alternative classes, and

8. Further information can be obtained from the following sources: Minnesota Department of Human Rights 190 East 5th Street, Suite 700 St. Paul, MN 55101 1-800-657-3704 or 651-296-5663 TTY 651-296-1283 Website: humanrights.state.mn.us/ Office of Justice Programs 651-207-7130 or 800-247-0930 Website: ojp.state.mn.us Wisconsin Office of Crime Victim Services Wisconsin Victim Helpline: (800) 446-6564 Fax: (608) 264-6368 Website: doi.state.wi.us/ovcs/office-crime-victim-services

9. The campus administration will inform victims of their rights under the Crime Victims Bill of Rights, including the right to assistance from the Office of the Crime Victim Ombudsman and the Crime Victims Reparations Board. For further information refer to the Office of the Crime Victim Ombudsman website at oj.state.mn.us/ (651-642-0550) or the Crime Victims Reparations Board website at oj.state.mn.us/MCCVS/ (651-282-6256).

Nothing in this policy shall prevent the complainant or the respondent from pursuing formal complaints or remedies or resolution through state or federal agencies or the courts.

Drug-Free School and Workplace

In accordance with the Drug-Free Schools and Communities Act (34 CFR Part 117), all Rasmussen College campuses are hereby declared a drug-free college and workplace. For more information visit The U. S. Department of Education’s Higher Education Center for Alcohol and Other Drug-Free Prevention and Outreach Website at www.ed.gov/; Students are prohibited from the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance or alcohol anywhere on property belonging to the College including but not limited to grounds, parking areas, or anywhere within the buildings; or while participating in College-related activities including but not limited to clinical, externship, or practicum experiences. Students who violate this policy will be subject to disciplinary action up to and including expulsion or termination of enrollment.

As a condition of enrollment, students must agree to the terms of how the College will take or one of the following actions within 30 days with respect to any student who violates this policy by:

1. Reporting the violation to law enforcement officials.

2. Taking appropriate disciplinary action against such student, up to and including expulsion or termination of enrollment.

3. Requiring such student to participate in a substance abuse rehabilitation program if approved for such purposes by a federal, state, local, health law, enforcement, or other appropriate agency.

In compliance with the law, the College will make a good faith effort to maintain a drug-free College through implementation of the preceding policy and will establish and maintain a drug-free and alcohol awareness program. Upon enrollment and on an annual basis, students will receive a copy of the Rasmussen College Drug-Free School and Workplace policy, list of applicable sanctions under federal, state, or local laws, description of health risks, list of drug and alcohol programs that are available, and list of imposed disciplinary sanctions for students.

The Federal Government has taken a number of legislative steps to combat the distribution of these drugs. These anti-drug laws affect several areas of our lives. For instance, the Department of Housing and Urban Development, which provides public housing, is subject to eviction found to be involved in drug related crimes on or near the public housing premises. Businesses and landlords may subject to a loss of those contracts if they do not promote a drug-free environment. In our particular situation, students involved with drugs could lose their eligibility for financial aid. Further, they could also be denied other federal benefits, disability, retirement, health, welfare, and Social Security. Finally, a record of a felony or conviction in a drug-related crime may prevent a person from entering certain career fields.

Drugs and alcohol are highly addictive and injurious to the person and can cause harmful effects to virtually every aspect of a person’s life, i.e., relationships, family, job, school, physical, and emotional health. People who use drugs and alcohol can lose their sense of responsibility, become restless, irritable, paranoid, depressed, inattentive, anxious, or experience sexual indiscrimination, loss of physical coordination and appeal, go into coma, experience convulsions, or even death.

Persons who use drugs and alcohol face not only health risks, but their ability to function in their personal and professional capacities can be impaired as well. Some examples of this are a hangover, or a feeling of being “burnt out” being preoccupied with plans for the next drink, or “high” or slowed reflexes that can be especially dangerous while driving.

There are danger signals that could indicate when someone is in trouble with drugs or alcohol:

• inability to get along with family or friends
• uncharacteristic temper tantrums
• increased “secret” type behavior
• abrupt changes in mood or attitude
• resistance to discipline at home or school
• getting into a “slump” at work or school
• increased borrowing of money
• a complete set of new friends

We recommend that you observe any of the above changes in any student of Rasmussen College immediately notify the Academic Dean or Campus Director.

Drug Abuse Policy

Rasmussen College is committed to providing a safe, drug-free environment for its students and employees, based on our concern for the safety, health and welfare of our students and their families, as well as our employees and the community. The organization also wishes to protect its business from unnecessary financial loss due to drug or other intoxicant use among its students and employees.

Consistent with this commitment, Rasmussen College strictly prohibits:

1. The presence of students or employees on campus or off campus at activities sponsored by the College, while under the influence of intoxicants or other controlled substances

2. The use, manufacture, furnishing, possession, transfer, or trafficking of student-run, illegal drugs, or other controlled substances in any amount, in any manner, or at any time on Rasmussen College campuses or off campus at activities sponsored and controlled by the College.

Rasmussen College strictly prohibits:
Rasmussen College has the right to:
1. Discipline students, including dismissal, for felony convictions or illegal use, possession or trafficking of drugs.
2. Take disciplinary action against students who violate this policy.
Students may also be suspended, pending outcome of an investigation regarding compliance with this policy.

**Tobacco Use Policy**

Smoking and tobacco use is prohibited at all facilities owned, leased and/or controlled by Rasmussen College, including campuses, office buildings and grounds. This includes, but is not limited to, common work areas, classrooms, labs, elevators, hallways, restrooms, employee lounges, student lounges, library, parking lots, plazas, courtyards, entrance and exit ways, and any other areas of the campus grounds. This policy applies to all faculty, staff, students and visitors.

This policy does not apply to areas of multi-tenant buildings that the proprietor has designated a public area for smoking. Similarly, this policy does not apply to off-site events controlled or sponsored by the College where management had designated an area for smoking.

For purposes of this policy, “tobacco use” means the personal use or consumption of any tobacco product, whether lit or not, including the use and display of tobacco products in electronic cigarettes or other device intended to simulate smoking. Prohibited tobacco products include smokeless tobacco, snuff, chewing tobacco, smokeless pouches, or any other form of loose-leaf, smokeless tobacco; and the use of unit cigarettes, cigars, and pipe tobacco. Smoking is defined as inhaling, exhaling, injecting or carrying in hand any lit tobacco product, including cigarettes, cigars, pipe tobacco, and any other tobacco products.

Personal possession of tobacco products inside a pocket, handbag or other storage container where the product is not visible is allowed.

Anyone found to be in violation of the Tobacco Use Policy will be subject to discipline in accordance with the applicable conduct and discipline policy. Visitors may be asked to leave the premises.

**Weapons Policy**

Rasmussen College prohibits the possession of weapons of any kind inside campus buildings. Prohibited weapons include but are not limited to, firearms, BB/pellet guns, slingshots, paint guns, arrows, swords and knives other than cooking utensils and self-defense weapons such as a black length of 3 inches or less. Prohibited items include weapons that are loaded or unloaded, functioning or non-functioning, and anything that could be perceived as a weapon, including toys and weapons used for decorative, display and or simulation purposes. This policy applies to all staff, faculty, students and visitors with the exception of licensed peace officers and law enforcement/security agents as allowed by applicable statute. The approved storage and use of weapons for training purposes as approved by the College and graduation ceremonies, internships, and clinical sites. This policy does not include Rasmussen College parking lots, where weapons are allowed to be stored in private vehicles unless prohibited by a separate parking facility owner or operator. Rasmussen college defers to agency/site-specific rules regarding School of Justice Studies training facilities.

**Family Educational Rights and Privacy Act (FERPA)**

Amended 10/01 to include the USA Patriot Act

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the institution receives a request for access. Students should submit to the registrar, business office, or other appropriate office written requests that identify the record(s) they wish to inspect. The institution will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s educational records that the student believes are inaccurate or misleading. Students may ask the institution to amend a record that they believe is inaccurate or misleading. They should write the Campus Director, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading.

3. If the institution decides not to amend the record as requested by the student, the institution will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

4. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the institution in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the institution has contracted (such as an attorney, auditor, or collection agent); or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

5. The right to disclose – without the written consent or knowledge of the student or parent – information in education records to appropriate officials carrying out an emergency, if knowledge of the information is necessary to protect the health and safety of the student or other individuals. The parent of student or others must be present.

6. The right to disclose – without the written consent or knowledge of the student or parent – information in education records to appropriate parties in connection with an emergency, if knowledge of the information is necessary to protect the health and safety of the student or other individuals. The parent of student or others must be present.

7. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the College to comply with the requirements of FERPA. Students may request the right to file a complaint with the U.S. Department of Education concerning alleged failures by the institution to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

**Educational Records Definition**

A student’s education records are defined as files, materials, or documents that contain information directly related to the student and are maintained by the institution. Access to a student’s education records is afforded to school officials who have a legitimate educational interest in the records, such as for purposes of record grades, attendance, extracurricular activities; degrees and/or awards received; last school attended; dean’s list or equivalent; attendance status (full-time, part-time) and dates of attendance (the period of time a student was enrolled at Rasmussen College) to not include specific daily records of attendance.

**Directory Information**

Directory Information is that information which may be unconditionally released without the prior consent of the student unless the student specifically requested that the information not be released. The school requires that such requests be made in writing to the Campus Director within fifteen (15) days after the student starts classes.

**Grievance Policy**

It is the policy of Rasmussen College that students should have an opportunity to present school-related complaints through grievance procedures. The College will attempt to resolve promptly all grievances that are appropriate for handling under this policy.

An appropriate grievance is defined as a student’s expressed feeling of dissatisfaction regarding any interpretation or application of school-related policies or the College’s personnel;

1. The right to appeal the College is timely fashion of any grievance considered appropriate for handling under this policy. As used in this policy the terms “timely fashion,” “reasonable time,” and “promptly” will mean ten days.

Students are assured that no adverse action will be taken by the College or any of its representatives for registering a grievance.

Grievance Procedure

In the event an applicant, student, graduate, former student, or other party who has dealings with the College feels his/her rights have been violated, the following procedures should be followed:

1. The individual must first try to resolve the issue with the other member involved.

2. If the matter is not resolved to the person’s satisfaction he/she has the option to follow the appropriate steps:

   a. Requests for further action on educational issues should be made to the Dean. The Dean will investigate the grievance, attempt to resolve it, and issue a decision to the student.

   b. Students who feel they have an appropriate need for grievance should use the Campus Director for their campus. The Campus Director will investigate the grievance, attempt to resolve it, and issue a decision to the student.

   c. If the grievance is still not resolved, students should contact the Campus Director for their campus. The Campus Director will review the previous decisions, conduct additional investigation if necessary, attempt to resolve the grievance, and issue a decision to the student.

   d. Students or other interested parties may also contact:

       800-621-7440 or 312-263-0456

**Appeal Procedure**

Rasmussen college recognizes the rights of applicants, students, graduates, former students, and other parties who have dealings with the College to have their complaints heard in matters of alleged violation of policies, procedures, and guidelines of the institution. Individuals who feel they have been unjustly treated can request the Campus Director to hear their appeal.

1-888-5-RASMUSSEN

2014-2015 CATALOG AND STUDENT HANDBOOK
CONSORTIUM AGREEMENT

Rasmussen College has signed consortium agreements with all Rasmussen College campuses. Course requirements for programs may be completed at any of the campus locations, as the schools have common ownership and common courses, and students will have the flexibility to take courses from all locations as they choose. Students who attend a class at Rasmussen College other than their home campus (primary attendance location) will have their total tuition and fees charged by their home campus. All financial aid will be awarded and disbursed at their home campus. The home campus monitors satisfactory progress. A copy of the consortium agreement is kept on file at each campus. Students have the right to review and acknowledge the agreement prior to taking courses at other campuses.

REFUNDS

The State of Minnesota and State of Wisconsin Cancellation, Termination, Refund Policy

If a student is cancelled or terminated, for whatever reason, the following apply:

• Each student will be notified of acceptance/rejection in writing. In the event a student is rejected, all tuition, fees and other charges will be refunded. A student in any term who withdraws from the College must give written notice to the College. Date of withdrawal is the last day of recorded attendance.
• The College will acknowledge in writing any notice of cancellation within 10 business days after the receipt of request and will refund the amount due within 30 business days. Written notice of cancellation shall take place on the date the letter of cancellation is postmarked or in the case of a hand carried notice, it shall occur on the date the notice is delivered to the College.
• Notwithstanding any of the contrary, if a student gives written notice of cancellation following written acceptance by the College and prior to the start of the period of instruction for which he/she has been charged (“Period of Instruction”), all tuition and fees paid will be refunded. If any books and supplies provided by the College are not returned unused and in a condition such that they can be returned to the supplier, the student will be assessed a fee of $150 per course for these books and supplies. All prepaid tuition is refundable.
• If a student has been accepted by the College and gives written notice of cancellation or termination after the start of the Period of Instruction for which they have been charged, but before completion of 60% of the Period of Instruction, the amount charged for tuition, fees, and all other charges for the completed portion of the Period of Instruction shall not exceed the pro rata portion of the total charges for tuition, fees, and all other charges that the length of the completed portion of the Period of Instruction bears to its total length. After the completion of 60% of the Period of Instruction, no refund will be made.
• Student refunds are made within 45 days of the date of determination of withdrawal if the student withdraws prior to completing 60% of the course.
• The refund policy is not linked to compliance with the College’s regulations or rules of conduct.
• Any promissory note instrument received as payment of tuition or any other charge will not be negotiated prior to completion of 50% of the course.

The State of North Dakota Cancellation, Termination, Refund Policy

Rasmussen College shall refund tuition and other charges when written notice of cancellation is given by the student, in accordance with the following:

a. In accordance with Iowa Code 714.23, students who are residents of the state of Iowa shall receive a pro rata refund of tuition charges if they withdraw from an educational program at Rasmussen College, calculated as follows: Not less than ninety percent of the amount of tuition charged to the student, multiplied by the ratio of the number of calendar days remaining in SIXTY PERCENT of the school period until the date equivalent to the completion of sixty percent of the calendar days in the school period to the total number of calendar days in the school period until the date equivalent to the completion of sixty percent of the calendar days in the school period.

b. Notwithstanding the paragraph above, the following tuition refund policy shall apply:

1. If a terminating student has completed 60% or more of a school period, no tuition refund will be granted. However, if, at any time, a student terminates a program due to the student’s physical incapacity or, for a program that requires the student to attend physical classroom instruction due to the transfer of the student’s employer to another city, the terminating student shall receive a refund of tuition charges in an amount that equals the amount of tuition charged to the student multiplied by the ratio of the remaining number of calendar days in the school period to the total number of calendar days in the school period.

The letter explains the type and amount of funds that will be refunded and explains the option to accept or decline all or part of the monies. A 14-day response time is given to the student for their decision. If no response is received within the 14 days, the remaining post-withdrawal disbursement is cancelled.

Federal regulations dictate the specific order in which funds must be returned to the Title IV programs by both the student and the College, if applicable. Rasmussen College follows this mandate by refunding monies in the following order: Direct Stafford Loans, Subsidized Stafford Loans, and PLUS Loans, Pell Grant, FSEOG, and then other Title IV programs. Rasmussen College uses the software and printed worksheets provided by the U.S. Department of Education to document the Return of Title IV Funds Calculation along with the Post-Withdrawal Disbursement Tracking Sheet.

Extended Quarter Break Stop Out Policy

Rasmussen College encourages students to remain continuously enrolled in their program through graduation. Rasmussen College recognizes that on occasion a student may experience an extraordinary personal situation for which the student may be unable to complete the course in the timeframe prescribed by the College. A student who voluntarily withdraws from the College for the most recent federal fiscal year is more than a reduction in tuition as specified above.

Refund Policy for Iowa Residents:

The federal return of Title IV funds formula calls for a second calculation, similar to the one outlined above, where the school determines the percentage and amount of tuition which was unearned. The school compares the unearned tuition with the unearned Title IV aid, and returns the lesser of these two amounts.

Stop Out Request Forms must be signed to the Campus Director or Dean. The student will provide the student with the necessary information to make an informed decision. Stop Out Request Forms must be received by the College prior to the first day of quarter for which the Stop Out is being requested. Students who remain continuously enrolled will not be eligible to receive financial aid at any other institution during this break. Students who are approved to take a Stop Out are eligible to receive financial aid on the next quarter of the term the student returns. A Stop Out is not permitted in consecutive terms.

Military Leave and Refund

Rasmussen College supports its students who are also members of the armed forces. Military service members who are official orders to deploy for state or federal needs, as well as their spouses, who complete the academic quarter due to the deployment may withdraw without penalty from any or all classes in which they are enrolled, even if the established deadline for withdrawal has passed. These students are entitled to a full refund of tuition and mandatory fees for the term, subject to applicable laws governing federal or state financial aid programs and allocation or refund as required under those programs. The student will receive a tuition refund. No tuition refund will be calculated according to federal guidelines, and any remaining balance will be returned in accordance with the student’s Excess Funds Form (signed upon enrollment). Students in good standing who withdraw under this policy may be reenrolled in the next quarter under the same academic policies. Students who are approved for military service who do not meet admissions requirements are excluded from this policy; students must meet those additional requirements at the time of re-enrollment.
Medical Leave of Absence and Medical Withdrawal Policy

Medical Leave: Each leave will be for one quarter and can be extended through the following quarter. No leave may extend for more than two consecutive quarters, although there is no limit to the total number of quarters that a student may accumulate. Medical leave is intended for students who need to take time away from Rasmussen College for health reasons.

Medical Withdrawals may be one of the following:
1. Medical Withdrawal: intended for students who do not plan to return to Rasmussen College.
2. Involuntary Medical Withdrawal: Initiated by campus Administration for students who are suspended or are dismissed due to conduct policy violations, or who pose a direct threat to themselves or others.

Students are treated as a drop/withdrawal for Financial Aid purposes and may end up owing a tuition balance. Students should see the Student Financial Services Office to determine the impact of a Medical Leave or Withdrawal.

Applying for a Leave or Withdrawal:
To apply for a Medical Leave or Medical Withdrawal, the student must obtain the application form from the Campus Accommodations Coordinator, have it signed by the appropriate person(s) and return the completed form to the Campus Accommodations Coordinator.

When a Student Wants to Return After a Medical Leave of Absence
To return from Medical Leave, the student must contact the Campus Accommodations Coordinator prior to the first day of classes to complete a re-admission application. Additionally, the Campus Accommodations Coordinator must receive a letter from the student’s professional therapist and/or physician stating the student’s medical situation and that the professional therapist/physician believes the student is able to return to Rasmussen College.

Students must be cleared by all of the following once the re-admission application is received: Dean, Student Financial Services Office and Campus Director.

Federal Distribution of Funds Policy
Once the refund liability for a particular student has been determined, the federal portion of the refund shall be distributed back to the various programs in the following manner:
- All refund monies shall first be applied to reduce the student’s Federal Direct Unsubsidized Stafford, Federal Direct Subsidized Stafford, and Federal Direct PLUS loans received on behalf of the student.
- Any remaining refund monies will then be applied to reduce the student’s Federal Pell Grant award.
-Any remaining refund monies will then be applied to reduce the student’s Federal SEOG award.
-Other Federal SFA Programs authorized by Title IV Higher Education Act.

Non Federal Refund Distribution Policy
For Federal Categorical charges less:
- Amount of institutional charges that the school can retain per our state mandated refund policy less:
- Amount of Institutional Share of the Title IV Refund

Remaining refund due to the State Aid Programs
Ratios are then determined for each of the State Financial Aid as part of the total Non-Title IV financial aid disbursed to the student for the period during which the student withdrew.

For Minnesota Campuses
For Minnesota Campuses Refunds for state aid programs are calculated on a proportional basis. To calculate the remaining refund due to the Minnesota State Grant Program, the SELF Loan Program, and other Minnesota State Aid Programs (with the exception of the State Work Study Program), the following formula is used:
- Amount of funds (financial aid and cash) applied to institutional charges (including post-withdrawal disbursements of Title IV and related institutional charges) less:
- Amount of institutional charges that the school can retain per our state mandated refund policy less:
- Amount of Institutional Share of the Title IV Refund

Veterans Refund
In the event a veteran discontinues training for any reason, any supplies or textbooks issued to and paid for by the veteran become the property of the veteran. Electronic resources, access to which the veteran paid for as part of the course resource fee, shall remain accessible to the veteran as long as the license provided by the publisher/owner allows. Licenses for electronic resources, which are utilized in most courses at Rasmussen College, are typically active for a length of 190 days to two years, dependent on the publisher.

CAMPUS SECURITY CRIME STATISTICS

Rasmussen College provides prospective and enrolled students and employees with its current Crime Awareness and Campus Security Act statistics. This policy contains information pertaining to the reporting procedure of criminal activities, security and access to campus facilities, campus law enforcement and criminal offenses reported to the campus or local police. As part of our campus crime prevention plan, Rasmussen College provides training in the prevention of crime, sexual harassment/violence and alcohol/drug abuse.
ACADEMIC INFORMATION AND COLLEGE POLICIES

Accreditation
Rasmussen College is accredited by the Higher Learning Commission and a member of the North Central Association 230 South LaSalle Street, Suite 7-500 Chicago, IL 60604-1374 1-800-821-7440 or 312-263-0456
The Health Information Technician Associate Degree program offered at the Brooklyn Park/Maple Grove, Bloomingdale, Eagan, Lake Elmo/Woodbury, Mn., and St. Cloud Campuses in Minnesota – the Aurora/Naperville and Rockford Campuses in Illinois – the Green Bay Campus in Wisconsin – and the Rasmussen College Online Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The Medical Assisting Diploma program at the Green Bay, Lake Elmo/Woodbury, and Moorhead campuses is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

• Commission on Accreditation for Health Informatics and Information Management Education
• Commission of Accreditation for Allied Health Education Programs

The Health Information Management Bachelor of Science degree program is in Candidacy Status, pending initial accreditation by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036; (202) 887-6791. New applicant status is neither a status of accreditation nor a guarantee that accreditation will be granted. Programs or campuses not listed above are not accredited.

Licenses, Authorizations, Certifications, Approvals, and Registrations
The Arkansas Higher Education Coordinating Board has certified Rasmussen College to offer the following degree programs by distance technology to Arkansas residents: Accounting B.S., Business Management B.S., Early Childhood Education Leadership B.S., Marketing B.S., Finance B.S., Healthcare Management B.S., Human Resources and Organizational Leadership B.S., Health Information Management B.S., Criminal Justice B.S., Nursing B.S. (RN to BSN), Cyber Security B.S., Information Technology Management B.S., Accounting A.A.S., Business Management A.A.S., Early Childhood Education A.A.S., Health Information Technician A.A.S., Medical Administration A.A.S., Criminal Justice A.A.S., Human Services A.A.S., Paralegal A.A.S., and Information Systems Management A.A.S. Arkansas Higher Education Coordinating Board certification does not constitute an endorsement of any institution or program. Such certification merely indicates that certain criteria have been met as required under the rules and regulations implementing institutional and program certification as defined in Arkansas Code 6-61-301.

Rasmussen College is licensed by the Commission for Independent Education, Florida Department of Education. Additional information regarding this institution may be obtained by contacting the Commission at:

Limitations
This catalog was prepared using information current at the time of publishing, however all information contained herein is subject to change without notice at the discretion of the College. This includes but is not limited to the following: admission and graduation requirements, academic calendar, course descriptions and content, courses offered, online courses and programs, and statement of tuition and fees. For current calendars, students should refer to a copy of the schedule of classes for the term in which they enroll. The courses listed in this catalog are intended as a general indication of Rasmussen College’s curriculum. Courses and programs are subject to modification and changes in all courses are offered every term and the faculty teaching a particular course or program may vary. Students who maintain continuous enrollment will be able to complete their program at Rasmussen College even if the program is discontinued. Rasmussen College reserves the right to cancel any class because of under-enrollment or non-availability of selected faculty and to add or to delete certain courses, programs, or areas of study, to make faculty changes, and to modify tuition charges, interest charges, fees, and the course resources fee.

Many employers, certification boards, and licensing organizations require criminal background checks. Therefore, prior criminal convictions may impair one’s eligibility to sit for these exams or to secure employment in one’s chosen career field.

Pharmacy Technician students convicted of non-drug-related felonies may not be eligible to sit for the Pharmacy Technician Certification Board (PTCB) exam. Pharmacy Technician students convicted of drug- or pharmacy-related felonies ARE NOT eligible to sit for the PTCB exam.

Students seeking licensing as professional peace officers in Minnesota must complete the required Law Enforcement coursework at Rasmussen College or transfer in the equivalent. In addition, these students must obtain an official Peace Officer Standards and Training (POST) course number meeting POST requirements and be eligible to sit for the Peace Officer Standards and Training (POST) licensing exam. Students must provide Rasmussen College with a copy of their required first aid certification (such as a copy of their first responder card) for inclusion in the student’s file at Rasmussen College. Some skills training providers may require an additional accreditation. Skills training cannot be completed online.

Rasmussen College reserves the right to deny admission to applicants whose total credentials do not meet the institution’s standards for academic performance and behavior deemed essential by Rasmussen College and relevant to any of its lawful missions, processes, and functions as an educational institution or business.

The administration of Rasmussen College reserves the right to make any change in this catalog or its operations regarding its meaning.

- Full time students are defined as taking 12 or more credits per quarter. Students taking less than 12 credits are part time students. For tuition purposes only, students taking 8 or more credits during the Mid Quarter term are considered full time.
- There is a required course resources fee of $150 per course. Courses with course numbers ending with “L” or “LL” will not be charged a course resources fee.
- FAST TRACK: Students taking sixteen (16) or more credits shall only be charged for sixteen (16) credits and will be assessed an additional course resources fee of $150 for every course over four courses.
- Tuition rate is locked in for continuously enrolled students. A change in the number of credits taken during enrollment in any quarter may lead to different prices if a student moves from part-time to full-time or vice versa.
- Individual Progress students will be charged at the School of Business rate, plus a $150 course resources fee for each class.
- Audit Students who elect to take courses without earning college credit are charged $275 per credit hour plus a $150 course resources fee for each course. Students who wish to convert the Audit grade to a letter grade will be charged an additional fee of $75 per credit hour.
- No additional discount or reduction can be applied to full-time tuition rates with the exception of the School of Nursing, whose students remain eligible for corporate partner discounts, military member/family discounts and articulation discounts.

Course Resources Fee

Rasmussen College has one simple course resources fee, charged for all courses. This fee makes the cost of course resources predictable each quarter. Only one course resources fee will be applied for courses with a common course number split between lecture, lab and clinical components. The course resources fee includes, but is not limited to (where applicable for specific programs):

- Rental of eBooks for use during the course for the time period prescribed by the course materials vendor(s)
- Physical and electronic library resources (reference services, books, eBooks, databases, guides, interlibrary loan, etc.)
- Peer, faculty and expert tutoring with 24/7 math support and question response as well as lab paper review
- Technology tools and online course systems
- The Student Portal
- The Personal Support Center Help Desk
- Tactical facilities and services required for the criminal justice program
- Licensed materials and videos
- Reimbursement for student exam certifications and certain exam review programs
- Some (not all) background checks and immunizations
- Uniforms and other supplies for the medical and criminal justice programs used while in class
- Access to online career resources such as Optimal Resume and Job Connect
